

Mobile Payment With Smart Phones Is Exploding. This Unknown \$1.25 Stock Could Go Through The Roof! The Motley Fool Says, "Your Credit Card Is Dead."

Wave Your Smart Phone and In Under 4 Seconds You've Paid—It's Fast, Easy and Booming.

New Media Insights, Inc. (NMED), Is a \$1.25 Stock That Could Hand You One Of Your Biggest Gains Ever

I'm Calling New Media Insights, Inc., (NMED) At \$1.25 a Share a Potential Game-Changer. It's In The Fast-Growing Mobile Payments Industry

Fellow Investor:

Just like the personal computer made the typewriter obsolete, mobile phones are replacing plastic credit cards as the preferred method of payment.

This game-changer is happening right now. Everyone has a mobile phone and is using mobile apps.

The money that could be made is absolutely jaw-dropping.

Consider what the respected technology analyst enterprise, Gartner, predicts for this profound idea: "We are forecasting a market worth \$617 billion with 448 million users by 2016."

This industry is absolutely immense—and its growth has

This industry is absolutely immense—and its growth has just started. And I found a \$1.25-a-share company that I believe has the potential to hand us truly extraordinary gains.

New Media Insights, Inc. (NMED), At \$1.25 a Share Allows Users To Make Quick, Easy

“We Expect The Global Mobile Transaction Volume To Average 42% Annual Growth Between 2011 and 2016 and We’re Forecasting a Market Worth \$617 Billion With 448 Million Users By 2016.”

Mobile Payments In a Way That Practically Makes The Credit Card Industry Obsolete

Hello, my name is Andy Carpenter editor of *The Wall Street Revelator*.

My goal is to find undetected stocks that have a highly promising business that could propel their stock into the stratosphere. I'm talking life-changing multiples of your money that let you retire sooner or achieve the lifestyle you've always wanted.

THIS EARLY STAGE IS WHERE THE REAL MONEY CAN BE MADE: YOU HAVE TO BE ABLE TO MAKE A DECISION AND ACT ON IT

The greatest gains go to those who are able to recognize real value at the earliest stage and buy so they don't miss their opportunity.

I believe that this is especially true of New Media Insights, Inc.(NMED) I'm not the only one who realizes the mobile payments industry is on an explosive curve upwards and fortunes could easily be made in the right stock.

The moment some sophisticated Wall Streeter with a high-speed computer screen spots New Media Insights, Inc. (NMED), it could rise very sharply. I'm a great believer in buying a stock at the lowest price possible. That's why I advise you to buy some of their stock as soon as possible.

In this Special Report, I will tell you EXACTLY why this makes such good sense in my view.

“The Launch Of Mobile Payment Processing Changed Everything.”

Tweak Your Business Publishing

NEW MEDIA INSIGHTS, INC. (NMED) SHINES.

Their Industry Is One Of The Most Exciting In America Today Because It's Changing The Way We Shop

I am genuinely excited about the prospects of this once-in-a-lifetime opportunity. The fact that it's just \$1.25 is absolutely remarkable and MILLIONS ARE ALREADY USING THEIR MOBILE PHONES TO MAKE PAYMENTS.

This is not a "let's see if it works," kind of industry. *It's working.* With a projected 448 million global users, I don't have any concern about their robust industry. It's exploding and the future looks even brighter. It's now making headlines...

- **ABC NEWS Says Mobile Is Taking Over:** "Plastic cards crammed into your billfold will soon find their way onto your phone."
- **CBS NEWS Reveals That Consumers Love Mobile Payment:** "What are the major benefits to consumers? Ease of use."
- **Business Insider Predicts An Explosion In Growth:** "Mobile payments are poised to explode with the aggressive roll-out of Apps..."
- **Mobile Payment Insider Reveals It's Getting Much Bigger:** "Mobile continues to play an increasingly important role as brands follow consumers onto smart phones."

"More than half of smart phone users use their phone to make mobile payments."

Mobile Payment Insider

An investment in this field is like putting money in a personal computer maker decades ago and selling the stock of a typewriter manufacturer. It's that transformational.

I can't overemphasize the importance of this in terms of finding a stock that could hand you one of the largest gains you've ever enjoyed—the kind of profit you read about the other guy making!

Most industries you don't want to be in because they're subject to intense foreign competition or they sell based on price with no proprietary advantage.

That's not true in the Mobile Payments industry. There is a virtual avalanche of business out there and the future couldn't be brighter. I've never seen anything like this. Consider...

Staples Technical Services

In a moment I'll tell you more about the operations of New Media Insights, Inc. (NMED), but first I want to applaud their expansion strategy that I think is right on target.

New Media Insights, Inc. Has a Strategy To Target Small And Medium Size Businesses. That's Smart Because The Majority Of Companies Go After The Giants

You've heard the phrase, "you have to pick your spot." This is also true in business. If you decide to compete with major enterprises with unlimited money, you might want to think twice about that.

According to the U.S. Census, there are approximately 5.3 million small and medium-size businesses in the U.S. New Media Insights, Inc. (NMED), has wisely chosen to go after this growing niche market. That's because many of these businesses want to aggressively add to this customer-friendly capability to generate new sales.

One Of America's Leading Experts
Sneaking Highly Of This Strategy

What To Do Next For

Speaking Highly Of This Strategy...

Sandy Shen is the Research Director at Gartner, the highly respected technology research firm that is known for making accurate forecasts in the field of technology. Mr. Shen comments on the idea of looking for niches in this industry, the mobile payment industry.

“There will be a few global players that have the scale and resources to serve large customers and the mass market whose requirements can be readily satisfied by standard solutions.”

“However, there will always be segments that cannot be sufficiently served by the global players. The demand of these players can only be satisfied by local players who can better understand the segment and have specific solutions to meet the unique challenges.” In other words, small and medium size business need the help and guidance of a company that caters specifically to them.

That’s EXACTLY Where New Media Insights, Inc (NMED) Comes In

5.3 million small and medium-size enterprises in America make an enormous market with a great deal of money to spend. Above all, these businesses realize that they have to quickly climb aboard this new way of doing business or get left behind.

New Media Insights, Inc. (NMED) offers important business-building tools that are especially valuable today. Here’s how New Media Insights, Inc. (NMED) does it.

Their first step is to sign up local merchants who become their “network.” This network is where the mCard, their virtual “credit card,” will be accepted by the merchant.

And there’s a powerful reason for merchants of all kinds to sign up. It doesn’t cost them anything and they only pay when a new customer visits their business and spends money.

Here’s why the mCard from New Media Insights, Inc. (NMED) is so valuable to anyone in business who takes credit cards for payment. Follow this and you’ll see exactly why, step-by-step.

Let’s Say You Own A 3-Store Chain. How Does New Media Insights Help You Build Your Business In Exciting New Ways That Convince You To Sign Up?

The first rule of success for any business: the customer experience has to be the easiest possible, or guess what? Your competitors gain the edge.

New Media's mCard appears on your customers' smart phones. When they enter any one of your stores, they have the ability to check out almost instantly. No more plastic cards to worry about. Easy and convenient works, but that's just the beginning benefit of having an mCard.

Money-Saving Benefits Others Can't Match-- This *Really* Works...

Americans love bargains and saving money. THE WALL STREET JOURNAL confirms it when they say, "Why pay full price? Stores give discounts, sneak peeks, and Secret Sales..." The public can't get enough of it. Above all, it's a powerful incentive to buy something from your stores. Here's how the mCard does all this.

Your objective is to get customers in your stores and have them spend as much as possible. The mCard systems lets you offer your customer endless rewards, discounts and incentives on a real-time basis.

Let's say it's Monday morning when business is normally slow. You want to increase sales so you send all your customers with the mCard a 10%-Off Coupon to their smartphones good only for Monday morning.

They look at their e-mail on their smartphones and learn of the offer...and then stop by and take advantage of your generosity. You get more sales, and there's another incentive for you to do this.

Get Your New Customer To Come Back Again And Again...

Repeat business is the name of the game. Now that you've brought in a new customer, you want them to come back. The mCard lets you create a loyalty program which is somewhat like the ones the airlines have.

Your customer gets something for continually spending with you. Perhaps it's additional discounts, maybe another free product past some sales goal, anything you believe the customer might be interested in. The publication *Payments* states, "For many businesses today, customer loyalty is the ticket"

"Payments have been growing at a break-neck pace for some time."
Unibul Merchant Services

4 Reasons Why This Could Be ONE OF THE MOST PROFITABLE STOCKS YOU'VE EVER BOUGHT

Grow Even Bigger By Attracting New Customers By Social Media...

It ALSO works for getting new customers. Potential buyers are solicited by the many different forms of social media to come by and save money on something you're selling. This local use of the Internet is a powerful form of marketing.

Here's Another Big Benefit: START SAVING MONEY From Day One...

As a store owner, when you accept the standard plastic credit card, you pay a fee that can range from 2% up to 6%. That may not sound like much, but it is. Store owners always complain about paying these fees, but until now, there was nothing they could do.

ALL THAT HAS CHANGED. Now they can dump the credit cards and save a substantial amount of money on each transaction. The mCard is a lot less expensive. This is probably one of the biggest reasons for a store owner to sign up with New Media Insights, Inc. (NMED) Tweak Your Business Publishing says, "Mobile payments cut costs."

Selected Companies In The Financial Sector Have Gone Through The Roof. Some People Emerged As a *Millionaire*— Yet Very Few Ever Realize This!

Most people think of technology when it comes to finding profitable stocks. Little do they know that a wide range of financial service enterprises have made early retirement possible for investors who were first in line to buy.

Diversified companies in the financial services sector have the potential to hand you life-changing gains. I'm always amazed how so few investors realize this golden fact. Imagine getting in on a few of these...

- **\$1.25 to \$38—\$10,000 turns into \$304,000**—AGF Management, Ltd
- **\$13 to \$310--\$10,000 turns into \$238,461**—Blackrock, Inc
- **\$1 to \$17—\$10,000 turns into \$170,000**—CNO Financial Group

YOU'VE EVER BOUGHT

1. It's one of the most dynamic, fast-growing industries in the world:

Consider the prediction of Gartner, one of the most respected technology analyst firms in the world. They see 448 million mobile phone users worldwide doing \$617 billion in business with a 42% growth rate out to 2016.

2. 5.2 million small and medium size business could use this service:

The U.S. Census Bureau says with 5.2 million business with 20 or less employees. This is a prime market New Media Insights, Inc., (NMED) is shrewdly focusing on. Most companies in the mobile payments field are going after the bigger enterprises.

3. The public embraces this method of payment:

According to Digital Lifestyle Expert, "Get rid of your wallet. The future of money is here: Mobile Payments..." And it's true! People don't like wallets. Consider: CBS NEWS reveals that consumers *love* mobile payment: "What are the major benefits to consumers? Ease of use."

4. At \$1.25 a share, it's almost totally unknown:

Historically, it's the early investors who could make the most money. Most stocks in this price range are *not* scrutinized the way higher-priced ones are. It's my business to burn the midnight oil and find

what could be a huge winner. I believe this enterprise could return jaw-dropping gains.

- **\$3.50 to \$23—\$10,000 turns into \$65,716**—Clairvest Group, Inc.
- **\$2.35 to \$15—\$10,000 turns into \$63,829**—American Capital, Ltd
- **\$11 to \$65—\$10,000 turns into \$59,000**—StanCorp Financial Group, Inc.

All prices have adjusted for splits showing the value of an investment made at the low and then the subsequent high.

The Public Wants Everything To Be EASIER TO DO. New Media Insights, Inc Makes Their Lives Very Easy. Remember ATMS & Online Banking?

You may or may not remember when Bank ATMs were first introduced. The chorus out there was saying they'll never work. Really? There are only 424,853 of them spread across America today.

Online banking. That also wouldn't work. Critics said people don't understand the Internet sufficiently. Wrong again. Today, 55 million people are doing online banking. It's big and getting even bigger.

You get my point. The mobile payment industry has grown so fast so quickly, I don't hear the critics on this one. They know this astonishing trend that is NOT going away. It changes the rules of the game like never before.

The bottomline is simple—and this proves it. People are addicted to convenience, and once they're introduced to it, they NEVER GO BACK. Welcome to the mobile payments era. Consider...

Mobile Payments Insider Reports It's Booming: "The mobile payments marketplace has exploded in recent years..."

Digital Lifestyle Expert Reports It's a Huge New Wave: "Get rid of your wallet. The future of money is here: Mobile Payments..."

Cell Mobile Says Small Business Saves Big Money: "Small business may be the catalyst of mobile payments—one simple reason is that m-payments are a much smaller payment than credit cards..."

Fast Casual States Credit Cards Are Going Away: "The future of marketing lies in mobile payments..."

Unibul Merchant Services Reports That Smart Phones Are Soaring: "The increase of the mobile payments volume is driven primarily by the explosive growth of smart phones."

New Media Insights, Inc. (NMED) is exactly the kind of company I specialize in finding for the subscribers of my publication, the Wall Street Revelator. Simply go to www.WallStreetRevelator.com for your FREE TRIAL Subscription.

"I Believe That New Media Insights, Inc., (NMED) At \$1.25 a Share Could Be The Buy Of The Century—But You Can't Wait."

Andy Carpenter

"The Future Of Commerce."

INC Magazine

Timing Is The Key To This Remarkable Investment. When The Public Finds Out What You Now Know, It Could Easily Soar In Price. Look At The Industry Growth!

I'm not the only one out there scouring the marketing for the next polished gem that's managed to escape detection by the analysts. One rule, and I've seen again and again is this: when a company proves itself, *interest in it quadruples*.

Already, many on Wall Street are aware of the huge money-making potential this field has. This alone increases awareness because it's where the smart people start looking.

With headlines like these out there, you can be sure many are burning the midnight oil in search of the next investment that could hand them a ten-fold gain once they find a stock they believe has the potential to go up that much.

My advice? You shouldn't wait. By the time the average analyst feels "comfortable" about any stock that I'd predict, a large portion of the profit is probably gone.

Everyone knows about it, the company has already been in the headlines and you could be paying a super high price. That's *not* what Wall Street is all about to me.

You should be looking for life-changing stocks where you can start off buying a small amount and then later increase your position as it meets your expectations. You'd be surprised at how profitable this could be.

You Want To Get In At The LOWEST PRICE POSSIBLE. I Never Like To Buy Stocks That Have Gone Up Substantially. This One Could Explode At Any Moment

At the time of this writing, New Media Insights, Inc. (NMED) is just \$1.25 a share. In my judgment, that is a remarkably low price to pay for a stock in an industry that could so dominate the future.

Is there anyone out there who believes we're going back to plastic credit cards? Of course not. The future has arrived and it's called mobile payments and the mCard. This is what I would think about doing. Like I mentioned, buy an amount of New Media Insights, Inc. (NMED), that you're comfortable with so you won't miss it. You can always pick up more later if you choose.

Meet Andrew Carpenter: One Of America's Acknowledged Financial Experts

As editor of the *Wall Street Revelator*, Andrew Carpenter brings more than two decades of successful global investing and research to the job each day. Andy is a former journalist and business writer for such notable newspapers as *The Boston Globe* and *The Washington Times*. Andrew is also the editor of the highly respected publication, *The China Club* and *Asia Business & Investing* newsletter.

His advice and guidance have been chronicled in *The Wall Street Journal*, *USA Today*, *The Business Journals* and *Investor's Daily Edge*. He was the first American to lead U.S. investors into China's Hainan Province. With the *Wall Street Revelator*, he now focuses his well-honed research skills on find medium-risk high-reward opportunities. During recent years Andy's readers booked notable for winners such as these:

- CoscoSingapore(CSCMY) +562%
- EasyLink Solutions(ESYL) +3,725%
- Chia Shin Cement(0669.HK) +430%
- General Steel Holdings(GSI) +670%
- Lingo Media (LMDCF) +141%
- China Natural Gas(CHNG) +452%
- Yanzhou Coal Mining (YZC) +490%
- Starbucks (SRIIX) +411%

- Starbucks (SBUX) +111%
- China Automotive (CAAS) +350%

Think about the facts of this industry. Look at its growth. It's only going to get bigger because the advantages for both merchants and customers are overwhelming.

My strong recommendation is this: call your discount broker today. I am convinced that you will look back at this opportunity and be very grateful that you acted promptly to get in on the ground-floor. Don't wait. Do it today or else you could miss out!

Sincerely Yours,

Andrew Carpenter
