

**Though Under \$1 Now... \$20 Is What
Others Could Expect To Pay If
The Wall Street Journal Proclaims,
“*The Solution To Coffee Rust
Has Been Found!*”**

Coffee Roya disease is devastating coffee crops worldwide, but GroGenesis’s *AgraBurst* has been shown to stop this blight dead in its tracks! But that’s just the beginning for this amazing company...

**"Your Money Could Double,
Triple or Even QUADRUPLE!!!"**

Greetings,

It’s hard to imagine an agricultural breakthrough that has the power to produce **BIGGER sizes and yield of a crop in SIGNIFICANTLY less time** – but the company you’re about to discover has unlocked mother nature’s secrets with an incredible formulation that has to be seen to be believed.

In fact, what this company is doing is so remarkable – its scope can only be compared to achievements like curing cancer or discovering a new, and economically feasible, reusable energy solution.

It’s that big...

As well as an investor’s dream situation, as this incredible company and its incredible innovation, which could, quite literally, have the power to help end world hunger – has yet to grab any attention from Wall Street.

But that could change VERY soon...

You see, there’s another purpose for this agricultural miracle that could soon turn the head of every hedge fund manager, brokerage house, and retail investor in the business...

A purpose that could, almost quite literally, holds the key to saving the ENTIRE \$100 Billion Coffee Industry!

Once word gets out (and that could come at any moment) everyone, and I mean EVERYONE is going to want a piece of the action...

But many of these people will be locked out of the really BIG profits as if you don't know the name *GroGenesis, Inc. (GROG)* now – by the time you read about them in them on Bloomberg or Forbes – it'll be too late!

And when you SEE the power of their AgraBurst product – you'll understand exactly why!

Advertisement, see disclaimer below

Crops Resistant To Droughts, Blights, Infestations, And Freezes Means A Steady Supply Of Nutritious Food!

No, you did not misread that. And just so we're clear, let me repeat it.

✓ GROG's AgraBurst formula does more than increase the size and yield of ALL types of crops and cut our harvest time significantly - *but it also fortifies crops against droughts, blights, swarming insects and freezes* - meaning we could essentially grow food wherever and whenever we need to!

And that has come in real handy in the \$100 Billion Coffee Industry's fight against the devastating fungus, Coffee Roya, also known as "Coffee Rust".

Coffee Roya can utterly destroy an entire crop of coffee beans – and South America is undergoing one of its biggest blights in decades. Coffee growers have been begging for a natural, non-toxic solution...

GroGenesis offers that solution in their AgraBurst formula!

AgraBurst has shown in tests to stop Coffee Rust dead in its tracks!

And while ending world hunger is an incredible long-term vision...

Helping protect the profits of a \$100 Billion industry in the SHORT TERM is what could lead to HUGE returns in the pockets of early investors in GROG.

Visit a Brokerage Site Now to Purchase Shares

Understand, AgraBurst visibly increases the Cationic Exchange Capacity (CEC) in plant root systems, increasing their ability to uptake water and essential nutrients – using them to help fight off

"Ending world hunger is possible – so why hasn't it been done?"

Some 850 million people go to bed hungry. If the right decisions are made now, we can feed the world and address inequality."

theguardian

infections like coffee roya!

The testing has already been done in conjunction with Texas A&M University – and once the reports hit the hands of the biggest names in coffee – there could be a full on stampede of business heading towards GROG!

That's why I'm urging you to consider buying shares as soon as possible! Because while their under a \$1 now – that may not be the case for long! And I would know...

Hi, I'm Tim Fields, editor of Untapped Wealth, and I've spend the last 17 years analyzing trends in the market, and in all my years I have never seen a stock with as much

potential to build TRUE wealth than GROG...

In fact, I'm going to say this as right now and as boldly as I can: GROG could be the most prolific stock of not only this decade, but this century to come.

I know that sounds like a bold statement, almost too bold, but GROG's AgraBurst does EXACTLY what it says it does – and I'll prove it to you in just a few moments.

AgraBurst: Field Tested With INCREDIBLE Results! Is This The End Of Coffee Rust?

As I've stated... GROG's AgraBurst system could curb the coffee rust fungus that has been plaguing coffee plantations throughout Central and South America...

A GroGenesis field team, led by Senior Scientific Consultant, Dr. Helen Keenan, visited several of these large plantations that were experiencing Roya outbreaks to show how powerful the AgraBurst formulation truly is.

The primary field test of a *single* application of the AgraBurst product was manually sprayed across a predefined area at a large farm located just southeast of Guatemala City, and to say the results were outstanding would be a GROSS understatement...

As with that single application, the field team documented "visible degradation of the fungal infestation within 24 hours".

Randolfo Hernández, Plantation Administrator, subsequently volunteered the following report. *"I did not believe the product would work at first. After the product was applied to the coffee rust, I came back to the test area 4 days later and saw fewer spores on the plants. On the 10th day, I went out again; I saw no spores on the treated plants. The scars were still there but the disease was controlled. I also saw a change in the color of the plants, from an orange color to green."* Sr. Hernández

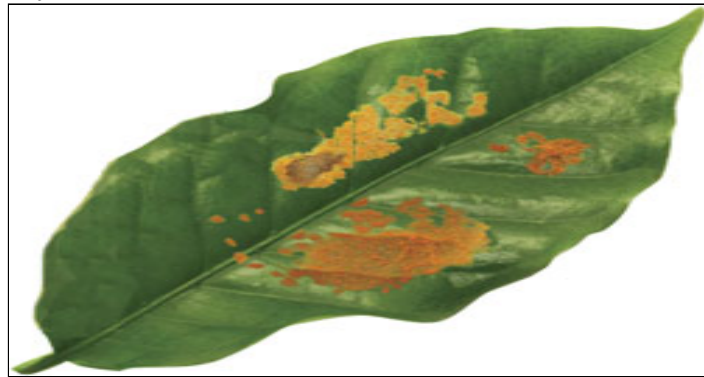

concludes, *"If I had my own coffee plantation, I would be using this product to control the rust."*

Similar tests with exactly the same outcome as noted above were demonstrated at another large privately owned plantation. Initial skepticism was encountered due to previously unacceptable long term results from a variety of typical commercial fungicides containing toxic salts (e.g. copper and arsenic) which eventually poison the soil itself.

But the fact that GROG's product was shown to be highly effective, non-toxic and suitable for both organic and non-organic growers, increased the level of enthusiasm for the product dramatically.

These results led to one of the biggest business breakthroughs for GROG...

Mr. Joseph Fewer, GroGenesis CEO, states, *"Based upon favorable reports from the local growers, and with the help of our regional consultants, we were introduced to representatives of the Asociacion Nacional Del Cafe (www.anacafe.org) to provide product awareness as well as offer documented and substantiated early results from the recent field study. As the results have been extremely positive, there are no impediments to further dialogue with regional officials. In fact, preliminary talks have begun with ANACAFE and the Ministry of Agriculture towards the possibility of a regulated and formal large area demonstration in future. We feel very positive that should the Guatemalan (or neighboring) government(s) adopt a proactive approach which moves beyond coffee towards the investigation of product efficacy on other regional high value crops such as sugar cane, bananas, vegetables and rubber trees, then the probability for a positive sales outcome would be increased substantially and could offer a highly promising future for the Company, its stakeholders and shareholders alike."*

Increase Size And Yield In SIGNIFICANTLY Less Time – The Natural Compound That Could Make You Rich!

How is it that this tiny, unheard company is shaking the entire agricultural industry to its core?

What has the rest of this \$1.3 TRILLION market bending their ear GROG's way?

**Why \$20 A Share
Could Come
Fast!**

\$1.00  **\$20**

The informed investor normally pockets the biggest profits, that's why it's important to learn all you can about a company's product before you decide to invest. Here are some facts you may want to know about AgraBurst.

- It's a *natural* plant enhancer
- The formula is actually a blend of extracts of natural plants
- Non-toxic, carcinogen-free AgraBurst is 100% biodegradable
- AgraBurst is safe for ALL plants, animals and people!
- GROG has already gotten Agraburst on the FDA's EAFUS (Everything Available in Food in the United States) list
- The formula complies with the Clean Water Act
- It's an effective pest control compound
- Is plant specific, not soil or region specific
- Proven to improve yields and quality
- The compound is also proven to increase BRIX level and plant quality
- Helps produce a *significantly* larger root system
- Fortifies plants against sever conditions like heat, drought or frost

It's simple: GROG's AgraBurst formula has unlocked the secret to growing food that's **BIGGER in less time!**

Can you imagine what this means to not only the world economy...

But what it also means for the 870 million people around the planet who go to sleep hungry every night?

GROG's AgraBurst could be the answer that scientists have been searching decades for: **the effective end to world hunger.**

And while it wasn't created in a laboratory by MIT researchers...

It has been perfected by one of the finest scientific minds in the field, Dr. Helen Keenan, and could be about to become a global phenomenon.

A potent, natural formula that can grow fruits and vegetables larger in significantly less time – giving our generation the very real chance to end world hunger as we know it.

And by getting in on GROG today, you could be locking in your chance at building a veritable fortune for you and your family for years to come – just from buying this one stock!

Just how rich can GROG make you?

Well, something this big is hard to measure – as it always is with anything that will impact an industry on a global scale. Do I think it's possible for us to see this stock quadruple any initial investment? Yes... I do. In fact...

It's not unreal to see this stock hitting **4, 5 or even 6 hundred percent gains** in a short period of time.

Remember, we're talking about ending world hunger – maybe even dead in its tracks! How big do you think the company that has a *proven* formula to help end world hunger would be?

Bigger or as big as the company that cured cancer? Bigger than the company that discovered a neverending, clean fuel source?

Because that's the scale we're talking about here. **AgraBurst could be the most incredible discovery our lifetime – and you're getting advanced notification about the company that's taking it public!**

It's rare to get a chance at getting in on the ground floor of a company that can change the world – but you are! Right now! And by acting today, you could be making yourself richer than you ever dreamed possible from purchasing one stock.

And those returns could be even bigger once the world understands that GROG helped save the ENTIRE coffee industry from debilitating losses due to coffee rust.

**CASE STUDY 1
TOBACCO: AGRABURST BEFORE AND AFTER**

Untreated tobacco before. This tobacco had heavy rain and wind that caused this crop to scald and wilt.

Treated tobacco after. 10 days after treated tobacco looks healthy and is growing again.

How

**GROG Could Transform
The World As We Know It**

We've all seen the pictures on the cover of National Geographic of the millions of starving children from around the world. The images are both angering and heart-wrenching – but we've never really had the means to make sure that no child goes to bed hungry...

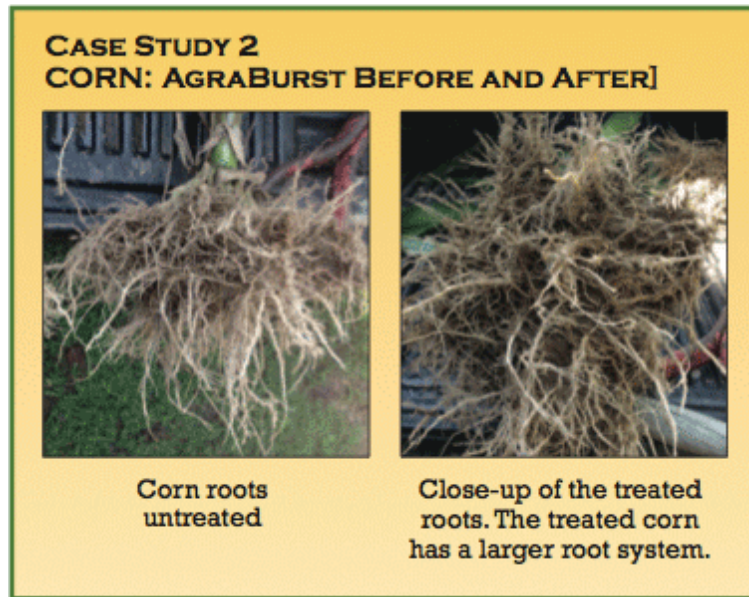

Until now.

AgraBurst's formula is so potent, so effective, that it can be in used almost anywhere, in almost any climate, for any agricultural purpose! Helping to end world hunger could just be the beginning, as AgraBurst could be the shot in the arm the global economy has been

waiting for!

by the growing power of AgraBurst?

Can you imagine how many businesses and markets could be immediately impacted

I've already talked about coffee, but...

The lumber industry could be one of the first to reap huge profits as AgraBurst would allow them to repopulate cleared timberland with new trees faster than ever before!

Growing new timberlines that are bigger and taller, *FASTER* means they can clear and cut more often with less of an environmental impact!

Livestock farmers could feed their animals a cleaner, healthier diet that consists of more nutritious ingredients...

Medicines that depend on rare and hard-to-harvest herbs can now grow more of what they need than ever before...

And it's all being made possible because of AgraBurst's incredible, increase size and yield producing formula. It's rare that one product can have such a broad reach – but GROG owns the formula that has all that and more.

It's hard to think of a bigger breakthrough in the last 50 years than AgraBurst.

The only question is: who's going to be the first to profit?

Monsanto, Proctor & Gamble, Big Sugar – Which Company Would Pay The Most For Exclusive Rights To GROG's AgraBurst?

We've talked at length about what AgraBurst can do and what it could mean to our global economy...

But let's shrink that scope back down to business – and what AgraBurst could mean to the bottom line of some of the biggest companies in the world.

We know the names...

Monsanto, Proctor & Gamble, Leucadia – names that are synonymous with agriculture and names with the buying power that only multi-Billion, multinational companies could have.

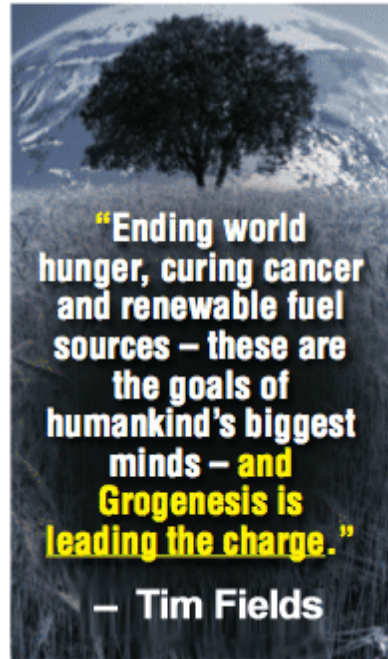

Once word about GROG breaks, and if their products live up to their potential, how long do you think it would take for one of these companies to consider putting those Billions in cash reserves to use potentially buying up GROG so they, and they alone have access to AgraBurst?

It doesn't take a genius to understand what being able to grow food bigger (and more nutritious) in less time or helping stop debilitating plant diseases like coffee rust would mean for the company that walked away with exclusive rights to AgraBurst...

Money. A lot of money. Whether they use AgraBurst to increase their crop size or decrease their harvest time – or whether they license other companies to use it – either way they'll be getting the chance to make money hand over fist!

But they're not the only agricultural juggernauts that would benefit from becoming the owner of GROG and the AgraBurst formula...

Big Sugar could be yet another big factor in determining exactly who would be the winner in the AgraBurst sweepstakes.

And they have money to burn.

If Big Sugar's biggest names throw their names into the ring along with Monsanto and Proctor & Gamble – it could ignite one of the biggest bidding wars this, or any other industry, has ever witnessed.

Do you know what could happen to the shares you buy today for just pennies on the dollar? If you said "QUADRUPLE" you may be underestimating the power of Grogenesis...

In fact, we could see shares of GROG shoot up 10x – 15x from where they are right now – quite literally overnight – if one of these powerhouse companies decides they want the Agraburst formula for themselves.

Western
**FARM
PRESS.**
TIMELY RELIABLE INFORMATION
FOR WESTERN AGRICULTURE

BIG profit
point!*

Just the rumor alone could send the shares up 3x – and once the ink dries on a signed contract – early investors like you could walk away with mint!

But you have to decide...

Do you want to watch this event play out from the sidelines? Or do you want to be there to profit big from what could potentially be, the biggest bidding war the agricultural industry has ever seen?

GROG: Why The World Will Want To Get Behind This Amazing Company

Understand, GROG doesn't need a fast paced and aggressive buyout to become one of the best performing stocks the agricultural industry has ever seen...

The fact that AgraBurst can effectively stop coffee rust dead in its tracks is all the proof needed that GROG is well on it's way to taking its industry – and Wall Street – by storm...

And having the power to increase size and yield in significantly less time is really just icing on GROG's REALLY big cake!

But there's a more powerful reason as to why investors should have no problem getting behind GROG...

It's natural!

The danger and toxicity that are found in many of the products in GROG's market, are not found in AgraBurst!

For example, the treatment coffee plantations have been using to treat coffee rust is a DANGEROUS combination of copper and arsenic! *That's crazy!*

AgraBurst is a safe, natural compound that could make the lives of hundreds of millions better by ensuring that they might never go hungry again!

It's precisely why Monsanto, a company that is picketed around the world (yet still trades at around \$103 per share) could be the first to come knocking on GROG's door...

But before that happens, the fact remains that Agraburst is a product that could help save MILLIONS of lives!

In the court of public opinion, GROG would be a hit – and for investors who act today – that public opinion could become \$\$\$ in our pocket!

GROG is a stock the world will WANT to succeed...

And that want could translate to profits for shareholders who act early on GROG.

"Increase size AND yield in WAY less time!"

Feeding The World: Food For Everybody Means \$\$\$ In Your Pocket!

"How much do you think GROG will profit when every farmer and food producer in the world continually buy AgraBurst?"

Even if none of this means anything to you, from a humanitarian perspective – the money to be made from what they're doing is **UNDENIABLE!**

Let me ask you...

"How much do you think GROG will profit when every farmer and food producer in the world continually buy AgraBurst?"

Obviously, that question is rhetorical, but you get the gist. I've seen a lot of real winners hit the market over my years as a stock analyst – but nothing like what I see with GROG. This stock is the real deal.

Think about it...

Assuming AgraBurst does exactly what it promises (and the facts speak for themselves)... farming operations the world over will want to get their hands on the formula that will effectively increase size and yield in less time for no other reason than to increase their own profits!

Why? How are they going to compete with the next farm over that is churning out produce at blistering speeds at double the normal size?

They won't be able to – they'll have to adapt to survive. AgraBurst is the next evolution in agriculture – and people are going to either get on board, or they're going to be left behind.

It's Darwin's Theory of Natural Selection at work in the business world...

And that, more than anything, may be what's responsible for early investors collecting a fortune by getting into GROG today!

Don't Wait! Act On GROG Before It's Too Late!

There are not a lot of absolutes in trading stocks – if there were – everybody would be doing it and building their own, personal fortunes.

And while you can't guarantee anything in life, there is one thing that we are absolutely guaranteed with GROG...

If we wait to act on this stock till it makes front page headlines in the Wall Street Journal – or on the cover of Forbes magazine – it'll be too late to pocket the really big profits.

In stocks, more than almost any other thing in life, timing is of the utmost importance if you want to collect the kinds of gains most people only dream about...

And for people like us – having knowledge and advanced notification of a big winner like GROG has the very real potential to be – an opportunity this big only comes around once in a lifetime.

What you're holding is more than just information on a world changing company...

What you're actually holding is the equivalent to a winning lottery ticket – because just like the lottery – GROG is giving you the chance to build an incredible fortune for a very small investment.

Every once in a while a stock comes along that really shakes the mainstream investment world the core...

CASE STUDY 4 TOBACCO: TREATED WITH AGRABURST

"Smith Farms is using AgraBurst on all our crops this year. It really helped my wheat stand up under high winds and rain. My yields were good even with the adverse conditions. We grow 160 acres of tobacco and the treated plants are healthy with thick leaves which tells me my yields will be excellent. My soybeans and corn have that same healthy look about them. Healthier plants are higher yielding plants. AgraBurst is the product I need to help give me an edge in quality and yield production". — John Smith, Puryear, TN

A stock that seemingly comes out of nowhere and takes Wall Street by storm – while creating Millionaires overnight!

GROG has all of the market indicators to show that they could very well be that next revolutionary stock the world has been waiting for.

✓ In fact, it's not far fetched to see that just a \$1,000 investment could explode to over \$100K, \$500K or more than a MILLION! Sounds unbelievable I know, but it's not a scenario that's unheard of.

2015 could be the year that GROG changes your life – and the world – forever!

Don't wait!

Act on GROG now to ensure you're among the first to potentially record HUGE, record-breaking profits!

Licensing: Our Pathway To Perpetual Profits!

Did you forget about this never-ending revenue stream?

We talked briefly about it before – but it’s truly one of the secret profit weapons of any company that plans to be around for the long haul.

A perpetually never ending influx of cash – all for doing nothing but allowing other companies to use GROG’s AgraBurst formula in their already existing products.

It’s called licensing...

Owning cutting edge technology allows companies to license their innovation to outside manufacturers to produce and sell part of whole of their product – but do so at a hefty price.

Why would a company want to pay for the right to manufacture somebody else’s products? That answer is simple...

Profit.

To these outside companies, it’s completely worth paying licensing fees for the simple fact that they know they can sell the products they produce for a nice profit – and many times those profits are enough to make those licensing fees look like chump change!

GROG controlling their formula and process means nobody in the world can produce this world changing miracle without paying GROG first – manufacturers would be lining up, jumping at the chance to sign a deal...

I mean think about it, AgraBurst is more than a game changer, this thing could transform the planet by helping to stamp out deadly plant diseases and world hunger forever!

Who wouldn’t want a chance to add the scientific discovery that seems destined to go down in history as “the mechanism that could ensure people may never go hungry again” to their already successful products?

Because that’s EXACTLY what they’d be doing by signing on with GROG...

A Renewable Source of Nutrition – and Cash!

- AgraBurst works at the plant's cellular level to help with the uptake of vital nutrients, chemicals and water.
- Its sub-atomic particles (called nano colloids) quickly penetrate the leaves of plants, sparking more efficient photosynthesis and higher BRIX (plant sugar) levels.
- AgraBurst's nano colloids speed nutrient transport throughout the plants circulatory system.

- These colloids act as a lubricant that promotes a higher efficiency uptake of water, sugars, minerals and necessary nutrients.
- This loosens up the soil allowing roots to grow deeper in order to reach latent nutrients.
- AgraBurst is essentially a tune up for a plants engine – making it a better, more efficient nutrient-creating machine. Which is nothing short of amazing.

**If You Make Only One Trade This Year –
I Can't Urge You Enough – Consider Making
That One Trade GROG!**

You've heard what GROG's AgraBurst can do...

You've seen the proof that this scientific discovery can produce bigger size crops and yields in

significantly less time for food growers around the world...

But if you haven't yet picked up the phone or logged into your online trading account and bought as many shares of GROG as you can comfortably afford – NOW would be the time to consider doing so!

Right now, we are on the cusp of a world changing event.

The moment that AgraBurst starts grabbing the attention of the world's biggest media outlets, there's no doubt that GROG could very well become just a big a brand as Coca-Cola, Proctor & Gamble or Wal-Mart.

Stopping coffee rust is one thing...

But being the catalyst to help end world hunger is an accomplishment the world has been waiting centuries for!

And GROG could be about to do its part to make sure that no person ever goes hungry again! This miracle is as big or bigger than finding the cure for cancer!

And you're getting the first chance to own shares of this company while they're not only extremely affordable – but may be as cheap as we ever see them again!

Do yourself a favor...

Don't wait this one out on the sidelines...

GroGenesis is our chance to building fortunes for ourselves and generations of our family yet to come..

Act today.
