BUY MJMD**

MediJane

**Medicinal Marijuana Madness
Creating Insanely Happy Investors
Read the Full Report Below** 

**Stocks in the marijuana space are soaring
381%... 592%...768%...**

**MediJane Holdings (MJMD) could surge higher – the Company is
introducing breakthrough marijuana products for millions of
Americans**

Fellow Stock Investor,

It's no secret. Investors have been told. Legal marijuana is the hottest investment sector in America.

**David
Katz**

A Columbia University
alumnus, David

Bloomberg Businessweek recently reported:

"Every day, more and more people realize that cannabis will be legal and that it will be the next great American industry."

The Huffington Post reports: *"Marijuana Market Poised to Grow Faster Than Smartphones."*

The Huffington Post says it got its hands on a new and exhaustive report titled, "State of the Legal Marijuana Markets." One of its authors, Steve Berg, is quoted by The Huffington Post: *"Cannabis is one of the fastest-growing industries. Domestically, we weren't able to find any market that is growing as quickly."*

The U.S. national legal marijuana market value is now assessed at \$1.53 billion, which includes all states that have active, open sales of cannabis to people legally allowed to possess it under state laws. The national **market is projected to grow 68%** to \$2.57 billion by the end of 2014.

CNN Chief Medical Correspondent, Dr. Sanjay Gupta, Shocks Millions as He Declares,

"I Am Doubling Down on Medical Marijuana"

CNN Chief Medical Correspondent, Sunjay Gupta, is now letting America know that medical marijuana works wonders. The strongest, most powerful medical associations recognize the importance of cannabis as medicine, including the American Medical Association and the American Academy of Family Physicians.

Some of the strongest, most powerful personalities, like Academy-Award winner Whoopie Goldberg, are voicing their support, too... she's now writing a marijuana column

Katz majored in international finance with an emphasis on international trade and followed up by getting his CFA and moving to an investment analyst position at Morgan Stanley. While working there for over 15 years, 5 of the them spent in global offices in Southeast Asia, he specialized in emerging markets and commodities-based investing. David's variegated approach stems from his eclectic experience that can only come from seeing the investment world from many different angles. Having lived and worked through 3 major financial crises, he has been able to develop a unique eye for the early signs of inflection points in the markets instead of the bland trend following reports one often sees on the main stream media day in and day out. His investment strategy, the "CSM" method, was born through living through the thralls of the business cycle as it worked its way through diverse epicenters around the world, and is

appearing in The Denver Post.

That's why...

Marijuana is going mainstream fast and marijuana stocks are on fire!

A Gallup Poll conducted last year showed, FOR THE FIRST TIME IN HISTORY, that more than half of Americans believe **marijuana should be legal** for both medical and recreational use.

Marijuana stocks meanwhile are making investors rich.

- ✓ Medbox, Inc. (MDBX) develops, sells, and services automated, biometrically controlled dispensing and storage systems for medicine and merchandise applications and its share price went from \$2.50 to over \$21 since Aug. 3, 2012. That's a **768% rise** in less than 24 months!
- ✓ Fusion Pharm, Inc. (FSPM) manufactures and sells a line of cultivation containers under the PharmPod brand name in the United States and its share price has risen from \$.63 to \$3.03 since January 2, 2014. That's a **381% jump!**
- ✓ GW Pharmaceuticals plc (GWPH) is engaged in the research, development and commercialisation of cannabinoid prescription medicines to meet patient needs in a wide range of medical conditions and its stock went from \$8.98 on May 1, 2013 to \$62.12 on April 25, 2014. That's a **592% surge!**

As

America's favorite TV capitalist on "Shark Tank," **Kevin O'Leary, told CNBC, "Putting money into legalized marijuana is like getting an opportunity to get into alcohol after Prohibition just ended."**

He supported his stance, adding, "... *the margins are phenomenal.*" And the marijuana revolution is even bigger than the end of Prohibition.

The

based on three pillars: Cycles, Sentiment, and Money Flows. With CSM triangulation as the bedrock of his investment philosophy, David is able to spot especially disproportional investment opportunities by identifying probable tipping points, especially in small cap stocks with optimum risk/return ratios. This, together with position size, he considers to be the two most important factors in making money long term.

Marijuana Madness Hits America's Favorite Sport

NFL could be lifting its current ban on medical marijuana

Now that medical marijuana is getting closer and closer to becoming a mainstream method of pain relief, the NFL might allow

legalization of marijuana is igniting TWO REVOLUTIONS – recreational and medical! Unlike alcohol, marijuana is becoming mainstream medicine.

Thousands of years ago, before biblical times, people used marijuana as medicine. Cannabis is one of the 50 "fundamental" natural herbs in traditional Chinese Medicine... all natural, powerfully effective, and completely safe. Today, science proves that cannabis helps ease pain, reduce inflammation, and surprisingly enough, researchers from the Sackler Faculty of Medicine at Tel Aviv University found that a very low dose of the active ingredient in marijuana (THC) may protect brain cells before and after brain injury, and can also protect against the development of cardiac damage. The research was published in the journal Experimental Brain Research.

State Governments Love Marijuana

Actually, politicians love the money marijuana brings in by way of taxes and fees. They look at Colorado with envy.

Colorado is becoming a tourist destination – it's Amsterdam in America. Legal recreational sale of marijuana will begin this June in Washington State. And it makes sense that all the other state governments want the new revenues marijuana is bringing in.

According to The Colorado Department of Revenue, medical marijuana sales from July 1, 2012 to September 30, 2012 hit \$74,526,945... generating \$2,051,744 for the state by way of sales tax. From October 1, 2013 to December 31, 2013 (the day before recreational retail sales of marijuana become legal in the state), medical marijuana sales spiked to \$105,643,590, in Colorado alone.

**its players
to use it.**

During an interview on ESPN, National Football League Commissioner, Roger Goodell, suggested the sport's ban on marijuana could soon be lifted... if medical marijuana is legal in the player's state. The way Goodell puts it...

Multiple teams play in states where medical marijuana is legal – in fact this year's Super Bowl contestants were from Colorado and Washington, two states (so far) that have legalized the drug outright.

**MediJane
is in
position to
capture
the
weekend-
warrior
market,
too**

I can't imagine an NFL locker room filled with

marijuana smoke.
But I can easily
see the players
wearing
MediJane's
revolutionary
marijuana patch.
And it's quite easy
to see the
marketing impact.

Seeing NFL
players wearing
marijuana
patches, millions of
weekend warriors
could start using
MediJane's
product. We just
love emulating the
pros. But
MediJane's
marijuana pills
come first. When
the marijuana
patch is released,
yet another MJMD
buying frenzy
could ensue.

**Act on the
information
you're
receiving in
this Special
Report. Buy
MJMD
immediately,
before
share price
rises above
its current
entry-level
price.**

**Non
Smokers
Will Use
Marijuana,
Too**

Millions of folks
can't stand
smoking. Many
have quit and

never want to go back. Many others never took up the habit. Then there's the issue of second-hand smoke. Nobody wants it.

Yet everyone wants safe pain relief when needed. And those who need pain relief all the time are discovering that marijuana answers their prayers. But the smoke? It can be dense and brutally annoying to others, including children. The solution, of course, is smoke-free delivery of cannabis. That's precisely what MediJane Holdings (MJMD) is doing, introducing smoke-free marijuana delivery products. The company's lead product is a "marijuana pill" that delivers the health benefits of marijuana to the bloodstream orally, via a pill of cannabis concentrate that releases marijuana's healthful active ingredients throughout the day.

**Get In
Early!
Buy MJMD**

today!

Colorado Governor John Hickenlooper recently announced that,

"... the combined sales from both medical and recreational marijuana in the state will reach nearly \$1 billion in the next fiscal year... the state stands to collect at least \$134 million in taxes and fees."

The pharmaceutical industry is already on high alert. Cannabis is a scientifically proven remedy for pain and drug companies make billions on painkillers. Cannabis can quickly cripple big pharma's painkiller cash cows. In a moment, you'll see how **MediJane Holdings (MJMD)** is perfectly positioned to grab a large share of the OTC pain relief market.

5 REASONS YOU NEED TO ADD MJMD TO YOUR PORTFOLIO TODAY

1. Currently under Wall Street's radar (because MJMD is so new to the market)
2. Introducing breakthrough products in an explosive, game-changing industry
3. MediJane's new products allow the health benefits of marijuana to last all day
4. Newly public company looking at taking a large portion of the medicinal market with limited competition
5. Right now only 21 states are approved medicinally and only 2 are recreational more could be opening up - HUGE potential!

The industry is already \$2 Billion Strong!

What's exciting to me is the modern medical marijuana industry is still in its infancy and yet, it's already \$2 billion strong... and getting bigger and stronger as you read this.

Marijuana is now used to treat patients suffering:

• fibromyalgia, • migraine, • PTSD, • chronic pain and inflammation, • autism, • ADD/ADHD, • crones disease, • arthritis, • seizures, • epilepsy, • skin cancer, • and various other cancers.

Doctors are also now prescribing medical marijuana to treat muscle spasms caused by multiple sclerosis... nausea from cancer chemotherapy... poor appetite and weight loss caused by chronic illnesses, such as HIV & management of all sorts of pains.

Marijuana is saving children, too. (See CNN Chief Medical Correspondent, Dr. Sunjay Gupta's remarkable experience in this page below.)

Marijuana is a proven medical miracle!

And the investment revolution brought on by the legalization of marijuana is just now getting started. Monster profits have already been posted. If you missed them, you're still good. It's not too late to cash in on today's marijuana madness. Simply put MJMD into your portfolio today.

This medical revolution brought on by the legalization of marijuana is just now getting started. And yes, the pharmaceutical industry is on high alert.

Medical marijuana is already legal in 21 states, the District of Columbia, and from coast-to-coast in Canada. There's no waiting for profits on natural medical marijuana... no FDA drama... no wondering if the drug is ever going to be approved for sale. What's more...

U.S. Marijuana Sales Estimates 2013 - 2018
in Billions of U.S. Dollars

Cannabis demand is huge and growing faster than you can say, "Hey, I want to be a marijuana millionaire, too."

Medical Marijuana Sector Exploding!

MediJane (MJMD) is a game-changer within a game-changing industry. The company is poised to take over a large portion of the medicinal market. The innovative products in MediJane's robust pipeline are rolling out. **Buy MJMD today!**

The medical marijuana industry is just getting started. It will continue to explode as more and more states approve the use of this ancient medicine. And MJMD should continue to explode in value, too.

I'll tell you more about **MediJane (MJMD)** in a moment. First, let's go back just a little, to January 1, 2014. On that day, the first recreational retail marijuana sales were rung up in the Mile-High State. Outlets reported retail sales topped \$1 million on that day alone... sales topped \$5 million in the first week.

"During the first month of recreational marijuana sales," The Huffington Post reports, "Colorado's licensed dispensaries generated a total of more than \$14 million in sales, putting about \$2 million of tax revenue into state coffers in the process."

The Huffington Post added, "The medical marijuana sales for January generated an additional \$900,000 in sales tax, for a total tax revenue of \$2.9 million for both sides of the state's marijuana dispensary market. Including fees, the figure jumps to \$3.5 million."

116 Million Potential Customers!

ABC News recently reported that, according to the Institute of Medicine, 116 million American

adults are living with pain... about a third of our entire population.

And for relief, those 116 million men and women are spending big money, billions of dollars, at the retail level. OTC painkillers bring in \$2.3 billion a year, second only to cough and cold medicines.

Look who's supporting marijuana as medicine:

- **American Medical Association • American College of Physicians**
- **American Academy of Family Physicians • Leukemia & Lymphoma Society**

CNN Chief Medical Correspondent, Dr. Gupta, Shocks Millions as He Declares, "I Am Doubling Down on Medical Marijuana"

"I have met with patients, dozens of scientists and the curious majority who simply want a deeper understanding of this ancient plant. I have sat in labs and personally analyzed the molecules in marijuana that have such potential but are also a source of intense controversy. I have seen those

*molecules turned into medicine that has quelled epilepsy in a child and pain in a grown adult. I've seen it help a woman at the peak of her life to overcome the ravages of multiple sclerosis. I am more convinced than ever that it is irresponsible to not provide the best care we can, care that often may involve marijuana. **I am not backing down on medical marijuana. I am doubling down.**"*

-- Dr. Sanjay Gupta, neurosurgeon

No doubt CNN will do more documentaries on the health benefits of marijuana. With each airing, medical marijuana will become more and more mainstream. This unstoppable trend is sure to **fuel the success of MediJane (MJMD)**. Savvy investors recognize this. Those who **get in on MJMD early** stand to make the most money should a buying frenzy erupt. **Be smart. Buy MJMD today!**

Natural News, the magazine for health news and scientific discoveries, reported on December 17, 2011, *"cannabinoids hold the secret to helping heal many of the chronic diseases we are facing. From cancer to diabetes, and from autism to Alzheimer's, medical marijuana helps, and sometimes dramatically so."*

A report last year by the Institute of Medicine, a branch of the National Academy of Sciences, said the chemicals, called cannabinoids, relieved pain and nausea, and that the benefits can be delivered without smoking the stuff.

When you think about it, a person suffering chronic pain would have to smoke pot throughout the day for relief fewer people are smoking these days. What's more, "No Smoking" signs are popping up all over the place? **What's the solution?**

MediJane's Breakthrough Marijuana Pill

The Company calls its product Daytime Pain Plus CBD... it's a "marijuana pill" for people suffering chronic pain and muscle spasms.

The designation "CBD" means MariJane's introductory cannabis product is serious medicine. CBD stands for cannabidiol, a compound in cannabis that produces the medical benefits of marijuana. CBD delivers blessed relief without making people feel "stoned."

MediJane's concentrated cannabidiol (CDB) pill is made from all organic vegetarian plant compounds. A controlled dose of CBD enters the blood stream – without going through the lungs. No smoking, please. No second-hand smoke, either.

Just pop a "marijuana painkiller" once a day, in the morning. The health benefits will last all day. That's the message millions of folks want to hear and MediJane's CBD marijuana pill will soon come to their rescue.

MediJane
Gel Cap Delivery System

DAYTIME Pain Plus CBD

Pain Relief Gel
DAYTIME Pain Plus CBD is designed to help in the treatment of chronic pain and muscle spasms.

About This Patch
Gel capsules are one of the most effective and targeted applications for delivering Cannabinoids to the blood stream.

The MediJane Daytime Pain Plus CBD delivers a controlled dose of cannabinoids into the blood stream. An individual's tolerance to cannabinoids, height, weight and gender determine optimal dosage for the user.

Instructions
Take one capsule by mouth in the morning

MediJane
2011 Kan Pratt Blvd,
Suite 210 Longmont, CO 80501
OFF: 855-933-3499

Chronic Pain
Pain is an unpleasant sense of discomfort in any part of body and chronic pain is the one which has persisted for at least 3 months. It tends to interfere with the ability to perform routine activities of daily living and affects the quality of life. Chronic pain may be sensed by the brain through our nervous system from organ of the body. Emotional pains are also known and chronic pains may worsen in response environmental and or psychological factors.

Active Ingredients
Water extracted sativa strain cannabis in a base organic coconut oil.

Ingredients
This product contains 200 mg CBD, 100 mg THC, bottle approx.

Marijuana is being grown specifically to yield CBD-rich strains specifically for medical purposes. MediJane uses a variety of different strains of marijuana to treat specific ailments. For example there are different strains for pain, stress, fibromyalgia, etc.

The **Denver Post** just [published an article](#) on how CBD oil is saving the lives of children. The newspaper caught up with Josh Stanley, who owns a medical marijuana business in Colorado, and he's quoted as saying... *"What the CBD movement has done, I think, is brought in the soccer moms... It's brought in the mainstream, and it's brought in the conservatives."*

CBD is a godsend for epileptic children, which prompted The Denver Post to publish the article in the first place. In Chicago, according to The Huffington Post, parents successfully argued enough that the **Illinois Senate Public Health Committee** unanimously **green-lighted legislation** that would, *"legalize medical marijuana treatment for minors."*

To demonstrate how powerfully effective CBD is, read what one of Illinois government legislatures, Sen. Iris Martinez, told the **Sun-Times**:

CHICAGO SUN-TIMES

"Letters have been sent by so many parents who suffer watching their children have seizures – and not just one or two seizures: 100, 200, 1,000 seizure a week. This [CBD] could be a life-saving solution for children suffering from epilepsy."

Could Illinois be next to legalize medical marijuana or will it be cash-strapped Alabama? Whichever state is next to allow the use of medical marijuana... MediJane's products will be there!

Your MJMD profits should keep on surging!

PM PAIN PLUS THC

MediJane's product pipeline is rich. Shares should surge time and again as these breakthrough marijuana products are introduced. In addition to the CBD pill, MediJane is developing a **revolutionary new pain-relief product** the company calls **PM Pain Plus THC**.

MediJane is developing a **new pain-relief product** the company calls **PM Pain Plus THC**. It's for people suffering pain and inflammation and it delivers the health benefits of marijuana in controlled doses. Smoke free! But it's not a pill. MediJane's **"Plus THC"** is a marijuana patch... a doobie derm... a transdermal (via your skin) delivery system that, like the company's "marijuana pills," keeps the health benefits of marijuana working all day long.

Simply apply the "Plus THC" marijuana patch. The pain soothing benefits will last 8 hours. Millions of folks in pain will be buying it, from athletes to grannies. Like MediJane's CBD-loaded "marijuana pills, the **"Plus THC" patch** will come in several strains, to best treat specific conditions. Besides concentrated cannabinoid (CDB) delivery in a pill, made from all organic vegetarian plant compounds and in addition to MediJane's proprietary "Plus THC marijuana patch"...

MediJane's product pipeline is amazing...

Transdermal patches sublingual mists, topical creams and then comes their unique marijuana vapor delivery system. No smoke... only vapor is inhaled and exhaled. There will be several different products developed using the above note delivery systems. MediJane's focus is providing relief of ailments through various delivery systems using different marijuana strains and ingredients.

The company understands marketing. Plans are for MediJane to roll out these products region by region and state by state, in accordance with individual state medical marijuana laws.

MediJane is forming strategic partnerships with pharmaceutical sales professionals to make sure their breakthrough products sell like crazy in today's environment.

Buy MJMD today at the current entry-level price. Act now and a single \$5,000 investment gives you a meaningful position – at the current price of \$0.85, you'll get 5,882 shares. Those 5,882 shares could be worth multiples of your original \$5,000 investment in a short period of time, if you act now.

Medical marijuana stocks are darlings of Wall Street and when Wall Street discovers MediJane, a move to \$2... \$3... \$7... could happen within a short period of time. It's happened before with marijuana stocks, as I've documented.

- ✓ MedBox (MDBX) share price went from \$2.50 to over \$21 since Aug. 3, 2012. That's a **768% rise** in less than 24 months!
- ✓ Fusion Pharm, Inc. (FSPM) share price has risen from \$.63 to \$3.03 since January 2, 2014. That's a **381% jump!**
- ✓ GW Pharmaceutical (GWPH) stock went from \$8.98 on May 1, 2013 to \$62.12 on April 25, 2014. That's a **592% surge!**

Should MJMD go **up 768%** the way MedBox did, that would be great. Will it happen? Perhaps. If it

does, an initial \$5,000 investment turns into \$43,400. Wall Street will discover MJMD before ordinary investors will. Count on it. The interest of Wall Street's big money could catapult MJMD to price levels that vastly exceed my conservative estimates.

What are my conservative estimates? Bottom line...

MJMD could climb from \$0.85 to \$3.00 and turn \$5,000 into \$17,646 and make you more than 3 times richer within a short time!

Yes, those are conservative estimates, compared to the performance of most marijuana stocks, as I've shown you. Yet, there's no question **MJMD could easily exceed the immediate 300+% surge** I expect. Longer term, all I have to do is look at the pipeline of products MediJane has and I love MJMD even more!

Don't miss out on the early profits. Get MJMD into your portfolio today.

Sincerely Yours,

David Katz
