"With American Oil BOOMING —
I see BRPC as a
STRONG Buy opportunity."

— David Moore

\$10 BILLION WINDFALL!

How *This* Appalachian Oil Discovery May
Have Just Put The US Ahead Of Saudi Arabia And
Russia As The World's Top Energy Producer!

Black River Petroleum (BRPC) has just secured the rights to a huge chunk of oil rich acreage in Tennessee that reknowned geology firm, MHA Petroleum Consultants, has just confirmed could hold up to **115 Million barrels of black gold!**

**Investors Who Act Fast On BRPC Could
Grab HUGE 5,033% Profits!**

Dear Fellow Profit Seeker:

The company you're about to hear about is changing the energy landscape as we know it...

Their potential 115 Million-barrel oil discovery in the famous Trenton-Black River Formation in Tennessee may have been the strike the US needed to push to the

front of the line of crude oil producing countries.

Up till now, we've been number 3 behind Saudi Arabia (#2) and Russia (#1)...

Buying BRPC under \$5 means you could profit \$20 on every share!

But this massive find in the Appalachians may be just what we needed to not only be the world's top producer of oil – but it may be the key to America's energy independence from the rest of the world.

Now Is The Time To Lock In Your Profits! Don't WAIT!!

Company Name: 

No longer will we have to buy oil from Saudi Arabia,

Brazil, Venezuela, etc. – we may now have enough oil – that foreign sales of crude may become a thing of the past.

That is how important Black River’s property is – and this potential \$10 Billion windfall could be about to make early investors 5,033% richer... and that’s on the conservative side!

Because in the end, we could be eyeing 22,053% gains before all is said and done – that means every \$2,000 invested could yield a knee-bending \$441,060 return! Almost half a Million dollars from just a modest \$2K investment makes BRPC one of the most incredible profit plays I’ve ever seen! But we’ll get to that later, first, I wanted to introduce myself...

Black River Petroleum Corp.

Ticker Symbol: BRPC

Holding: Up to \$10 Billion in oil

Best Price: Under \$5

Long Term Potential: Over \$25

Why You Want Experience Behind The Wheel

When it comes to steering a company in the right direction, you want a management team led by an experienced captain behind the wheel..

Alexander Stanbury represents executive strengths across the fields of business development and consultation, corporate finance and the Natural Resources sector.

In 2011, Mr. Stanbury founded HASS Advisors Limited. Drawing on his experience and training, the

consultancy firm provides guidance and connections to business leaders regarding growth strategies, project finance, and raising capital through private equity firms and public placements.

Mr. Stanbury's prior corporate finance consultancy experience includes the origination and syndication of both private and public placements for companies within the Natural Resources sector for the boutique merchant bank Prosdociami Limited.

Earlier in his career, Mr. Stanbury served as Associate Director with the London-based investment bank Dawnay, Day Corporate Finance Limited, where he specialized in equity capital markets, M&A, and providing financial advisory services

including research, analysis and transaction structuring and execution.

Mr. Stanbury also gained hedge fund management experience through his time at the New York-based firm Lindemann Capital Partners LLP, and received training from the New York Institute of Finance.

His broad spectrum of achievements in business proves that he can parlay that success to BRPC.

And a solid hand behind the wheel is a huge piece of the pie we need to see this company reach its potential – Mr. Stanbury is that solid hand I believe will take BRPC to the next level.

All Of My Years of Experience Says That BRPC Could Be The One Stock We NEED To Buy In 2014

Hi, my name is David Moore, I am the editor of Rising Stock Advisor, and I’ve seen thousands of stocks come across my desk over the years.

I’ve built my reputation on my ability to sniff out those

Bloomberg Markets

“U.S. to Be Top Oil Producer

stocks that offer investors the biggest profits – and when I tell you that the **BRPC** has all the markings of some of my biggest winners ever – it’s almost an understatement.

They’re perfectly positioned to not only put themselves at the vanguard of the new American oil elite, but they they’ve got all the right pieces in play to ensure early investors could walk away with a fortune.

Why am I so sure about **BRPC**’s potential?

Because I’ve seen this exact same story play out before...

“Black River Petroleum looks like one of the most profitable oil picks I’ve ever seen.” David Moore, Editor, Rising Stock Advisor

Ultra Petroleum (UPL) Has Recently Made Investors Wealthy – Now It’s YOUR Turn!

Not many Jr. Resource companies can claim the type of success that Ultra Petroleum (UPL) has been able to reach...

Nor has another company brought so much attention to the potential of Appalachian oil reserves.

UPL first debuted in 2001, a small, \$1.65 stock that nobody really paid attention to.

However, slowly but surely, UPL began a steady climb as their wells started producing – and by mid-2004 – shares of UPL were holding steady at over \$20.

An incredible accomplishment for a tiny, domestic oil company that nobody had ever heard of before. That \$20 level seemed to be just what

“The U.S. will surpass Russia and Saudi Arabia as the

this stock needed to grab Wall Street's attention, as it wasn't long after this that shares REALLY started moving.

By the beginning of 2006, shares spiked to over \$68 – giving early investors an INCREDIBLE 4,025% profit! That means ever \$2,000 invested turned into a whopping \$80,500!!

If the story ended there, it would be perfect. Think about it, had you put \$10K in at \$1.65 – you'd have cashed out with \$402,5000 – a veritable fortune for such a modest investment.

But the story doesn't end there...

UPL didn't stop at \$68 – it kept climbing – all the way up to \$99.69!

That means every \$2K invested early turned into a whopping \$118,820 – every \$10K transformed into a massive \$594,100 windfall. If you had \$20k to put in – you'd have been a Millionaire!

All thanks to UPL's project in the Appalachians...

Can you see why I'm so excited for Black River Petroleum?

They're perfectly placed to follow in the footsteps of Ultra – and if they can reach those same heights, we're not looking at just a 5,941% gain...

No, if shares of **BRPC** follow Ultra's trajectory – we're looking at an unheard of 22,053% profit! Meaning a \$10K investment turns into \$2,205,300!!

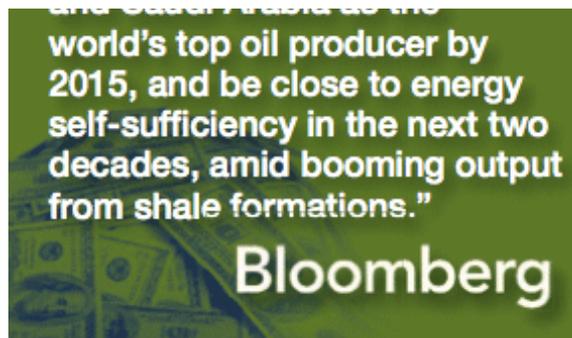

Yes, you read that right, that's TWO MILLION, TWO HUNDRED FIVE THOUSAND and THREE HUNDRED DOLLARS!!

And you're getting the chance to get in now, while shares may be as cheap as we EVER see them again!

- Remember, they're not only sitting on a potential \$10 BILLION oil fortune – they're sitting on a proven reserve that has turned people in millionaires before! And I'm not just talking about Ultra Petroleum...

Appalachian oil built one of the most famous fortunes America, or even the world, has ever known!

What Rockefeller and Ultra Petroleum Started – BRPC Finishes: The History Of Appalachian Oil Profits

Now Is The Time To Lock In Your Profits! Don't WAIT!!

Company Name: Black River Petroleum Corp. 

Ticker Symbol: **BRPC**

Holding: Up to \$10 Billion in oil

Best Price: Under \$5

Long Term Potential: Over \$25

Next Step: Act NOW!

Profit Point!

Why Appalachian Oil Could Mean Huge Profits For BRPC

These companies **KILLED** it in Appalachia!

- 1 Ultra Petroleum (UPL) debuted in January of 2001 at just \$1.65, by July of 2004, shares were over \$20!
- 2 Chesapeake Energy (CHK) debuted in February of 1993 at only \$1.12, by June of 1996,

When you hear the name of Rockefeller, what does it make you think of?

Old money? Huge, sprawling Estates? Industrial revolution?

For some, the name Rockefeller is synonymous with all these things and more, but we all know where and how John D. made a name for himself and a fortune for his family for generations to come...

Oil.

The original oil baron, Rockefeller started Standard Oil in 1870 with his brother and business partners and quickly become the most profitable oil refinery in the country.

Now, I know you're not here for a history lesson, but it

shares were over \$30!

- 3 Continental Resources (CLR) debuted in May of 2007 at \$14.65, by July of 2008 – shares were over \$80!
- 4 Denbury Resources (DNR) debuted in January of 1996 at \$2.54, by June of 2008, shares were over \$36!
- 5 Penn Virginia Corp (PVA) debuted in Mar of 1990 at \$6.12, by June of 2008, shares were over \$75

is important to know this because the same oil deposit that made the Rockefellers, Henry Flagler and Samuel Andrews rich... is the very same potential 115 Million barrel find that could be about to make investors in **BRPC** rich too!

Yes, the same Trenton-Black River Formation that helped build America into a powerhouse – is exactly where BRPC's Natchez Trace project is located!

You may be wondering what the significance is of this fact...

Well, it comes down to this: the Trenton-Black River Formation is a PROVEN producer. And has been for over 100 years! And the fact that there are still BILLIONS of dollars worth of oil in the reserve, is a testament to not only Rockefeller's vision – but BRPC's decision to base their operations over this potential \$10 Billion strike.

And how do we know that there could be up to \$10 Billion worth of oil just waiting to be extracted from the Natchez Trace project?

We're not taking the word of some weekend prospector here...

We're talking about a world-renowned geologist with over 50 years field experience in the exploration and development of mineral and oil discoveries all over the world.

So when he says that the Natchez Trace Formation potentially holds up to 300 Million barrels of oil (that \$10 Billion we've been discussing)...

You can take that to the bank.

Buying BRPC under \$5 means you could profit \$20 on every share!

"The potential for the Natchez Trace Prospect could be a \$10 billion windfall."

When I first read these geological facts on BRPC's website I knew we were going to be in for a wild ride.

I mean for an investor, there are few things that scream "proven winner" as loud as an expert research firm – especially one as highly regarded as MHA Petroleum Consultants'.

Reading the statistics (which you can find on **BRPC's** website, www.blackriverpetroleum.com) there are a few areas that really stick out.

Besides the oil potential of the Natchez Trace Prospect, the report talks about something else that should pique the interest of even the most seasoned investor.

"Crude prices will advance to \$128 a barrel by 2035 with a 16 percent increase in consumption"

What this tells us is so simple, some people may miss it

what this tells us is so simple, some people may miss it.

There's not a lot of competition for that potential 300 Million barrels of oil. In fact, while BRPC's Natchez Trace is surrounded by other Jr. Resource companies – there's nobody close enough to really matter to BRPC pulling every drop of oil out of their prospect.

This is huge.

Quadruple-Digit Profits You Don't Want To Miss!!

Why are so many fortunes built off the back of oil?

Simple...

Because it's worth so much. The entire world runs on oil – there isn't a continent where oil isn't a precious commodity – and that's why finding even a little bit can produce a profit windfall.

Take Black River... there's up to an estimated 115,000,000 barrels ready to be extracted from the ground and turned into American dollars. And we've talked about how much money investors stand to make on that 115,000,000 – but I wanted to let you know exactly what that means by taking a “worst case scenario” look.

Let's say that **BRPC** is only able to grab 20% of that 115,000,000 – a flat 23,000,000 barrels...

At today's prices of about \$100 a barrel, that 23,000,000 barrels is worth about \$2.3 Billion – but let's lower that \$100 price to a basement level of \$80 a barrel.

At \$80 a barrel – those 23 Million barrels are worth closer to \$1.84 Billion. That means this: In this “worst case scenario” look...

BRPC is worth \$26.25 per share!!

And you can get in now for just a FRACTION of that amount!

If you want the chance to make a **QUADRUPLE** digit return on your money – you should consider buying as many shares of **BRPC** as you can comfortably afford today!

And bigger than we imagine, as remember, that \$10 Billion in oil is just PART of what investors can expect to grab profits from, as there is also a HUGE potential of natural gas reserves as well...

And while other companies seem to be on the scent, only **BRPC** hit the bull's eye. For investors, this is just one more feather in this company's hat.

But there's more

but there's more.

There may be more oil and natural gas reserves NOT yet discovered.

Meaning there could be even more oil deeper down!

I've seen a lot of Jr. Resource companies in my time, but not many hold the type of profit potential that I see in BRPC. And remember...

One of their neighboring competitors, Ultra Petroleum, has already PROVED that area is primed for those profits as early investors in UPL made a KILLING because of Appalachian oil reserves!

And now it's our turn!

Investing In Your Future – Don't Let This Massive Profit Play Pass You By

There are very few times in our lives when we're presented with the opportunity to really change our financial circumstance with one, easy move.

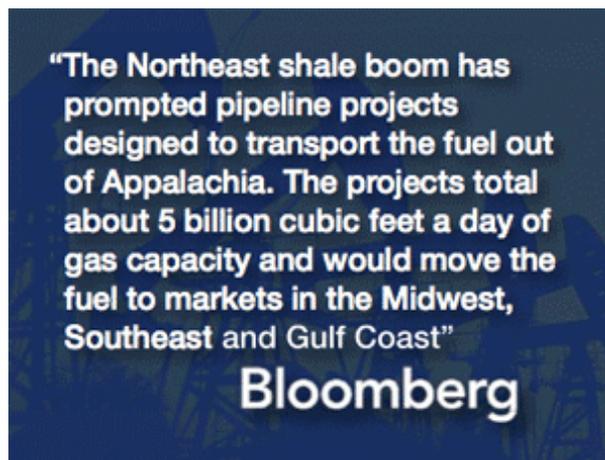

By getting into **BRPC** now, you're taking that first step into securing the future for you and your family – their upside potential is astronomical – because even if BPRC does just half of what I think it can do, we're still looking at quadruple-digit gain.

It's hard to miss with this company...

They're sitting on an oil discovery that could very well propel the US past Saudi Arabia and Russia as the world's top producer of crude oil – it's been predicted to happen in 2015 – but **BRPC** may have just stepped up that time table.

With up to \$10 Billion in oil underneath their Natchez Trace prospect in Tennessee – BPRC is offering investors like us an opportunity to profit huge!

Regardless of where the stock is priced now – even buying it under \$5 a share would be a steal compared to where this skyrocket could go...

\$20? \$68? \$99? It's all possible because it's happened before!

BRPC could very well be the one stock you buy this year that propels you into that upper echelon of investors. Those who truly make a killing in the markets...

And you're getting the chance before the rest of the mainstream investors even get a whisper of Black River Petroleum's ticker symbol!

All you have to do to take advantage now is dial up your local discount broker or log in to your online trading account and consider grabbing

Now Is The Time To Lock In Your Profits! Don't WAIT!!

shares of **BRPC** for yourself now...

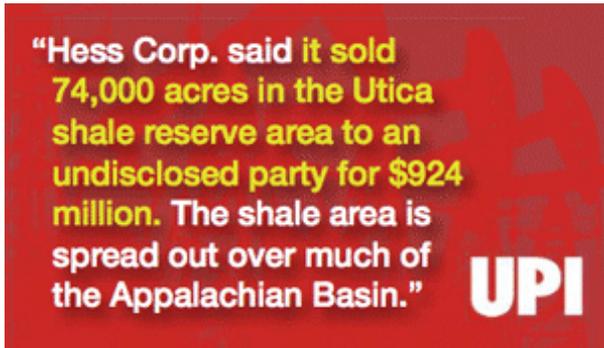

That way you lock in your chance at the biggest profit possible!

The Buyout: How These Events Trigger Massive Buying Frenzies – And BRPC Could Be Next!

What makes **BRPC** such an amazing investment opportunity – is the fact that as of right now, not many people know how big the profit potential is for this company and early investors...

Which means Wall Street hasn't caught wind of them yet – as they're hidden in plain sight. That's why ExxonMobil, BP, Marathon and more could be hovering like vultures on tiny **BRPC** – waiting for the opportune time to swoop in and buy them up – building us a fortune, practically overnight!

BRPC's massive holding, which covers 1,840 prime acres in Tennessee, is smack dab in the middle of America's heartland.

And because they've been, up till this very moment, invisible to Wall Street...

Mainstream investors are totally oblivious to this incredible oil deposit – and an even more lucrative area play! But that won't be the case for long...

Because as soon as MHA's report starts making the rounds, Tennessee's oil and gas zone could quickly become the most important domestic energy discovery in recent American History – **BRPC** could find themselves in the very enviable position of the next Junior buyout winner!

It's happened just a few years ago, when Junior, Brigham Exploration (BEXP) was bought by giant Statoil (STO) for \$36.50, when just a few years earlier BEXP was trading at \$2 – that's a 1,725% gain!

But even if they're not bought, they could still make us a fortune, because as we've already discussed, BRPC is eerily similar to previous star performer, Ultra Petroleum, which just a few short years ago made people like us wealthy by cashing in on a hidden oil deposit!

Investors who took advantage of advanced knowledge on Ultra Petroleum watched their shares shoot from just about \$1.65 all the way to \$99.69 – that's a gain of 5,941% – and **BRPC** is giving us the chance to do it again!

As I said earlier, I fully expect Black River Petroleum Corp. (**BRPC**) to be one of those special companies that creates true wealth!

And whether that success comes from **BRPC** making it

Now Is The Time To Lock In Your Profits! Don't WAIT!!

Company Name: Black River Petroleum Corp. 

Ticker Symbol: **BRPC**

Holding: Up to \$10 Billion in oil

Best Price: Under \$5

Long Term Potential: Over \$25

and whether that success comes from BRPC making it on their own steam, or whether they're bought out by a major or local competitor...

Next Step: Act NOW!

BRPC is the smart choice for any investor!

If A Major Buys Black River Petroleum – It's You That Would Reap The Profits!

Buying BRPC under \$5 means you could profit \$20 on every share!

There is a huge perk to **BRPC** claiming property that giant oil companies like ExxonMobil, BP, Marathon and more have missed the chance at...

And it's the fact that they're instantly on the radar of these petroleum powerhouses as soon as MHA's report gets published.

The question is: which one of these companies will strike on **BRPC** first?

We've already talked about how lucrative area plays like Tennessee's can be – instantly sending shares up at least 5,000% or more – but let's talk scenarios...

Let's say that BRPC's next wells produce real gushers – bringing up thousands of barrel of oil per day – who do you think is going to hear about this news first?

Sure, the local companies like the massively successful Chesapeake Energy (CHK) or the almost \$100-per-share EQT Corp (EQT) may get whispers from the area's roughnecks...

But after that, how fast do you think word will spread to the majors of the world?

I'll tell you, it'll spread like wild fire...

And it won't take long till the management of ExxonMobil, BP or Marathon to hear about it – and I'm betting it wouldn't be long after that till one of these giant companies decides they want BRPC for themselves.

How long do you think it'll take? A week? Two? A month?

Buyout Potential!!

It really doesn't matter...

What matters is BRPC is not alone in Appalachia, and with the amount of competitors surrounding their property, it would just be a matter of time till one of these companies makes an offer – ***potentially setting off a bidding war that could immediately send shares of BRPC through the roof!***

It's not an unreal scenario... the oil landscape is littered with such stories, but if it does happen, we have the very real chance at becoming Millionaires – literally overnight!

But you have to be there now if you expect to benefit. Don't sit this one out! Consider grabbing shares of BRPC today.

Remember - Black River Petroleum is SURROUNDED By Majors!

You've Seen The Proof – It's Up To You To Decide To Pull The Trigger

As somebody who makes their living researching stocks, it's my job to present you with the facts as to why a company could and should blossom into a winner that builds fortunes for those who jump on board during the early stages of their development...

It's how I've built my reputation into one of the top analysts in my field.

In order for me to continue to do what I love doing, I have to produce winners for my readers.

When BRPC came across my desk, it didn't take much research to realize that I potentially had one of the biggest winners I've ever had on my hands.

This company has all the right pieces in play to make those who act now richer than they imagined just one stock could...

Remember, renowned geology research firm, MHA Petroleum Consultants' statistics on BRPC's Natchez Trace Prospect in Tennessee has the potential to hold up to 115 Million barrels of oil...

Or a cool \$10 Billion dollars worth of crude!

For investors who get in now, BRPC could return them gains of around 5,941% – meaning every \$2K invested would turn into \$118,820!!

But if these shares follow in Ultra Petroleum's footsteps – we could be looking at astounding gains of 22,053% – ***meaning that every \$2,000 invested could yield a jaw-dropping \$441,060 return!***

To lock in your chance at these massive sized profits...

You have to act now! Don't wait!

Consider buying Black River Petroleum (**BRPC**) today!

Profits For All
