

From the Desk of Tobin Smith...

**This Tiny Company Has Just Perfected
 What Could Be **The Biggest Breakthrough**
In *Natural* Pain Management That The
 Nutraceutical World Has Ever Seen...
AND THEY HAVE THE PATENTS TO PROVE IT!**

Undiscovered **Greenhouse Solutions Inc (GRSU)** has just combined the very best elements of marijuana and nutraceuticals for the most potent, natural pain fighter the market has ever seen! *Early investors have the potential to walk away **474% RICHER!*** That means...*

A \$2K investment could blossom to **\$9,480...**

\$5K would soar to **\$23,695...**

[And \$10K would EXPLODE to **\$47,400]**

 **SEE ALL OF THE PROOF BELOW!!**

Greetings!

The company you're about to hear about today could be one of the biggest stories to hit Wall Street this year...

What they've just discovered, perfected and patented is a NATURAL painkiller that could change the entire world of natural health and holistic medicines as we know it!

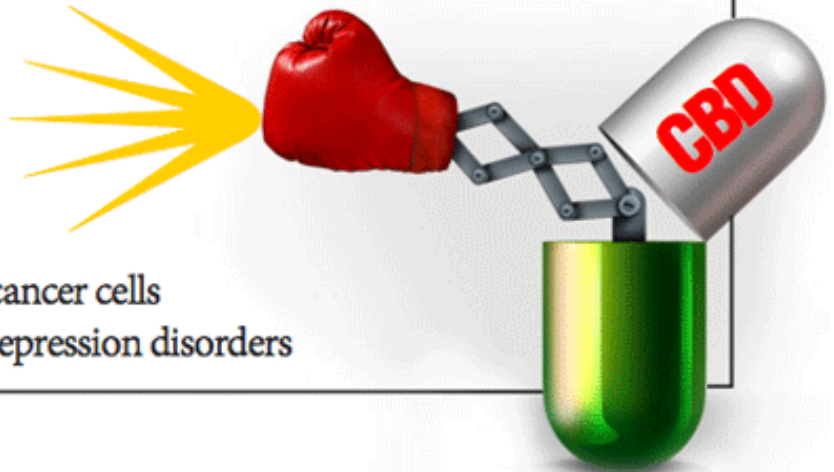

And understand, that one of the biggest components to this breakthrough is the 100% legal aspect of the marijuana that is really starting to make a buzz – and not just in the medical world – but on Wall Street as well. What is that component?

CBD – or “cannabidiol” to the medical community.

CBD is the very reason doctors prescribe medical marijuana – because it's the CBD that contains the medical benefits – NOT the psychoactive THC or the part that gets users “high”.¹

CBD may be the key to unlocking the cure to many different ailments – this wonder compound has proven to:

- Reduce nausea and vomiting
- Suppress seizures
- Combat psychosis disorders
- Help fight inflammation
- Be a potent antioxidant
- Help fight certain tumors and cancer cells
- Alleviate anxiety and combat depression disorders

And with an estimated 55,000 deaths resulting from blood cancers every year, we can no longer sit on the sidelines as this killer runs rampant.

As bad as this disease is, the treatment is almost as bad...

Adding up to what can be *months* of nausea-inducing and physically debilitating chemotherapy.

These drugs are often times coupled with radiation treatments – a dangerous combination that can sometimes bring a patient to the brink of death before the doctors can even begin to get down to the real work of helping a patient become cancer free.

But what if I told you there was an alternative solution that could offer patients a 4x greater survival rate...

Researchers have been trying for decades to find alternative treatments to these debilitating and sometimes financially crushing therapies with little to no advancements... until now.

While the rest of the world is trying to find a

“Global Nutraceuticals Market to cross \$243 Billion by 2015, according to a new report by Global Industry Analysts, Inc.”

Global Industry Analysts, Inc.
A Worldwide Business Strategy & Market Intelligence Source

way to get into this lucrative industry – only Greenhouse Solutions (GRSU) is thinking outside the box in order to profit now – and to keep profiting no matter what happens with the legality of marijuana.

What this company has created is nothing short of amazing.

 **PROFIT POINT:** GRSU has just licensed a way to increase the efficacy of CBD by combining it with the power of probiotics (another legal and abundant nutraceutical) to create what could very well be, the most potent (*and patented*) delivery system their industry has ever seen!

This new delivery system is such a game changer – **GRSU** had to ensure their control over it by licensing these one of a kind patents – patents that can be worth MILLIONS in profits for the company.

But we'll get into how investors can pocket a windfall in a few minutes...

Before we move any further – I think it's important to introduce myself...

A Keen Eye And A Track Record Of Profits

My name is Tobin Smith, and as CEO of *NBT Equities Research*, it's my job to find the best and most promising profit opportunities for readers of my newsletter...

I've done pretty well for them – even with a few losing prospects sprinkled in – I've given readers a chance to make an unbelievable amount of money.

In my years as CEO – I've seen the gamut of life changing stocks come across my desk – and I can say this about **GRSU** right now.

Rarely have I seen a stock with as much potential to make investors rich and supply them with steady profits for years to come as I see with **Greenhouse Solutions**.

This company has so many proverbial irons in the fire (one of which doesn't even involve humans) – that we could see those potential 474% returns (and maybe a LOT more) sooner than later!

But before I show you everything **GRSU** has to offer...

Right now, I think it's important for you to see the PROOF as to why GRSU could be on the verge of those potential 474% returns... and maybe even MORE!

THE WALL STREET JOURNAL.

“Newer medicines have higher cure rates, with fewer side effects and shorter treatment durations than older drugs. Rapid scientific advances the past few years have fueled a flurry of acquisitions, licensing deals and partnerships among drug companies jockeying for position.”

—Wall Street Journal⁵

Natural Health Companies THRIVED During The Recession – And Look To Be Doing Even Better Now – GRSU Could Lead The Industry Through The 21st Century

Most people have no idea that while the rest of the world suffered through one of the worst recessions in almost a century – Natural Health was one of the few industries that thrived during the economic downturn.²

Why is that?

Because nutraceuticals are often viewed as “money savers” in tough economic times, as they offer consumers a chance to improve overall health and wellness, while cutting down on other medical expenditures.

This paradigm shift in attitude led to the entire industry experiencing steady growth throughout the recession – putting **GRSU** one of the most secure markets on the planet.³

Not to mention, a lucrative one...

Some of **GRSU**'s competitors have given investors the chance to pocket hefty gains over the past few years – and with everything **GRSU** has going for it – this stock could soon be doing the same.

And we're talking HUGE profits. Take a look to see how just a few of **GRSU**'s contemporaries have been able to perform... ***

- **USANA Health Sciences Inc (USNA)** – In just over 2 years, this company was able to take their shares from \$32.93 all the way up to \$113.98 – meaning early investors had a chance to pocket a **NICE 245% gain!**
- **Cyanotech Corp (CYAN)** – A few years ago, this company was able to take their shares from \$4.25 all the way to \$48 – ensuring that early investors were able to get the chance to walk away with an astounding **1,029% profit!**
- **Reliv International Inc (RELV)** – This company was able to take their shares from a bargain basement price of just 67 cents all the way to \$15.96 – giving early investors a shot to pocket an amazing **2,275% return!**

GRSU could easily follow in any of these company's footsteps – especially when word gets out about how potent their products are thanks to their new delivery system...

However, what I think is more likely to happen – is for **GRSU** to take a similar path to *Nature's Sunshine Products, Inc (NATR)*.

GRSU has a lot in common with this natural health supplement company – and if they can match NATR’s success – **GRSU** could soon find itself transforming into a \$230 Million steady runner.

GRSU has a lot going for it, and if they’re able to do the same thing – and all indications show that this is entirely possible – the shares you can buy today for less than 50 cents, could be worth a FAST \$2.37...

If you do the math – you’d see that’s about a 474% profit (depending on how early you’re able to grab your shares)!

This increased market cap is definitely within **GRSU**’s reach!

And now that you know what’s at stake – it’s time for you to know EXACTLY how **GRSU** can do it!

CBD & Probiotics: The Combination The Marijuana Industry SHOULD Have Been Looking For**

A few moments ago – I mentioned how CBD, or the therapeutic aspect of marijuana – is the reason that Wall Street has been going CRAZY over pot for the past 2 years (well, CBD and the fact that pot stocks have the potential to create a whole new generation of wealth).

The ironic thing is – CBD has ALWAYS been legal!

By separating the CBD from the THC (the psychoactive side of marijuana) – doctors and scientists have had access to this wonder compound for years – the only thing missing was an idea of how to profit from it...

Until now.

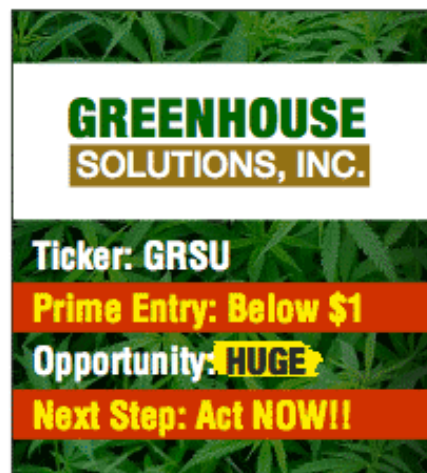

It seems like you can’t watch a medical program or read a medical news site without hearing or seeing the letters “CBD” – and while CBD is gaining a lot of buzz – most people don’t realize that you can have one (CBD) without the other (THC).

GRSU has decided to take this miracle of nature and combine it with another health booster – something that probably seemed crazy at the time – but could wind up being one of the biggest breakthroughs in natural health since the discovery of Vitamin B!

Probiotics have been on sciences radar since the early 20th Century...

These microorganisms play a crucial part in the digestion of nutrients and minerals – and many studies have proven that adding them to your daily diet could help you live a longer, healthier life.

But why?

Well, indigestible carbohydrates like oligofructose, galactooligosaccharides and inulin have been found to cause enhanced mineral retention and absorption by the human body. These carbohydrate compounds are able to bind and isolate the minerals and push them, unabsorbed through the small intestine, into the colon when the minerals are released from the complex and absorbed.

Probiotics act on these nondigestible carbohydrates – and increase absorption – giving anything they are given in conjunction with a much better chance of absorption...⁴

Including CBD!

Basically, probiotics act as a turbocharger for many of the things our bodies can and do NEED! And in the case of CBD – these microorganisms boost this natural wonder’s therapeutic aspects to a whole new level!

This new delivery system is sure to go down as one of the biggest breakthroughs in natural health in decades...

And could soon put **GRSU** on the path to untold profits! However, with something this big, GRSU knew they had to protect their discovery before all their wheels starting rolling...

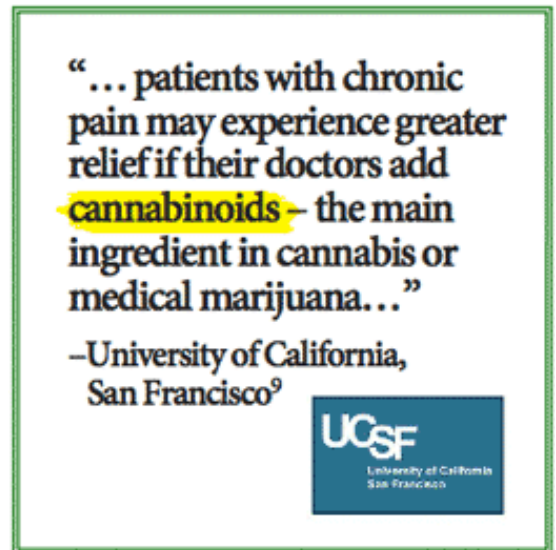

*And **GRSU** knew the best way to protect any moneymaking idea was to license the patent!*

For competitors – these patents are a proverbial “Tread Carefully” sign...

But investors see them for what they really are: profit- producing streams of revenue.

Are you starting to see why we could soon see 474% gains in our future? If not, keep going – what you’re about to see could change your mind...

Because when you realize just WHO the man is behind this incredible discovery – you may just want to drop this now and call your broker or login to your online trading account and grab as many shares of GRSU as you can comfortably afford!

How This “Cheese King” And Nobel Peace Prize Candidate

Could Make GRSU The Smart Move For Serious Investors

You may have heard Dr. M.S. Reddy's name mentioned on television or read it somewhere on the internet – especially if you like pizza – as in the realm of health science, Dr. Reddy is a veritable deity among his peers.⁶

Famously known as “Cheese King” due to his work in biotechnology-based ingredients for use in cheese and dairy products – Dr. Reddy is the current Chairman and President of American Dairy and Food Consulting Laboratories, as well as for International Media and Cultures (IMAC) – which has twelve manufacturing facilities in eight states.

When Dr. Reddy isn't being nominated for the Nobel Peace Prize (something that's been done every year since 2012) he's been busy becoming one of the world's foremost experts on one half of GRSU's new delivery system: probiotics.

Publishing over 70 scientific articles on dairy starter cultures, probiotics, pharmaceuticals, and complementary alternative medicines pertaining to probiotics, as well as writing books...

Saying Dr. Reddy knows what he's talking about when it comes to probiotics would be an understatement.

Besides probiotics, Dr. Reddy is also one of the leading authorities in the world in applied microbiology as it relates to dairy foods and pollution mitigation.

And if that's not enough to convince you this man's support could mean HUGE things for GRSU, think about this...

Over 100 of his company's patented high tech products are used in commerce all over the world.

Dr. Reddy has built a billion dollar business by helping to increase food production, reduce food spoilage and food prices – contributing over \$1 Trillion to the world economy through his lifetime...

And he, his reputation and his business contacts are being utilized to help bring GRSU to the forefront of their industry!

Just by having Dr. Reddy aboard ALONE could lead to this company to the promised land. However...

They've got more than just a veritable Natural Health legend...

They have a plan that could soon make them the BIGGEST name in an \$11 Billion industry!

**How Becoming The Biggest Name In A Hidden
\$11 BILLION Industry Could Spell HUGE Profits
For Early GRSU Investors!**

I know what you're thinking...

"How can an industry SO big be considered 'hidden'?"

The answer is: most people don't consider the money spent on animals as a viable money maker as people find it hard to reconcile the words "animals" and "profits".

They believe money is ONLY made in "human" industries – where what is being made, manufactured or produced is for humans to help humans in some way.

This couldn't be further from the truth...

You see, one of the world's most HIDDEN markets is the animal/pet industry – which clocks in at over \$100 Billion spent every year.⁷

That's a lot of money to spend on our furry friends – but to many households – pets are just as much a part of the family as the kids or grandparents...

So spending \$100 Billion on animal health seems reasonable. But what's even more amazing is that of that \$100 Billion spent...

\$16 Billion is being spent on pet medication. Incredible, right? However, the numbers get even more impressive when you keep in mind what **GRSU**'s innovation is being used for...

✓ **PROFIT POINT:** Of that \$16 Billion spent on pet meds – **\$11 Billion** of it is spent on medications to help manage pet pain levels!

GRSU's new *No Pain Pets* product – with their unique and patented probiotic boosted delivery system – would be vying for a huge piece of that \$11 Billion pie, with VERY little competition standing in their way!

Even if they could garner just 1% of this industry (which is as conservative as you can get in an industry with few competitors) – **GRSU** would be a \$110 Million company...

Making shares worth 216% MORE than what they're priced at right now!

However, if they could ultimately capture 10% to 30% of this hidden industry...

Which on the LOW end of that scenario – would make your profit and astounding 3,169%!

And this is just ONE part of **GRSU**'s business strategy!!

Are you starting to understand why I'm so excited for the profit potential from just this one stock?

"Animals feel pain as much, if not more, than we do, yet due to survival instincts they try to hide their pain."

– College of Veterinary Medicine¹⁰

GRSU Ramping Up Now – Don't Wait On This One!

Like any time-sensitive profit opportunity, hesitation is your worst enemy.

In the high-paced, highly lucrative world that trading has become, waiting just a day could mean the difference between making a killing... and just making a few bucks.

That's why I urge you now – don't wait till you read about **GRSU** in the *Wall Street Journal* or hear about it on *CNBC*, because if you do I can guarantee you one thing...

It'll be too late!

Ask any seasoned investor their secret to success, and I'm willing to bet if you could get them to actually give you a straight answer, you'd find that their answers would be eerily similar.

**"I'm saying this now:
GRSU is my #1 natural
health pick of the year!"**
– Tobin Smith, CEO
NBT Equities Research

As somebody who's spent years learning the secrets these people possess, let me tell you what their biggest key to success is. But I warn you...

Its simplicity may surprise you. And here it is:

Get the inside track of a quality company, get in early and cash out when you feel the stock has peaked.

Easy, right?

And by treating pain NATURALLY, this company could change the world as we know it! I'm convinced this company has all the right pieces in play to succeed..

But one of the other pieces to that profit puzzle could propel **GRSU** right past 474% and beyond!

With the ability to give investors the chance at 474% gains – and maybe MORE – **GRSU** is giving us the very real chance to walk away from the table when we want to and cash out rich!

But if you want to lock in your chance at those gigantic potential profits, there's one thing you CAN'T do...

Nothing!

Consider logging in to your online trading account and doing a little research on **GRSU** and the rest of their industry – I always encourage my readers to conduct their own due diligence on any stock I profile.

But please...

Consider starting your research as soon as possible!

Put This Down And Consider Acting On GRSU... NOW!!

Greenhouse Solutions has so many things going for it, there're almost too many to list!

By helping the world manage pain naturally with one of the most potent delivery systems ever created...

GRSU may be on way to stock superstardom.

Keep in mind that you could consider **GRSU** a "Pot Stock" – meaning it's bound to start getting attention from all over Wall Street when word finally gets out.

Attention that could lead to the shares we can buy now under 50 cents – to be worth more than 10 times their worth!

And by actively pursuing a large chunk of the hidden \$11 Billion pet pain medication market.

And **GRSU** may be the surest slam-dunk of any nutraceutical company to come public – EVER!

Right now, we may be eyeing 474% short term gains...

But this may just be the beginning for GRSU – as once they have all pistons firing – that 474% projection could double, triple or even QUADRUPLE!

With so many potential profits on the table...

Can you really afford to wait on **GRSU**?

To Your Future Wealth,

Tobin Smith, C.E.O.
NBT Equities Research

PS. Remember, this wouldn't be the first time that a tiny, yet to be discovered natural health stock made people rich! By combining CBD and probiotics into the most potent natural pain manager ever – could make **GRSU** one of the biggest pharmaceutical picks of the year – if not the past decade! That's why I can't urge you enough to consider grabbing shares today! Because by acting on **GRSU** today, you're securing you place at the table.

PPS. As we speak, **GRSU** gearing up to take their discovery to the world! Once word breaks of their breakthrough – mainstream investors could come pouring in! **This one stock could put 474% gains in your pocket... FAST!** If you haven't already, please consider acting on **GRSU** today... you could walk away 7 times richer!

A “TAKE ACTION” OPPORTUNITY – Here Is What To Do Now:

1

Call your broker and discuss how large a position of Greenhouse Solutions, Inc., **GRSU** you can comfortably own. Refer your broker to { this report. All the information you've read here is publicly available... easy for your broker to verify. Tell him about me... my credentials. When your broker has done his homework for you I predict he will agree that Greenhouse Solutions, Inc., **GRSU** is an opportunity that you must act on now. He will agree that its low price means you should immediately purchase **GRSU** at the market.

Or...

2

If you take care of your own account, go online now and verify what I have shown you here today... When you are done... I am confident that you will buy a block of Greenhouse Solutions, Inc., **GRSU** and you'll do it at a price that could allow you to multiply your money by as much as 10X... and meet with amazing stock market success.

*Profit projection based on Greenhouse Solutions Inc. (GRSU) potential of matching the \$283 Million market capitalization of fellow nutraceutical company, Nature's Sunshine Products, Inc (NATR). This would make GRSU shares, which are currently priced at around \$.40 worth \$2.84 per share. And increase of 712% from their current market capitalization.
