NETFLIX

hulu

See why Google, Netflix or Hulu may be gearing up for a bidding war over XUII... **as we speak!**

“The worldwide recorded music industry’s revenue grew 0.3 percent to \$16.5 billion last year, the first increase in more than decade, as more people downloaded music and used online streaming sites.”

**Bloomberg**

Greetings Fellow Profit Seeker,

How does a small company make huge strides in revolutionizing the digital music industry while staying under main stream Wall Street’s radar?

The answer is simple: by making smart moves and waiting till the right time to reveal them selves to the world. As the old adage goes, it’s better to have all your ducks in a row...

And Xumanii (XUII) has put all the right pieces in play to build themselves into a digital music powerhouse – and return investors like you potentially huge, 30-fold profits!

What they’re doing is nothing short of amazing...

**By partnering with the major players in the music industry and providing in expensive HD live concerts worldwide, XUII is transforming and revolutionizing the live broadcast experience with its patent pending technology, online platform and solution of hardware and software – through their website Xumanii.com.**

You see, XUII isn’t looking to reinvent the wheel, they’re just looking to make it better...

And by giving fans easy and affordable HD internet access to their favorite acts, that’s exactly what they’re doing! They’re bringing the concert experience into the home!

But that’s just the beginning, as XUII social media strategy could take them from hundreds of millions of consumers to BILLIONS of viewers with the click of a simple app for a smartphone or tablet...

It’s the evolution of the over \$26 Billion live music industry – and XUII is movement’s fore runner!

*Investors who act now, could be set to pocket record profits as this tiny company becomes the go to source for live, streaming HD concerts from the biggest names in music, comedy and more!*

And it all starts with their patent pending technology

**What Separates XUII From The Pack Is What  
Could Put \$\$\$ Into Your Pocket**

As we talked about a few moments ago, XUII isn't trying to reinvent the wheel, here – they're not first company to try and bring the live concert experience home...

But they are the first company to invent and create the means to do it better.

XUII's technology has wireless capabilities that no one is offering or can...

But it's their Xumanii™ Broadcast Manager software turns the viewer into the "director" by putting the power of the experience in the user's hand, as they can use this amazing innovation to edit their broadcast from different camera angles.

This has NEVER been done before!

And when you pair this incredible innovation with XUII's patent pending promotion tool of Xumanii™- Facebook application – and you're looking at a sure fire winning combination.

The best part, is these two innovations are just icing on the cake as what will bring the viewers through the door is the simple fact that all of Xumanii's broadcasts are in HD format and with a bitrate higher than any other live webcast.

High bitrate means there's basically ZERO lag time – no buffering, no downloading!

✓ *This is how you build a solid consumer base and many of music's biggest stars understand that, this is why the giant names like Drake, Trey Songz and Elephant Man and others are signing up with XUII...*

Because they want their fans as connected as possible!

Complete access means more money in the stars pockets...

So when they start tweeting and posting that their American fans can watch their next concert from Japan – live and in HD on Xumanii – you can bet that they'll be doing it as much as possible.

For those who get in early on XUII, all this publicity can only mean one thing...

**Profits!**

But we glossed over an amazing fact that could have early investors cashing out FAST with big gains...

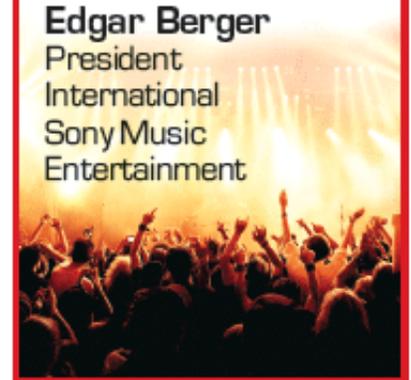

## **What XUII's Patents Could Mean To Shareholders (Here's a hint: FAST cash!)**

There's no doubt that Xumanii could change the concert experience as we've come to know it, starting a digital music revolution...

**“Well the reality is, digital is saving music. I absolutely believe that this marks the start of a global growth story. The industry has every reason to be optimistic about its future.”**

**Edgar Berger**  
President  
International  
Sony Music  
Entertainment

And as amazing as this task is, the bottom line to every important goal is, well...the bottom line.

XUII has gone about protecting their property by moving forward and applying for patents on their ground breaking software and apps...

But what does this mean for XUII, and more importantly its shareholders?

Well, first it means that nobody else can use their technology without paying big bucks to Xumanii first...

And if nobody can use this technology without permission, it means that XUII can sell the rights to their intellectual property to other online venues looking to make a fortune off the digital music revolution.

These licensing agreements mean big money for XUII's bottomline...

And any software ran by these "outsiders" would be adding cash that bottomline for XUII and their shareholders!

Now these licensing agreements can come in the form of straight up "pay to play" deals, or what investors like us like better, a piece of the profit on sales...

This continuity income is basically free money, as XUII puts no money out for the process – they simply sign the agreement, sit back, and collect the check.

**It's just another reason why industry experts believe that XUII could be one of the most profitable companies to come along in the over 67 Billion dollar music industry in a long, long time!**

## **From FAST Triple-Digit Gains To A 30-Bagger— What Makes XUII A HUGE Buyout Target!**

XUII is in a unique position...

Because by becoming the internet's "go to" site for live, HD concerts, this forward thinking company would draw themselves a lot of attention.

It might not be long until the top names in streaming digital like Apple, Google, Netflix or Hulu start to take notice of the amount of musical and comedy acts signing on with XUII...

Now, imagine if one of these companies decided they wanted all those pay-per-view dollars that are destined to come XUII's way and decided to bring the company under their own umbrella? The patents that XUII has pending are a very good selling point for any company looking to cash in on this amazing technology...

This one move would set them up as an online HD concert powerhouse – and XUII shareholders get the chance to walk away from the table incredibly wealthy!

But...

What happens when more than one of these companies decides it wants XUII for itself?

Exactly! A high-priced and aggressive bidding war could break out...

**HUGE BUYOUT ALERT**  
Profit Profile: Xumanii, Inc.  
Ticker Symbol: XUII  
Industry: Surging  
Potential: Growing

Meaning that even triple-digit gains would look like peanuts compared to a 30-Fold return that XUII could fetch through a potential bidding war...

What would you do with those kinds of profits?

With that big of a gain, you could pack half of that cash away for a rainy day, then, you could take the rest and spend it however you wanted to...

That's what shareholders of XUII could be seeing happen in the very near future, the only question is:

Will you be there to profit?

## **Revenue Sharing**

### **Why Music Executives Would Be CRAZY Not To Push More Artists To Sign On With XUII**

You'd be hard pressed to find a concert these days that doesn't have a major brand as the sponsor...

Bud Light, Jack Daniels, Coca-Cola – music acts have found a way to subsidize the cost of touring by having a main sponsor cover many of the incidentals that pop up from bringing an act around the country – or even the world.

It's a win/win situation for all parties involved...

The music act gets extra money so they get to keep more of the ticket sales in their pocket, and the sponsor wins, by getting exposure and attaching their name to a band or performer that'll ensnare their fans and turn some of them into loyal customers.

And XUII understands this dynamic and how important it is to keep this money machine rolling in today's economic climate.

You see, XUII's predecessors and competition don't understand how vital this is to all parties involved, and because they don't grasp the concept, they don't offer the people that really move the music touring business a way to make money...

XUII is the **ONLY** company that offers revenue sharing with content producers – they allow these REAL

**“...the music industry has adapted to the Internet world, learned how to meet the needs of consumers and monetized the digital marketplace.”**

**Frances Moore**  
Chief Executive Officer  
International Federation  
of the Phonographic  
Industry

movers and shakers a way to make money from the pay-per-views or the choice to get their own sponsors or advertisers for their live broadcast.

This is the best kind of incentive for these producers to urge more acts to sign on with XUII...

And it's more proof that XUII is doing everything it can to build itself into the premier, digital concert gateway in the world – and giving investors just one more reason to get in on a solid company that's looking to future profits instead of just fast money.

By implementing solid such a solid business plan, it could just be a matter of months till Xumanii becomes the “go to” digital music site on the entire internet...

And by doing so, XUII may just be offering investors who act today ANOTHER way to profit big – and FAST...

And their patents may just be the key!

## **Don't Wait! XUII Could Be The Best Stock You Buy This DECADE—But Only If You Get In NOW!**

As investors, we know it's important to get in on a sure-fire winner while the stock is at it's cheapest...

It's the only way to ensure we record the biggest profits!

Well, I can tell you this – right now may be the lowest we see shares in XUII – EVER!

It may not be long till shares are selling 10, 15, 20 times higher than where we can buy them right now. Remember, XUII is doing things that no other competitor is doing in the live, HD digital concert streaming...

The put control in the users hands, allowing them to be the “director” of their own concert experience by using patent-pending technology – and they're signing some of the biggest acts in music today!

They've put so many of the right pieces in play that they could very well become one of the biggest buyout targets this year – and maybe the BIGGEST their industry has ever seen!

XUII could be about to put a LOT of money in the pockets of those with the foresight to act now...

Don't wait on XUII! **It could be the best stock you buy this year!**
