

“With a coming gold surge — I see WIIM as a **STRONG Buy opportunity.**”  
– Shawn Roberts  
Spring 2014

“The price of gold and silver will both hit **new highs in 2014!**”

# By Getting Into WIIM Today, You Can Lock In Your Spot to Profit From Gold’s Coming 67% Price SURGE!

Gold investor and strategist Eric Sprott says, “The price of gold goes north of \$2,000” in 2014. If he’s right, early investors in **Mining Minerals of Mexico, Corp. (WIIM)** could walk away with a fortune!

← Every \$2,000 could transform into a **\$68,300 windfall!**

Greetings,

2013 was a year that most gold investors would like to forget...

After a bull run that lasted nearly a decade, we watched as gold sank 27%, dropping to a basement price of \$1,200 an ounce. This drop prompted many experts to predict that the gold rally was over.

However, as we've recently seen with gold's 10.4% surge so far this year – those experts find themselves eating their words...

Much of gold's unexpected rise this year can be attributed to not only strong demand, but also geopolitical events taking place in both the Pacific Ocean and Crimea.

Russia sending troops into Crimea appears to be slowly increasing its stranglehold on the strategically located peninsula. China and Japan are locked in a standoff over islands...

These tensions could be the catalyst to a coming gold surge...

**WIIM: Gearing Up For Gold's Next Bull Run**

**Company Name:** Mining Minerals of Mexico, Corp. 

**Ticker Symbol:** **WIIM**

**Potential:** HUGE

**Profit Window:** below \$2

**Next Step:** Act NOW!

In fact, Bloomberg recently reported that hedge funds increased the bullish gold wagers to the highest in 14 months! This is why getting into gold now may be the best thing for your financial future.

With gold making just now starting to surge – analysts and investors “in the know” have been searching for the next gold stock that’s ready to ride the wave...

And I believe that Mining Minerals of Mexico (WIIM) is ready to be gold’s next big break out company.

This company has all the right pieces in play in a proven, gold-producing region of Mexico that has already made some people into certified millionaires.

But before we get into the specifics of the size of the profits we could soon pocket from WIIM, I wanted to introduce myself...

## **Gold's Comeback Signs Are EVERYWHERE – But Only If You Know Where To Look**

My name is Shawn Roberts, and as the editor of M3 Profit Accelerator, I have to make keeping a finger on the world's financial pulse my top priority if I expect to make a living...

In 2012, I could see the writing on the wall for a gold pull back – the signs in both the financial and geopolitical worlds were unmistakable – and we watched as gold dropped over 25% in 2013.

And it was because of that drop that I knew that gold couldn't stay down for long – as contrarian thinking tells us – if everybody's selling, we should be buying. So I set my sites on a few gold plays that I thought were close to breaking out with coming gold surge.

Everything about WIIM screams “golden ticket” – meaning that while shares may be cheap now, odds are, they won't stay that low for long. That's why I knew I had to bring them to your attention today...

As there may not be a better time or way to get back into gold than NOW than with WIIM.

Chinese demand for gold  
is “unstoppable”

**Gold In Mexico Is HOT! Major Mining**

# Companies Can't Get Enough!

How do we know that the Mexican mining industry is strong?

Easy...

When majors like Barrick, Compa and Freeport-McMoRan start looking at properties and putting down stakes – it's pretty evident that they've found something worth spending their time and effort on.

It lets us know that WIIM was smart to secure their claims when they did. It puts them in the company of giants – and means that this undiscovered company could well be on its way to stock superstardom.

Can they be the next Barrick?

It's entirely possible...

I mean if you look at Barrick's history – it's hard not to see the similarities between this titan of the gold mining industry – and our discovery, WIIM.

Like Barrick, WIIM is starting small – shares debuting at less than a dollar – but also like Barrick, WIIM has made smart, strategic moves that could set them (and early investors) up for a lifetime of profits.

The land they've laid claim to has already produced 18,000 tons of ore that is ready to be milled into gold composite – and the success they get from just this first venture could finance any possible acquisitions in the area.

Following in Barrick's footsteps is smart...

**WIIM: Gearing Up For Gold's Next Bull Run**

**Company Name:** Mining Minerals of Mexico, Corp. 

**Ticker Symbol:** **WIIM**

**Potential:** HUGE

**Profit Window:** below \$2

**Next Step:** Act NOW!

**Bloomberg Markets**

**GOING SOLO**

**"Bull market in gold has a long way to run."**

**Bloomberg**

**Located in a Prolific Mining District**

And it could lead to an unbelievable fortune for investors who act now. Early investors in Barrick could tell you how important it is to get in on a skyrocket while it's still grounded.

They'd tell you that by getting in at \$.59 may have been the smartest move they ever made! How that those same shares are now trading north of \$20 – and have gone as high as \$53.18 (that's an 8,913% return!)

Now, as impressive as that 8,900% gain is – the fact is – if they missed selling at that high – they're STILL sitting on a 3,415% profit! Meaning this...

Every \$5,000 invested is worth a cool \$170,750 fortune... A \$10K initial investment - \$341,500!!

▶▶▶ **"Keep reading to see how buying WIIM under 25 cents could profit you 3,415%!"** ◀◀◀

Can you see why I'm getting so excited about WIIM?

Because even if it does just a quarter of that kind of business, WIIM would probably still be one of the most profitable stocks you've ever bought!

But it could be worth even MORE...

## **Why 2013's Gold Pullback Is Offering Investors The Profit Opportunity Of A Lifetime**

While a 3,415% profit is amazing – you have to remember that's at current gold prices – prices that are just now starting to recover from 2013's gold tumble. But to understand where gold is going – you have to know where we just came from.

2012 was an incredible year for gold...

It all started with a price spike towards the end of 2011 – when we saw prices fly above \$1,900 an ounce – and then settle in at about the \$1,600 - \$1,800 range throughout the rest of the year.

There were many reasons for gold's surge...

The dollar was a weak, people were scared of a depression, an important and hard fought presidential election – the best way to describe the world's economic climate during 2012 would be “unsure”.

But that changed. People started to buy things again in 2013. Those who started saving after the crash of 2008 found themselves flush and began spending – and more importantly – investing again. The dollar started gaining back some of the ground it lost...

**WIIM: Gearing Up For Gold's Next Bull Run**

**Company Name:** Mining Minerals of Mexico, Corp. 

**Ticker Symbol:** **WIIM**

**Potential:** HUGE

**Profit Window:** below \$2

**Next Step:** Act NOW!

And because gold works inversely to the dollar, we saw bullion prices tumble all the way down to about \$1,200 an ounce mark. For 2013, it traded up to \$600

*gold and a \$200 number on silver in three to four years. We're in a period that has a lot of similarities to past periods when gold has done well."*

**- Rob McEwen, Kitco.com**

less than it did in 2012.

**But 2014 is a new year...**

Gold started climbing again – and we can thank Russia and China for this turn of events. Some say the American dollar is coming under attack. That Russia and China are manipulating the geopolitical atmosphere to cause havoc in the US.

And they may be right...

China is hoarding as much gold as they can get their hands on. Russia's invasion of Crimea has foreign

investors scared – and when uncertainty reigns – investors start looking for safe places to put their money.

Gold has historically been the safest port in financial storms – and 2014 is no different. As investors start scrambling to find way to protect their money – they're all going to be looking in the same direction...

Gold. WIIM is offering these investors a cheap and potentially HUGELY profitable avenue to take advantage of the coming gold price surge.

You could watch as your shares soar an incredible 3,415% by getting into WIIM – ahead of the pack – before Wall Street even has a clue! Realize that if this happens...

It means a meager, \$5,000 investment explodes to \$170,750! Don't wait! Act on WIIM today!

## **Why Gold Bugs And Profit Seekers Everywhere Should Keep An Eye On WIIM And Their Potential Profit Push**

With gold back on the good foot – people have been pouring through the Wall Street Journal, Bloomberg and Yahoo Finance looking for what they hope to be the next gold winner.

Enter *Mining Minerals of Mexico, Corp. (WIIM)* – this Jr. Resource company is quickly and quietly been making a name for itself through the exploration and production of gold and silver in Mexico.

Though still operating on a smaller scale, they recently shipped approximately 18,000 TONS of crushed ore to a processing center where it anticipates the processing of this ore into gold concentrate

**"Supply is going to continue to be the issue,**

the processing of this ore into gold concentrate...

Yes, you read that correctly, this Jr. Resource company has just produced 18,000 TONS of crushed ore from their properties in the Tecuala and Huajicori Mining Districts (lands that have proven gold and silver production dating back through the Spanish conquistadores)!

*we are going to be playing catch up football on the supply side.”*  
 – Owen Hegarty,  
 formerly of Rio Tinto

But this could be just the beginning...

As WIIM's recent growth spurt has them actively negotiating to acquire mining concessions; collaborating with local miners and large international corporations in order to acquire, develop, and produce from known and proven reserves of existing ore.

This is big...

As global supplies of the precious metal are dwindling – any new gold discoveries could end up being worth 10 times what they are now. China is buying up as many precious metals as they can get their hands on – and have the money to pay almost any price!

▶▶▶ **“Keep reading to see how buying WIIM under 25 cents could profit you 3,415%!”** ◀◀◀

Owen Hegarty, a former Rio Tinto executive has been quoted as saying that Chinese demand for gold is “unstoppable” and continues, “Supply is going to continue to be the issue, we are going to be playing catch up football on the supply side”.

If he's right, that makes right now the BEST time to get back into gold.

## **2014: A New Year For Gold – A New Year To Profit From A Potential Surge!**

The year 2013 may go down as the *annus horribilis* for gold, as I'm sure many gold investors would like to forget they watched prices drop 27%...

**WIIM: Gearing Up For  
Gold's Next Bull Run**

But that was last year. 2014 is already playing a different tune.

Remember, gold has already proved the pundits who

| <b>Profit Window:</b> below \$2                             |  |
| <b>Next Step:</b> Act NOW!                                  |  |

predicted that gold was “over” wrong, as so far this year we’ve watched as prices have already come charging back...

Rising an incredible 10.4% so far this year as emerging market economic weakness and other geopolitical issues make blue chip and bond investors nervous.

It seems those in the know are already getting back into gold – doing so now could lock in the type of profits gold bugs dream about.

Gold seems to be back on its way towards \$2,000 an ounce...

And there may be no better chance to lock in profits than with WIIM. They’re a small, undiscovered and BLOSSOMING company that has property over gold production-proven lands.

Don’t wait – gold is back in 2014 – and WIIM could be your key to profit!

However, there’s another money-making investment strategy that could make investors like you, incredibly rich – quite literally overnight...

And it could happen sooner rather than later!

## **Why WIIM Could Be One Of The Smartest Pre-Buyout Plays Of The Year**

The buyout...

Easily one of the quickest ways small, unknown company’s like WIIM make early investors rich, is by being bought out by bigger, more established mining companies who have the resources to snatch the company up for themselves.

It happens more often than most people realize, and the more gold that WIIM pulls out of the ground, the more attention they’ll get – and not just from investors...

We’re talking MAJOR gold mining operations...

When huge names like Barrick Gold, Compa, Freeport-McMoRan or others start circling WIIM – and you can almost certainly bet they will – DOUBLING your money would be just peanuts...

A buyout could send shares in WIIM through the roof, like it did for some of these other tiny unknowns who helped make early investors rich by being bought out by a major. Take a look at just a few of these winners.

- **Frontier Gold Inc. (FRG)** – tiny mining company bought for a staggering \$2.3 Billion by giant Newmont Mining (NEM)!
- **Northgate Minerals Corp (NGX)** –bought by AuRico Gold Inc (AUQ) for a game-changing \$1.3 Billion!
- **Ventana Gold Corp (VEN)**–bought by privately owned EBX Group Co Ltd for a cool \$1 Billion!

This list is just a few of the life-changing buyouts that have happened in WIIM's industry!

And I could see this happening for WIIM, as their ore-producing properties in Mexico is a bright buyout beacon – especially seeing that they could be sitting on the Central America's most prolific discovery of gold this century!!

That's why I can't urge you enough...

- 1. Geology has created a miners dream!** Discoveries of highly concentrated deposits have led a host of exploration companies to increase investments and land purchases In Mexico. These high-grade discoveries include an underground deposit the size of a high-rise building in the mountains of Guerrero—a strike nearly a thousand feet deep and 500 feet wide that mining companies

believe to be one of the most highly concentrated discoveries in Mexico in the last 50 years.

**2. Doing business is EASY!** NAFTA is a HUGE reason why Mexico is a politically stable region for mineral exploration and mining. Its mining laws allow foreign firms to reap as much of the profits from their investments as possible. Mexico also allows foreign investors *full ownership* over their operation and the Mexican government the ability to tax them under local law. This creates a sizable tax windfall for the government.

**3. Majors Are Just Now Moving In!** Active exploration and mining companies in the area include some of the giants, like Vancouver-based Goldcorp (TSE:G; NYSE:GG) – as well as other huge names like Oro Gold (CVE: OGR), Canasil Resources (CVE: CLZ) and Piedmont Gold Corp (CVE: PZE).

**4. The Timing is PERFECT!** Silver has long been the cash cow of Mexico's mining industry, but last year the country joined the top 10 gold producers, mining more than 86 metric tons of the yellow metal, three times what it produced 10 years ago and more than other heavyweights in the region like Chile and Argentina.

**5. It's CHEAP!!** Low operating costs is one of the BIG reasons Majors and Jrs alike are pursuing mining in the country – such are the vast reserves

waiting to be exploited. Open pit mining is the best way for companies to cut these costs – and because the gold is so plentiful – it's also the best way to extract the yellow metal from the ground!

Don't sit back and watch to see how WIIM does. Do yourself a favor and consider taking action today – call your broker, login to your online trading account NOW!

You could be doing more than ensuring you double your money...

You could be locking in your spot on the bottom floor of what could be the biggest buyout play of the entire year!

**Remember – When The Price Of Gold EXPLODES –  
Shares In WIIM Could Soar – Transforming Early  
Investors Who Act NOW Into Millionaires!**

Check the Wall Street Journal and it's easy to see, gold's comeback is setting a pace unlike any we've seen in recent history.

Like we've already talked about, gold's appreciation is due to economic uncertainty, as well as the potential and deliberate devaluation of the American dollar...

Debt is on the rise everywhere – economies are growing at a snail's pace, if not faltering altogether – including that of the once thought untouchable, China. Which may be why they're choosing to hoard as much gold as they can get their hands on.

And just like any other time in history, when currency falters, precious metals flourish, and 2014 is no different.

▶▶▶ **"Keep reading to see how buying WIIM under 25 cents could profit you 3,415%!"** ◀◀◀

Gold could soon find itself hitting all-time highs again, meaning that once predicted price range of \$3,000 - \$5,000 per ounce that Kitco claimed – might not be that far off!

But at those prices, regular investors like us would find difficulty finding the means to buy enough physical gold to protect our wealth...

But that's where WIIM comes in...

**WIIM: Gearing Up For  
Gold's Next Bull Run**

Company Name:  
Minina Minerals

Because for just a fraction of the price of an ounce of gold, you can protect your wealth by buying shares in mining company that produces gold!

You might want to call your broker or login to your online trading account now and consider buying Mining Minerals of Mexico (WIIM)...

It could be the smartest move you make for your financial future.

## **If You Want To Lock In Your Chance At HUGE Gains – Here's What You Need To Know**

I really don't need to say this, but I will anyway...

No one has ever made a buck off any mining stock by sitting on the sidelines.

People who got in early on Barrick had the chance to walk away rich, possibly as Millionaires, and I have every reason to believe we could easily see the same thing happen with WIIM.

This undiscovered company is in a prime position to profit from an epic gold discovery that only THEY have access to!

The money we can make from this one stock is obscene. Remember, right now they could be sitting on over 18,000 tons of gold – gold they can extract for a pittance in cost – making WIIM an almost pure profit play!

And those profits would be shared among those bold enough to act decisively today!

By locking in your spot with WIIM, you're protecting your position to maybe double, triple or even **QUADRUPLE** your money from this stock's surge.

Are you ready to make more money on one trade than you would all year?

I know I am... And WIIM could hold the key to untold wealth!

Do yourself a favor and consider gabbing as many shares of WIIM as you can comfortably afford today.

You'll be glad you did!
