

**You Could Earn \$50  
Annually FOREVER  
For Every \$100 You Invest!**

**PRESTON CORPORATION**  
**( STOCK SYMBOL: PSNP )**

One of the world's highest-paid business consultants — who previously consulted for Creative Edge as its stock price rallied **2,800%** — is allowing outside investors to invest in him as CEO for the first time ever.

Literally just days ago, he joined **Preston Corporation** and outlined his plan to earn \$50 annual cash back for every \$100

he receives from early investors.

Within days, he will begin deploying capital  
and this opportunity will be gone forever.

Dear Reader,

You could be earning \$50 annually for every \$100 you have in savings.

It's an opportunity available today... but it will disappear within just a few days.

A fabulously successful business consultant has just become CEO of his first-ever royalty company...

...and he promises to earn you \$50 per year for every \$100 you invest.

The "Fixer." The "Shepherd." This man is paid millions for his transformative business skills, and he's generated countless profits for his enterprise clients.

He was instrumental in a 2,800% return for a public company that made headlines everywhere.

The accolades could continue. However, a unique moment has just arrived.

He found a company with so much potential that — for the first time ever — he deemed it worthy enough to dedicate himself to it full-time.

The Board of Directors originally wanted to hire him as a consultant. He is a consultant. He prefers to be paid a few million dollars, and then move along to the next project.

But when he learned about **Preston Corporation's** secret royalty deal flow, astonishingly, he asked if he could become CEO. They couldn't believe it, and voted him in immediately.

So for the first time ever, **the mastermind behind one of the largest stock rallies of all time has decided to become CEO of a public company himself.**

## MEET W. ANDREW STACK. (HE'S GOING TO MAKE YOU RICH.)

Senior Consultant for Deloitte & Touche, LLP, as well as his own consultancy, Andrew Stack Enterprises.

Member of the American Bar Association.

He's taken 100 companies public.

Over 200 companies have hired his consultancy.

Bachelor's degree in accounting. Juris Doctorate from the University of Tulsa.

Managing partner at investment bank Austin Capital, in charge of M&A, equity private placements, and corporate and private real estate finance.

The accolades go on and on, but he can introduce himself in his signature, no B.S., let's-getdown-to-business style.

### Preston Royalty - CEO Interview - 1

### Preston Royalty - CEO Interview - 3

So, now that you can see how Mr. Stack became so rich, let's talk about how he's going to multiply those riches 50% annually for himself and for his early investors (people like you).

**One of world's highest-paid consultants  
has made a career taking over 100 companies public.**

**Now as CEO for the first time ever,  
Mr. Stack could become a billionaire with **Preston Corporation**  
and he'd make his early investors millionaires in the process.**

# PRESTON CORPORATION REVENUE: \$2 MILLION TO \$98 MILLION WITHIN FIVE YEARS

Mr. Stack just joined **Preston Corporation** in April 2016. Within a few days, he planned the company's growth from \$2 million in revenue during its first year to \$98 million during its fifth year.

Year 1	\$2 million
Year 2	\$8 million
Year 3	\$20 million
Year 4	\$46 million
Year 5	\$98 million

He plans to sign royalty contracts that will pay him back 50% annually for every dollar he invests (more on royalties later). Within five years, he forecasts \$98 million in annual revenue.

So if you invest today — in Mr. Stack's brand new company — you could enjoy a share price that reflects this incredible growth.

Just imagine, you invest in **Preston Corporation** during Mr. Stack's first days as CEO. Then you hold onto your shares for five years **as annual revenues grow 4,900%** from \$2 million to \$98 million.

What would your shares be worth? Well, maybe you'd decide to just sell at that point! Sure, Mr. Stack could be doing a great job generating 50% annual returns, but your shares could then be worth 4,900% more than your original purchase price.

Consider another possible outcome. Shares of public companies like **Preston Corporation** oftentimes reflect their "Net Present Value of Expected Cash Flows." Well, here is a diagram of precisely what that would look like for **Preston Corporation**...

*(Notice the value of **Preston Corporation** increasing 5,400% from today's valuation within five years.)*

Before you get too excited, let's consider exactly how Mr. Stack will accomplish this growth.

**How many previous IPOs do your CEOs have?**

**How about... 100?**

**That's right, ONE HUNDRED IPOs.**

**The CEO of Preston Corporation (stock symbol "PSNP")  
has helped 100 companies go public...  
and he's already predicting \$98 million in annual revenue  
at Preston Corporation within five years!**

## **MAKE A FORTUNE IN ROYALTIES BY INVESTING TODAY IN PRESTON CORPORATION**

Once you've been successful in business like Mr. Stack and are looking for a way to generate cash flow from your savings, ROYALTIES are one of your safest bets.

No need to speculate on startups or gamble on unproven ideas. Royalty agreements guarantee you a fixed percent of the revenue generated from real-world operations.

No "hopes."

No "dreams."

Just cold, hard cash... from OPERATING businesses.

For centuries, the most predictable source of royalties has been gold mines. Now to be clear, royalty investors like Mr. Stack are not interested in "exploration," "development" or any other type of gold mines except OPERATING gold mines. Royalty investors are not interested in mining companies that cannot generate cash for their royalty payments.

***PRESTON CORPORATION IS NOT A MINING COMPANY!***

Mr. Stack is only interested in depositing checks into **Preston Corporation's** bank account, not managing a mine. He doesn't want to raise funds for drilling programs or permitting, and he certainly has no interest in speculative projects that could take more than 12 months to begin writing him checks.

He wants to cash \$50 checks for every \$100 he puts into a royalty deal. (He has reiterated this expectation many times since becoming CEO.)

For gold deals in particular, he demands a minimum mine life of 10 years. In other words, if he decides to invest \$100, he expects to receive at least \$500 back within ten years (ten \$50 checks)! Additional profit is a bonus, but that's just his minimum.

And if there's anyone who knows how to invest well in royalty deals, it's Mr. Stack.

A certified member of the American Bar Association, he was a lawyer himself. So no legal document, no matter how complicated, is getting past his keen eye.

And as a high-powered consultant, he mercilessly looks for only the safest royalty deals that — as he has already forecasted — can pay back \$50 per year for at least ten years from his initial \$100 investment.

\$50 back for every \$100 invested.

It's a high standard, but it's something that a successful investor like Mr. Stack can demand.

Did you see Mr. Stack's demeanor in the videos posted above? He's a hardened businessman with a strict focus on results.

He's already made his money. He's not in any rush to deploy it to risky projects. He can wait patiently for exceedingly rare, even perfect opportunities.

And he has connections (from his hundreds of past consulting projects) for very advantageous deal flow.

**Within days, the opportunity for a passive income stream will be closed.**

**Mr. Stack is about to announce a series of royalty deals.  
Research Preston Corporation (stock symbol "PSNP") before the  
press releases!**

# MMM, ROYALTIES. EVEN MR. WONDERFUL LOVES ROYALTIES!

## WORD OF THE DAY

### Royalty

noun | roy.al.ty | 1350-1400; Middle English  
*roialte* \ˈròi(-ə)l-tē\

**a share of a product or profit  
paid to another**

e.g. The entrepreneur pays a portion of his  
profit as a *royalty* to his early investors.

Kevin O'Leary loves royalty investments. The multi-hundred millionaire is known as "Mr. Wonderful" on ABC's hit television show Shark Tank. If fans of the show know one thing, it's that he absolutely adores royalties.

At **Preston Corporation**, Mr. Stack is excited about royalties for good reason, as world-renowned

investors like O'Leary understand. Royalties multiply his investment dollars while limiting risk.

When companies ask for funding, O'Leary often foregoes equity in favor of profit-sharing. For example, "I'll give you \$500,000 for zero equity. Just a 10% royalty."

Mr. Wonderful has explained that he loves royalties because they generate cash flow forever, even if the business is never sold or goes public. Royalties provide Mr. Wonderful with regular cash payments for as long as his companies exist.

### **Passive Income With *No Work***

**Mr. Stack could announce his initial royalty deals within the next few days.**

**Now is your only chance to invest in Preston Corporation before shares likely jump 100-200% and continue climbing.**

## **THE STAGGERING 2,800% RALLY OF MR. STACK'S PREVIOUS COMPANY**

If you follow Wall Street news at all, you've probably heard about Creative Edge (OTC: FITX).

A few months after Creative Edge had hired Mr. Stack, its stock price rallied 2,800% and became one of the largest public companies ever traded on North American stock exchanges.

Canada's largest newspaper wrote about the company when it was valued at \$360 million. Creative Edge even rallied higher to some \$440 million by its peak.

***...a staggering 2,800% increase. Creative Edge was suddenly worth more than \$360 million."***

**THE GLOBE AND MAIL**

# 2,800%!

Well, Mr. Stack's consultancy period has ended with Creative Edge, and he is now multiplying his fortune through royalties at **Preston Corporation**.

Mr. Stack is putting his fortune to work in order to generate 50% cash back every year. With such a high rate of return, plus the magic of compound interest, he will be multiplying his savings many times over.

He became CEO of **Preston Corporation** on April 1, 2016 — and has been rapidly arranging his initial royalty deals.

Soon, his close circle of colleagues will be fully invested, and he'll launch the company into international fame — like he did with Creative Edge before its 2,800% rally. As words spreads with news announcements and press coverage, **Preston Corporation's** valuation could double or triple within days.

*Check the share price of **Preston Corporation (PSNP)**. Within days, you probably won't see shares trading anywhere near this level.*

See, once you are as wealthy and successful as Mr. Stack, you want stabile, predictable, passive income so that you can enjoy your final decades of life.

Mr. Stack is the final inning of his career. He's amassed his fortune, created millionaires in his wake, and is setting up the passive income stream that will care for his family and investors for life.

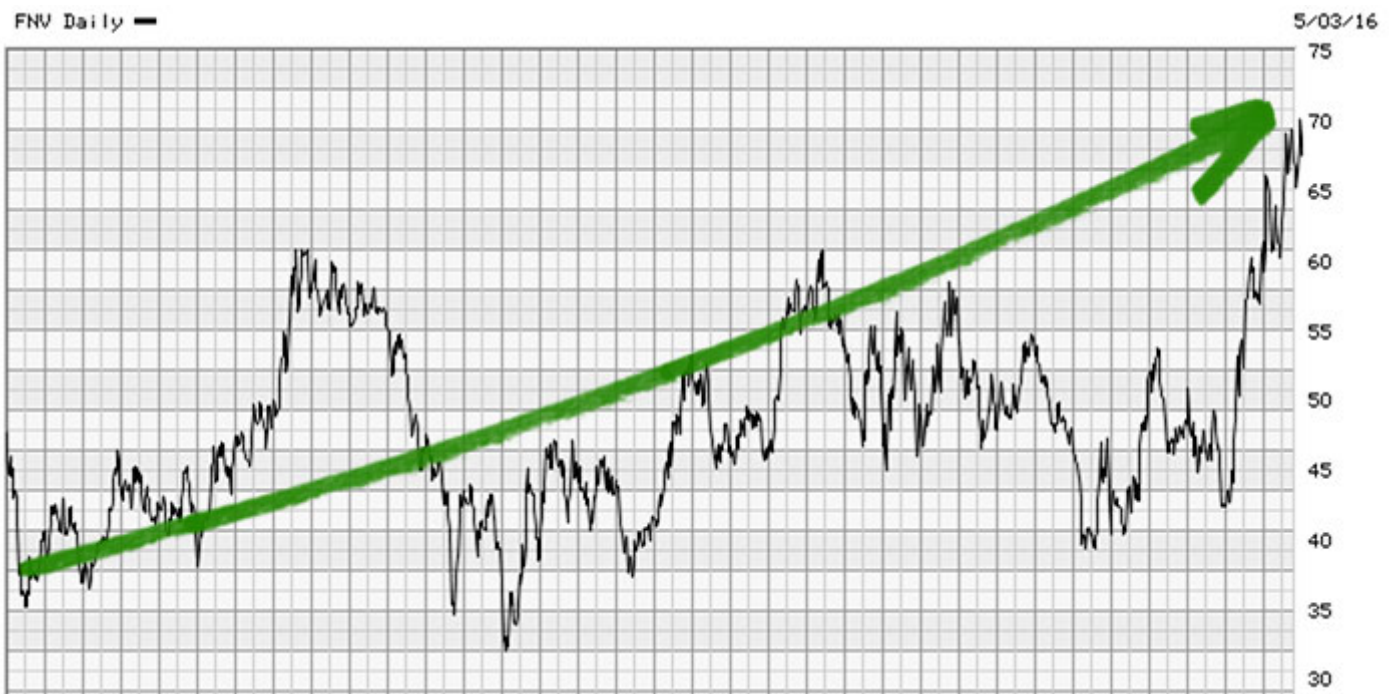

Royalties make it all possible.

# BUYING ROYALTY COMPANIES EARLY: A GREAT STRATEGY

As Mr. Stack knows, royalties are a terrific way to deliver long-term shareholder value.

Consider Franco-Nevada, a gold royalty company. It went public on December 20, 2007 at a \$1.2 billion valuation. Today, its valuation is \$10 billion — an increase of 833%.

In other words, if you had bought \$1,000 of Franco-Nevada's stock from the beginning, you would now own well over \$9,000 worth of stock.

Or consider Royal Gold, another gold royalty company, whose shares started trading below \$5 in 2002. Today, those shares are worth north of \$60 — an increase of 1,100%.

In other words, if you had bought \$1,000 of Royal Gold's stock from the beginning, you would now have well over \$11,000 worth of stock.

Of course, both of those opportunities are long gone.

Yet today, another opportunity is available to invest early in one of the biggest royalty companies of the century. Just think how much your shares of **Preston Corporation** will be worth in five years.

Mr. Stack projects revenues at **Preston Corporation** to grow from \$2 million to \$98 million annually within five years.

During his first month as CEO, he's already planned \$2 million in revenue.

On May 3, he announced a lease agreement in California that expects "to deliver under the royalty agreement a 50% return on investment per annum."

More royalty deals will be announced within days, and shares of **Preston Corporation** stock will never see price levels like today again.

*You want to be positioned before news about Mr. Stack's upcoming deals are announced!*

**If you wait a few months to invest in Preston Corporation,  
its stock price could have already risen by 100-300%.**

**Preston Corporation will still be an opportunity to earn passive  
income,  
but your upside will be limited at that point.**

**Right now is your once-in-a-lifetime chance to invest in Mr. Stack within his first days as CEO of Preston Corporation.**

# BIOGRAPHY OF A BUSINESS GENIUS

Just in case "2,800% gain" or "100 IPOs" have left any doubt, here is the full résumé of **Preston Corporation's** CEO, Mr. Stack.

W. Andrew Stack has extensive experience in investment banking, corporate and securities law, commercial finance, information technology, venture capital, business incubation, equity placements, strategic advisory services, merger and acquisition transactions, and SEC regulatory representation and compliance.

## Business Experience

As an attorney specializing in the public and private securities markets, Mr. Stack has represented more than 200 public companies, and has taken more than 100 companies public, thanks in large part to his years of expert managerial and consulting experience. Through his expertise, he has been able to bring the operations of many different kinds of businesses to profitability within the first two years of operations.

He has also structured and provided construction, interim, and permanent real estate financing to developers, owners, and operating companies in the form of straight debt, hybrid debt, and bridge loans.

He co-founded Stackcap Equity, serving as principal in charge of privately-placed corporate and real estate finance ventures, equity private placements, and mergers and acquisitions. He has been successfully involved with venture-backed public offerings and venture capital for two decades.

Mr. Stack has a great deal of experience with new business ventures, having principally formed several startups, and consulted with countless others on their launchings and subsequent business growth.

## Achievements and Awards

Mr. Stack is an active member of the Oklahoma and American Bar Associations. He has been awarded the Certificate of Achievement in Entrepreneurial Law from the University of Tulsa College of Law. He has authored journal publications on entity formations and new business startups.

## Career Highlights

- Founded Andrew Stack Enterprises, LLC, an entrepreneurial consulting firm specializing in startup businesses and corporate re-engineering.
- Served as Senior Consultant for Deloitte & Touche, LLP on Department of Labor issues.
- Served as Managing Partner of Austin Capital, an investment banking firm.
- Was a Managing Partner in Stack-Forman, LLP, a boutique law firm offering services covering corporate and securities law, commercial finance, information technology, venture capital, mergers and acquisitions, and SEC regulations.

## Education

Bachelor's of Science in Accounting from the University of North Texas

Juris Doctorate from the University of Tulsa

***INVEST IN THE BEST...***

Net Profit	\$832,000	\$4,704,000	\$12,384,000	\$28,627,200	\$61,849,600

# CONCLUSION

He previously served as counsel to over 200 companies, including 100 companies that went public relying on his advice.

He was behind a 2,800% rally at Creative Edge.

He is one of the world's highest-paid consultants and would certainly not be excited to spend his time at a company where he did not have the opportunity to make hundreds of millions, if not billions of dollars.

Normally he consults for a fee, which has made him a very wealthy man.

Yet when the **Preston Corporation** opportunity came across his desk, Mr. Stack realized that this company was a once-in-a-lifetime opportunity to take his fortunes and — welcoming outside investment during a limited time period that is occurring right now — begin a stream of royalties that could compound everyone's money +50% annually.

For the first time ever, Mr. Stack decided to become a CEO of a public company and lead **Preston Corporation** to greatness.

A lifetime stream of passive income.

In full view of the public.

A magnum opus for himself and his early investors.

The biggest move of his already massive career.

Will you join him — before the rest of the world finds out what has happened?

Once Mr. Stack starts announcing his royalty deals, it will be too late.

Too many people know about his track record. They'll pile into the stock and bid up prices by 100-300% easily.

The time to act is now. Ahead of the herd.

Enjoy "the quiet before the storm" while you make your final decision... well, quiet for a day or two.

Soon (even hours from now), **Preston Corporation** could issue a press release about one of Mr. Stack's royalty deals that could double the stock price instantly.

***Preston Corporation Welcomes You To Potentially***

**Earn \$50 Annually FOREVER  
For Every \$100 You Invest!**

**PRESTON CORPORATION**  
( STOCK SYMBOL: )  
**PSNP**

*Sincerely,*

Shawn Roberts

Editor, ***The Profit Letter***

*P.S. Mr. Stack projects \$2 million in revenue this year. Next year: \$8 million. That's a three-fold increase. Even if you only hold onto **Preston Corporation** for 12 months, your shares could rally 300%!*

*P.P.S. Take a look at the stock chart of FITX during early 2014 when and it was rallying 2,800% while Mr. Stack was engaged there. You'll see the potential of **Preston Corporation** pretty clearly.*
