Home 3D Printing – The \$70 Billion Industry That Nobody Owns... YET!

*Shares In 3D Pioneer (**DPSM**) Could Soar To \$5 In 2014 As This Forward-Thinking Company Is Setting The Table To Become The First True Consumer 3D Printing Brand*

I'm Calling It My... “Top Tech Pick Of 2014”

This brand new and soon to be GIGANTIC market, with as much as \$70 Billion at stake, has yet to find its feet, but could be the biggest tech trend to hit since the internet.

What's truly amazing is the force that is driving today's real market excitement isn't just big business – it's the at-home applications this technology offers...

As it once was with commercial 3D printers, the anticipation is feverish for soaring stock prices because the fact is, the consumer market for this game-changing technology doesn't even really exist yet!

In a market this wide open – there hasn't been time for an industry leader to emerge – until now...

3D Pioneer Systems' (DPSM) has just started the NEW 3D revolution!

Their advanced system is virtually “plug and play”! Gone are the days of learning complex codes and inputting complicated instructions – this thing practically runs itself!

updating complicated instructions and using practically this tool:

In fact, it's probably easier than figuring out your "smart" TV or smartphone.

It's why I can see consumers flocking to 3D Pioneer (**DPSM**) in droves, because the combination of their amazing plug and play software, Appaloza, with their low-cost Wyatt printer – makes home 3D printing easier than ever before...

And it's this global shift toward consumer-based business that's the biggest reason we're seeing **DPSM** lead the race to deliver the best in home-use 3D printing.

This is one of the reasons I believe **DPSM** shares are screaming "bargain now..."

Because by leading the charge, **DPSM** could be lighting the fuse for the coming, \$70 Billion, 3D printing surge! There's never been a better time to move on an emerging technological trend...

But the rush is coming! Be there to profit when it does! Realize that **DPSM** is perfectly positioned to give you a chance to lock in your gains before Wall Street's mainstream investors even have a clue!

The "iTunes" of 3D Printing: The Real Secret Behind How DPSM Could Mint You A Fortune

3D Pioneers' (DPSM) trailblazing breakthrough system could send competitors back to the drawing board and create soaring stock market gains for ground-floor investors who make their move now while shares still trade at only around 50 cents!

Just Like Apple Did For Music – DPSM Is Doing For 3D Printing

With general consumers now being able to jump into this incredible trend – their \$70 Billion market could soon find itself expanding exponentially...

So if the company wants to survive, it needs something that sets it apart and puts in in the front of the pack - and **DPSM** has that in spades.

Taking a page out of **Apple's** playbook, 3D Pioneer Systems has created an easy-to-use, comprehensive hub for 3D printing plans – their breakthrough website,

Appaloza.com.

It's so incredible, I've taken to calling it the "*iTunes of 3D Printing*" – that's how big this site could very soon become. What it does is nothing short of amazing.

3D printing with Appaloza is as easy as buying a song on iTunes and then hitting the print button. That's pretty much it!

Unlike the old systems where you had to write files to SD cards and walk them to your printer, leave your laptop tied to your printer until your print was complete or reboot your computers into obscure maintenance modes to install unsigned drivers.

Thanks to **DPSM**'s Appalooza, it's now all as easy as just a few pushes of the button! What's more...

Now, you can log into Appaloza, anywhere in the world, and order your 3D Pioneer printer to make something...

Isn't it amazing where technology is taking us?

Appaloza really is a game changer...

3D Pioneer (**DPSM**) could soon be the first huge success in this brand new industry– they could find themselves so far ahead of their competitors – it'd be difficult to tell who's in second place!

That helps make **DPSM** the ideal opportunity for any investor.

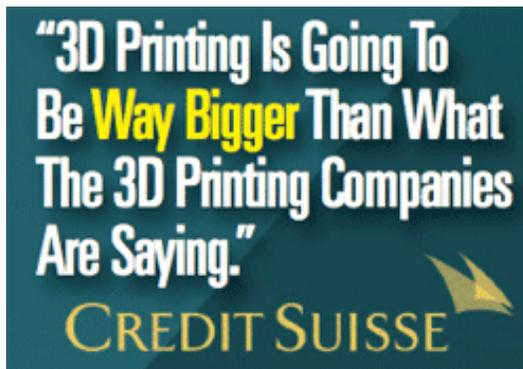

Conservative investors can now easily move into this solid new tech movement with **DPSM** – double, triple, or even QUADRUPLE returns could be waiting for those with the goal of locking in for the long term. A 50x profit isn't unreachable...

Imagine buying into Apple just days before they launched their ground breaking iPod/iTunes technology? A little over 5 years later, you'd have been sitting on a 2,063% jump!

But **DPSM** isn't just a long-term play...

Aggressive investors looking for fast profits can grab shares today – at

what could be the cheapest price we see them – and lock in their chance at

It Could Be The World's Most Valuable

10X profits by the end of summer if this unknown company quickly becomes 3D printing's first "brand" name!

Either play is available to you because this is the start of the home 3D printing revolution – and you're among the very first to be told about it!

"That 3D Printed Gun? It's Just The Start!"

"How 3D Printing Is About To Radically Extend The Limits Of Human Performance"

Forbes

"3D Printing Could Make Customizable Lego A Reality."

Patent... You Can Move On This Now While Shares Are Still Below \$1

At the heart of this 3D printing for the masses is a patent-pending software called Appaloza – you've heard me mention it, but you might not understand what the patent might mean for early DPSM investors.

of 3D designs. If any other company wants to copy this innovation – they're going to have to take a different

direction – or pay through the nose!

This puts DPSM ahead of the pack as the ONLY owners of a vast and comprehensive library of 3D designs that users can now get at the click of a button!

Being the "only game in town" is a huge advantage for a young company like DPSM...

And just one more reason why I see shares going north of \$5 in 2014...

Developed by Mark Flores Martin, 3D Pioneer's chief technology officer, Appaloza is a cloud-based platform that allows users to manage a 3D printer from anywhere with Internet access.

But the patent on this technology could be worth 10 or 20 times more than what DPSM is trading for right now.

Remember, by becoming the "iTunes of 3D Printing", Appaloza could soon become the most sought after online platform to hit the market since the dotcom era.

Owning the patent ensures that only 3D Pioneer are the only ones that can control their extensive library

Lock In Your Profits NOW! Important Key Facts!

Forbes Is Saying 3D Printing Will Have

"A Radical Impact On Every Industry"
**Making Right Now The Best Time To Get
 In On This Budding New Technology...**

And Makes DPSM Your Top Tech Play Of 2014!
And It's Already On Target For 10X Gains!

**The 21st Century's Hottest Tech Craze Could Find This Under \$1
 Stock Hurtling Past \$5 in 2014... Then As High As \$28 by 2015**

The 3D Printing Gold Rush Is Beginning NOW!

As we've already discussed – the coming \$70 Billion market is virtually unconquered territory. And since 3D printing is still in its infancy, it's quickly becoming the fastest expanding tech sector in years!

This incredible technology is going to have a far-reaching impact that we've not begun to imagine. I believe Forbes is right – and we've only just begun to realize the possibilities for 3D printing.

Which tells me that while a \$70 Billion market is HUGE, it could very well be bigger – much BIGGER...

You see, with the emergence of easy, at home 3D printing – many of the things that are bought from manufacturers in China, India or anywhere else in the world – can now be created for pennies on the dollar at your house!

No longer will individuals or small businesses have to buy in bulk, pay heavy shipping costs or wait weeks (or sometimes months!) for their orders.

**With 3D Pioneer Systems – they simply point, click
 and print what they need.**

The industries this development impacts are too numerous to list – but I'm sure you can see how this can affect even some of the biggest market sectors. Anybody from car enthusiasts to artists – from small farmers to weapons manufacturers – can now create what they need...

And can do it instantly.

It's not hard to imagine a world in which home 3D printing puts a HUGE dent into manufacturing's

business – maybe even bankrupting some companies all together.

It's not going to happen overnight – but the faster this tech trend spreads (and it's spreading fast!) – the closer early investors in **DPSM** get to those potential 10X gains!

And right now, it appears that expectations for the fledgling consumer 3D printing market are soaring toward outrageous levels – but as I've said, I believe we're just at the very beginning of this tale.

Sound like a pipe dream? It's not...

As we've seen this hype cycle play out before. The Internet was the technology trigger for the rise of the dot-com stocks in the 90s – and we've all heard about the fortunes that were made then...

People who were left behind in that one are still saying, "If only I pulled the trigger..."

10X Your Money A Conservative Estimate!? **Don't Let 3D Pioneer Slip Through Your Fingers!**

You've heard me forecast a potential 10X return on **DPSM** – and you've probably wondered how I came up with such an incredible number...

Well, you have to look no further than one of **DPSM**'s contemporaries – a commercial 3D printing company that went bonkers...

Early investors in 3D Systems Corp (DDD), a provider of 3D printing design-to-manufacturing solutions the world over, found themselves on the ride of a lifetime when on Dec. 27, 2011 shares traded for \$9.60 on the Nasdaq. Then, just 24 short months later...

Shares had soared 10X higher to \$96.42!

The math is easy, isn't it?

An investor who put \$7,500 could have walked away 24 months later with \$75,000.

And I believe **DPSM** could take the same trajectory as this 3D forerunner – their corporate structure and business plan are

structure and business plans are so similar, it's uncanny. Strong leadership, a quality product and incredible breakthrough will go a long way in business...

But **DPSM**'s future could be even brighter!

You see, the story is even better for Stratasys Ltd (SSYS). Back in early 2009, this additive manufacturing company traded for a little as \$8.02. By Dec. 30, 2013 it has soared 16.5X to \$133.46.

Someone who moved into Stratasys with \$7,500 could have banked \$123,750.

Now... while these jumbo profits have come and gone. DDD and SSYS are commercial printers – and part of a mature market.

DPSM's market is only now beginning to take root and it doesn't seem like it's going to take long to see who's going to be sitting on the top branch – and who will still be looking for low-hanging fruit.

Imagine if **DPSM** becomes the “go to” printer of their industry...

As a **DPSM** investor, how would that affect your portfolio?

How would that affect YOUR wealth?

Early investors in **DPSM** stand to potentially make a fortune as their industry of consumer 3D printers follows suit and returns HUGE profits for those who were able to act early.

That's why I can't urge you enough to consider acting on **DPSM** today!

The proof is right in front of you!

3D Printing: The Innovation That Medical Science Has Been Waiting For!

Once thought science fiction – doctors are now designing and using printed limbs and organs to help patients live the lives they were meant to!

3D Printing: Saving and Changing Lives!

We've talked at length about how 3D printing will change the way we do business, but...

On a grander scale, 3D printing will continue to make huge headlines because this remarkable technology is rapidly penetrating the healthcare world!

It seems that every day a new, heart-warming story of a parent designing and printing a functional plastic limb for their child who lost a hand or foot in an accident or born with a birth defect...

But what aren't as prevalent are the stories of how it's helping our wounded warriors with custom printed arms and legs lost in bombings.

3D printing is also making personalized hip and knee replacements a snap as well as producing 90% of all hearing-aid shells made today.

And the technology is rapidly evolving and getting even more sophisticated... that physical mechanics is just the tip of the iceberg...

Printing Functioning Human Organs – Now Science FACT!

As I just said, the technological advances in the 3D printing are getting so sophisticated, that doctors and scientists are now able to design complex and detailed creations once thought impossible.

Cornell University researchers recently unveiled a replacement ear created using this technology and injections of living cells.

But as amazing and cutting-edge as creating a human ear sounds – what they're working on next blows this application out of the water.

Scientists are now creating living, operational organs

from this technology... Hearts, lungs and even livers have all been “printed” to resounding success! And it only looks like it’s these innovations are only going to get MORE advanced!

I have no doubt that we’ll see a future Nobel Prize winner crowned for their medical achievement – and it will all be thanks to 3D Printing...

Remember what Forbes said?

Think back a few minutes to what Forbes stated, that 3D Printing technology will have “*a radical impact on every industry*”?

If you thought the manufacturing benefits of this amazing tech breakthrough were big – with the addition of medical science – do you realize now that this revolution could ultimately touch every area of your life in a matter of months?

And the best part for investors is, *there could be a staggering amount of money to be made by making the right move at the right time on a brilliant young startup company – 3D Pioneer (DPSM).*

There Has Never Been A More Lucrative Time To Be Alive...

Fortunes made in the 21st could be hundreds of times larger than at any time in history

3D Printing Is Putting America Back On Top!

With **DPSM**, you’re witnessing the rebirth of American manufacturing – a world led by consumers, where jobs remain at home – where the Chinese buy

It Prints Guns!

3D Pioneer's Game

our goods!

3D Pioneer is set to lead a consumer manufacturing revolution! A revolution that is emerging today and quickly gaining momentum.

Separate the hype from reality and you'll find a new world where you, the consumer, can produce anything...

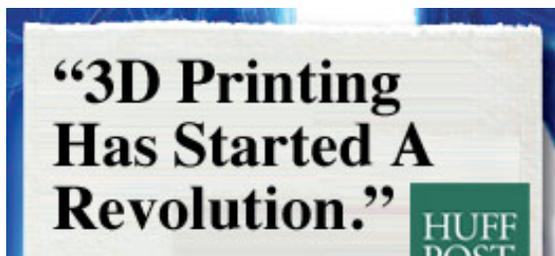

From firearms, to a new cellphone, to food and medicine – all in your home workshop or basement.

Literally, with a click of a button, you will have the ability to manufacture virtually whatever you might want or need – or you could manufacture for resale.

And it's all being made possible with the wonder that is 3D printing. Are you starting to get the picture?

Are you starting to see why 3D Printing is being called a marvel of modern technology?

If you want to be in this wide-open space, a space that nobody owns yet – then you have to be there NOW! **DPSM** is looking to be your best and most lucrative chance to get in on this global movement before every Tom, Dick and Harry are taking a piece of the profits.

3D Printing is Changing Breakthrough Touches All Segments Of Society

"Print" guns?!

Sounds insane, I know, but use a search engine and look up "3D printing guns" and you'll see stories from *NBC*, *Forbes*, *Barrons*, *The Washington Post*, *The Guardian* even the *Hollywood Reporter*.

Now, assume that there are 200,000 survivalists in the United States alone with their goal being to live off the grid away from the government's prying eyes...

Moreover, let's add in another 800,000 people, in the U.S. alone, who don't believe laws apply to them or are afraid President Obama or Hillary Clinton are going to collect their guns.

My point is, assume one million people in the U.S. alone fear the government will take their guns.

✓ **When these survivalists and gun enthusiasts discover that they can be anywhere in the world and use plug and play Appaloza to order their Wyatt printer to make a gun in private...**

It's easy to imagine immediate soaring sales for 3D Pioneer printers.

Now add in the gun enthusiasts in England, Scotland, Ireland Germany, South Korea and China where ultra-strict laws deny them the right to own handguns – you can see how this market can explode overnight!

And this is just ONE small segment of the 3D printing world...

The deeper we get – the bigger the picture is – the possibilities are as endless as the human imagination...

Making DPSM one of the purest profit plays I have ever come across in my years as a stock analyst.

Quadruple-digit profits could already be yours! Act today! Consider adding **DPSM** to your growing portfolio.

As the Wyatt quickly becomes the world's most sought after in home 3D printer – I'm Forecasting DPSM Shares Could Soar To At Least \$5 in 2014! Lock in your chance at 10X Profits Today!

A Two Piece Profit Puzzle

By now, you know all about how 3D Pioneer took a cue from Apple and created the world's most comprehensive and easy-to-use 3D printing hub site, Appaloza.com...

But what we haven't discussed yet is **DPSM**'s incredible new, innovative and streamlined 3D printer unit, The Wyatt.

When the management team decided to throw their hat into the 3D printing ring, one thing they knew for sure, was that they wanted their printer to be the best and highest functioning home 3D printer on the market.

Choosing not to sacrifice quality for quantity – the Wyatt is a truly a marvel to behold – and may also be the fastest gun in the west.

It boasts a full color LCD touch screen and a built-in camera for pure and seamless integration with the breakthrough Appaloza Cloud Platform.

In other words, because it's built-in webserver, the Wyatt communicates with Appaloza in the same language. While other brands' printer units will work fine with Appaloza – because they were literally built for each other – the Wyatt takes functionality to the next level.

You see, while Appaloza monitors the print jobs, checking for problems in order to make sure the printing instructions are crystal clear...

The Wyatt offers an unrivalled ability to monitor

**"The Most Rapid Expansion
Of 3D Printing Will Come
From Personal Use."**

CREDIT SUISSE 

**"The Next Thing in Medicine?
3D Printed Bones."**

progress and the power to intervene and control printing remotely, even from your laptop, tablet or even your smartphone.

If your printer runs out of filament, the printer will automatically pause and it can send you an email to let you know.

It can even email you a photo of your latest creation once a print is completed.

The perfect marriage of hardware and software – and only 3D Pioneer Systems is offering this. A two-piece 3D printing puzzle solved in one easy purchase.

It makes them the easy choice for consumers...

And makes **DPSM** an easy choice for investors to take advantage of this coming \$70 billion industry that nobody controls yet! But **DPSM** could soon find themselves in the driver's seat.

And you are among a select few people who are learning about an industry that has profit potential written all over it. With **QUADRUPLE-DIGIT** profits to gain...

With a \$70 Billion industry up for grabs...

The choice is simple. 3D Pioneer Systems (**DPSM**).

Consider making a strategic move into this potential skyrocket before it leaves the stratosphere – act on **DPSM** today!

Next Step.....	Act NOW!

NASA's Loss Is 3D Pioneer's Gain!
One Of The Innovative Minds Behind The Future Of Home 3D Printing.

	Mr. Flores Martin, 3D Pioneer's CTO and VP of Application	To say he's been called DPSM's "wunderkind" would be a bit of an understatement...
--	---	--

Development, doesn't fit the typical profile of corporate officers...

A graduate of STC Malta,

where he earned a degree in Computer Science, Mr. Martin has been on the cutting edge of internet security as well as web and mobile start-ups for the past decade.

Working as a White Hat or "Ethical Hacker" and aiding Acunetix clients, a web application security company, Mr. Martin worked with a veritable "who's who" list of major clients...

Helping companies like NASA, Disney, Homeland Security and the NY Attorney General's office in identifying problems related to security, assisting their development team in resolving issues and providing information to assist with criminal cases.

Mr. Martin has used his extensive experience to position 3D Pioneer Systems at the forefront of their soon to be \$70 Billion industry...

DPSM's tech "security blanket", Mr. Martin is also a Certified Maya Professional and has lectured and instructed courses on Maya and Game Design and Development .

Something that comes in handy, as he is also currently a Director at Pencil Pig Ltd, a mobile gaming app company – and a skill that DPSM is taking advantage of, as they've just developed their OWN mobile game!

For investors in DPSM – this is just ANOTHER revenue stream to put profits in their pocket!

And just another reason why I see DPSM soaring – because under Mr. Martin's vigilant gaze – it's hard to see DPSM being anything than a huge success!

"3D Pioneer Is The Best Ground-Floor Technology Stock I have Seen In Years – It's Revenue Potential Is Enormous!"

3D printing is the Third Industrial Revolution because it will forever change manufacturing.

The revolution may have started in the \$100 billion global toy market – as parts to radio controlled vehicles, toy trains and more are already floating out there on the internet...

But 3D printing at home is *only* limited by imagination.

Dishwasher broken?

Go online get plans for the new part and print it. Be the hero of the house by being able to repair things for a fraction of the cost of having to buy replacement parts.

Why not 3D print your own model rocket that goes thousands of feet into the air – the plans are already on

the internet for free!

How about gold jewelry – it's being done now!

Would you want to bet against Lego selling plans for 3D printed pieces and accessories?

Me neither.

What about tennis racquets, shoes, belts, golf tees, pens, screwdrivers, hammers, knives, and yes, even functional crescent wrenches?

Yes! We've yet to scratch the surface of the possibilities that 3D printing can offer.... This industry is just now getting moving – and it looks like that \$70 Billion price tag analysts have put on it may be grossly understated.

The sky is, quite literally, the limit.

And **DPSM** is giving you a chance to profit from this coming revolution NOW! Don't wait!

The Potential To Dominate This Brand New Industry Means Its Investors In DPSM That Are The REAL Winners!

3D Pioneer Systems (DPSM) owns patent-pending software that's ready NOW!

That means you could have very little time left to grab a ground floor position in **DPSM**.

If you received this report early enough, you can load up on **DPSM** today at under \$1.00... but I wouldn't hesitate making my move even at \$2.00.

With little to almost NO competition for its 21st Century software, Appaloza, I'm confident that shares in 3D Pioneer could fly past \$5 before year's end!

3D Pioneer is set to drive down the costs of 3D printers, because its Appaloza software makes it easy to print.

So, it's a real possibility that within the next two years consumers all over the world could have a Wyatt printer in their homes.

We've seen items such as 3D-printed iPhone docks and bicycle clips, iPhone cases and stands, violins, pottery and even robots and robotic hands ...

But the craziest uses have yet to be explored.

That's why I agree with *New York Times* when they reported that "3-D Printing Spurring a Manufacturing Revolution" – we are at the very start of an industry that can change the world...

Much like the car, the television and the internet forever transformed our way of life – 3D printing has the same transformative power!

Best Buy.....Under \$1
 Long Term Potential\$10
 Next Step.....**Act NOW!**

That's why I'm calling it now...

DPSM could go down as my most prolific tech pick in history!

With the power to give us a fast, 10 fold return, it's hard for **DPSM** to be anything but a winner!

TOP 10 Reasons Behind Why 3D Pioneer Systems (DPSM) Is On Track To Be One Of The 2014's Best Stock Market Success Stories!

1. New To Stock Market...

DPSM could explode right out of the gate, possibly doubling the ground-floor price of around \$0.50 within a week, with potential to soar to \$5 this year.

2. Mega Trend...

There's NO question: consumer 3D Printing rapidly becoming a \$70 billion industry and **DPSM** could soon own a huge chunk of this wide-open space! The only question is "how much"?

3. Brand New Industry...

Consumer 3D printing is a brand new market sector. No one owns it yet. It's why 3D Pioneer's breakthrough software could dominate the industry for the next decade or longer! Making them the perfect company to bet on NOW!

4. Breakthrough Technology...

3D Pioneer's cloud-based Appaloza software is a patent-pending breakthrough of staggering proportions. It is the first plug-and-play, point-and-click, 3D printing software EVER.

5. The Perfect Management Team...

You know that 3D Pioneer is led by a cutting-edge and experienced team when U.S. Homeland Security, NASA and The New York State Attorney General trusts **DPSM's** chief technology officer with their security. (view their profiles at www.3d-pioneer.com)

6. Wave Of Future...

Experts agree – 3D printing could rapidly make most of today's indispensable manufacturing technologies obsolete. It puts the power BACK in the consumers hand – and nobody does it better

than DPŠM!

7. Lightning Strikes...

Startup tech companies are great moneymakers. Lightning strikes and scores of investors have made 600%, 800%, even 1,200% to 1,400% on young tech companies like 3D Pioneer Systems (DPSM).

8. World's Most Valuable Patent...

You are one of the very first to learn that 3D Pioneer could control one of the world's most valuable patents, as it ensure that **DPSM** is the "only game in town" with their patent-pending Appaloza software.

9. Apple, IBM, Microsoft and now 3D Pioneer?

Imagine how wealthy you could be today if you got into Apple, IBM or Microsoft at their earliest price. 3D Pioneer Systems holds this same kind of wealth-transformative potential!

10. Turn Spare Change Into A Small Fortune...

Getting in at the ground floor with 3D Pioneer Systems (**DPSM**) mean gaining an edge that could multiply your money 10-fold this year... and maybe up to 20 fold in 2015!

3D Pioneer is an easy "must own" call for the well informed. Even the most seasoned and skeptical speculator can see the immense profit potential that **DPSM is offering us... Don't wait! Do your research and consider loading up on as many shares as you can comfortably afford TODAY!**

Future Money Trends

3D Pioneer System (DPSM) Looks Set For Soaring Sales... Its Growth Potential Is Enormous... And... It's At Your Fingertips Now!

There's little doubt that 3D printing will soon disrupt dozens of different products, applications, and industries.

Perhaps once in a generation a company and its products come along and actually change our way of life.

Forty years ago, it was IBM. Twenty years

I am the very first analyst to look at 3D Pioneer Systems... that makes you one of the first investors to learn of it...

When Wall Street discovers its multi-billion dollar potential, other smart analysts could agree with me and place a long-term forward value on DPSM shares in the \$28 range as they stake

ago, Microsoft. And during the last decade, it was Apple.

Early investors in these companies did not become millionaires. They became billionaires. And even investors who took a very small stake had their financial lives completely transformed.

Now history is repeating itself.

Billions of dollars are riding the one breakthrough that could change the face of 3D printing – and DPSM is ready to grab those profits NOW!

DPSM Looks To Be Set To Claim A Huge Slice Of The World's Newest Market...And You Can Buy It Now For Under \$1

There is no question that money like that flows to people who invest in trailblazing companies.

their claim to this enormous, untapped market!

Short-term, look for \$5 this year...

I urge you to consider acting now while this trailblazing startup company is still at what I think is its ground-floor price range... under \$1

Please act today so you won't miss out on the 3D PRINTING REVOLUTION.

Consider buying *3D Pioneer Systems (DPSM)* at the market as soon as you are possibly able.

Thank you for your time today.

Yours for greater profits,

Kenneth Ameduri
