

EXCLUSIVE REPORT: Under-the-Radar Drone Company Debuts, a First Opportunity
in the Largely Private-Held Drone Industry

Privately-Held Drone Companies Have Given **Investors Returns In
Excess of 581% Per Year**. Could **Drone Guarder (DRNG)** Be...

**The Little Known Stock
that FINALLY LETS YOU IN
on the Market-Crushing,
TRIPLE-DIGIT GROWTH of
the Drone Industry!**

DRONE GUARDER
STOCK SYMBOL **DRNG**

Until Now, Only Wealthy Private Investors Have Benefited from the **Massive Gains in Sales, Revenue and Profit of Drones.**

Almost No Drone Companies are Publicly Traded,
OSTRACIZING Regular Investors from this Lucrative Industry.

THIS REPORT EXPLAINS Why "Little Guy Investors" Have a Once-in-a-Lifetime Opportunity for **MASSIVE RETURNS** with **Drone Guarder (stock symbol "DRNG")**

Dear Reader,

Annoyed by those flying, buzzing drones overhead?

Oh yes. Drone sales have been truly astonishing. With equally flabbergasting profits.

Just imagine if you had invested in one of those companies a couple years ago. Oh wow.

How many thousands of dollars would you have made?

Yes, drone companies have certainly delivered massive gains to their investors. But here's the secret: the industry's valuation is **STILL ACCELERATING TODAY.**

It's NOT too late. Actually, drone sales in 2017 will dwarf 2016 according to every single estimate out there.

Yes, all those flying, buzzing drones you see overhead in your day-to-day life are already delivering **GREEN PROFIT** to investors, and you've been missing out.

It's not your fault.

Most drone companies are privately held--limited to accredited investors only.

But now, one company could deliver the **SAME ASTOUNDING RETURNS** for any investor with access to a U.S. brokerage account:

DRONE GUARDER

STOCK SYMBOL: DRNG

2017 is shaping up to be '*the year of the drone.*'

Many investors have doubled and in some cases even tripled their money during 2016.

Top drone stocks are pushing triple-digit percentage returns in the past twelve months.

Venture capitalists are scrambling to invest in startups involving drones.

But if drone companies as a *whole* are doing well, **security** companies that develop drone tech are doing even better:

For example, NSSC has gained **85%** over the past 12 months and shows no sign of slowing down.

Northrop Grumman, one of the world's biggest defense companies and drone pioneer, is up **300%** over 5 years.

And 'small cap' companies in the drone space are generating big, quick profits for investors almost daily.

What's the top industry that uses drones? Security.

Drones make the perfect surveillance system, an 'eye in the sky' that lets users keep watch on anything.

But while there are plenty of companies building drone security tech for government and big companies, there aren't many doing security for homeowners...

...until now!

We're alerting you to a company that's
perfectly positioned to dominate drones in the home security space.

A company that has developed one of the most powerful mobile apps for use with drones.

A company that has built a complete home security system around the world's #1 best-selling commercial drone.

The company is **Drone Guarder Inc. (OTC: DRNG)**, and it could inject your trading account with massive profits this year.

You'll learn why in just a minute.

But first, you need the *incredible facts* about...

...The "Easy Money" Industry that Wealthy Investors Have Been Trying to Keep Secret...

Consumer drones have exploded in popularity since 2012.

Sales are way up.

Investments are way up.

Share prices of some manufacturers have *shot through the roof*.

Check out the returns of these somewhat drone-related companies in the "Security & Defense" industry performed -- and just imagine how much better their returns would be if they were 100% focused on drones.

Sources: Teal Group, BI Intelligence Estimates, Michael Toscano

Northrop Grumman (NYSE: NOC): Up a massive, market-beating **300%** since 2012.

Napco Security Technologies (NASDAQ: NSSC): Gained an enormously market-topping **85%** in 12 months.

OSI Systems Inc (NASDAQ: OSIS): Up **27%** this year alone.

Here's Why Drones Could Inject Some Easy, Fast Returns Into Your Account During 2017

To get a sense of just fast **the market is growing**, just look at these mind-blowing facts:

Experts are saying the drone market could be worth **\$127** billion by 2021.

7 million drones could be shipped in the U.S. by 2020, compared to 2.5 million in 2016.

DJI, the world's largest drone company, was valued at **\$8 billion** based on its latest funding round.

According to AngelList, over **\$1.9 billion in venture capital** has been invested in drone companies to date.

By some estimates, up to **600,000** commercial drones will be in the air by 2018.

Drones are seeing **major adoption** in the real estate industry, largely for security purposes.

Drones saw a **63% increase in sales** from 2014 to 2015.

Prices are coming down, with beginner drone kits starting to become available for around \$100--a price anyone can afford.

Too long didn't read? Read this:

*The drone industry is exploding right now, injecting **massive returns** into the hands of investors.*

... And It's Growing Even Faster This Year!

Read On to See How Drone Guarder (OTC: DRNG) Is Carving Out a Mega-Lucrative Niche in the Drone Industry that All Major Players Have Overlooked

You might recall that in 2016, the Federal Aviation Administration (FAA) released "Part 107." This clarified regulations about how drones are to be operated, providing clarity on 'grey areas' that previously spooked investors. The best news from Part 107?

That **drone operators don't need a pilot's license.**

This cleared the path for *massive adoption of drones* for both personal and commercial use.

Now, individuals and businesses can use drones for personal enjoyment, business, and even security.

And **Drone Guarder (OTC: DRNG)** is taking full advantage of these developments.

READ ON TO DISCOVER how Drone Guarder is pioneering the use of drones in home security--and what that means for your future profits this year...

DRONE GUARDER
STOCK SYMBOL: DRNG

Drone Guarder Makes the World's First Truly Comprehensive Drone-Based Home Security System

Drone Guarder develops a complete home security system based on drone technology.

Its system is based on 3 components:

A powerful mobile app with control, monitoring and alert systems.

Sound and motion sensors installed in the users' home.

The physical drone itself: DJI's Mavic Pro, a small drone equipped with high-performing 1080p cameras.

Drone Guarder gives users the ability to survey their property from anywhere.

With their drone in the sky, they can watch what's happening on their property.

They can fly the drone manually with the built-in mobile app controls...

... Or, put the drone on patrol mode and let it fly manually.

Why is this important to you as an investor?

It's very simple: Experts are saying the drone market could be worth \$127 billion by 2020, up from just \$2 billion in 2016.

A **huge chunk** of that will be the in the home security industry.

Home security itself is a massive industry; according to a report by Zion Market Research, it does over \$2.5 billion a year in sales and that's set to surpass \$7.9 billion by 2021.

Drone Guarder is set to claim a huge portion of those revenues, and even expand the market to new heights.

There's no two ways about it.

If you want a stock with serious upside potential, consider some DRNG for your stock portfolio today.

6 REASONS TO CONSIDER DRONE GUARDER (OTC: DRNG) RIGHT NOW

1 The drone market is *exploding*.

Drone adoption is exploding just about everywhere.

Use is gaining increasing by 2 million units a year.

Businesses are adopting drones for everything from security to product delivery to real estate sales.

According to experts, **the drone market could be worth \$127 billion by 2020, up from just \$2 billion in 2016.**

And yet despite all of this, there still isn't a clear market leader in drone-based home security. It's a niche that one company will fill sooner or later, and **Drone Guarder** is by far the best positioned, with the most comprehensive drone-based security system ever developed.

It could spell millions of dollars in **potential revenue** for a company that's currently priced as just a startup... A potentially massive opportunity for an enterprising investor to scoop up shares at a bargain price, and see them soar as Drone Guarder takes over the dominant position.

2 Almost every company in this industry is seeing huge returns.

Other companies that manufacture drones for the security industry are delivering huge returns to investors.

Northrop Grumman (NYSE: NOC): is up a **colossal** 300% since 2012.

Napco Security Technologies (NASDAQ: NSSC) has gained a market-crushing 85% in 12 months.

And there are even more impressive examples if you include companies like Elbit systems (up 300%), a military contractor that is seeing massive growth in its drone business.

But here's the key part:

Most of these companies are supplying drones for industrial use.

There is **still** not a market leader in the much larger consumer security drone industry.

And **Drone Guarder** is perfectly positioned to become that market leader.

3 The home security industry is rapidly expanding and desperately needs drone-based solutions.

The home security industry is already massive.

Doing over \$2.5 *billion* a year in sales, it's a huge market with plenty of providers.

But if the home security industry seems massive now, that's nothing compared to where it will be in a few years.

It's expected to grow to a massive \$7 billion a year--and that's *not even factoring in the potential growth that could come from innovative companies like Drone Guarder.*

Even by just riding the natural growth in the home security industry, a company could bring in tens of millions of dollars a year in revenue.

But **Drone Guarder** is actually **expanding** the market, providing drone solutions to a market where they still haven't seen big penetration.

4 DRNG is the first company to develop a fully functioning drone-based home security system.

There are plenty of drone companies.

But what **Drone Guarder "DRNG"** delivers is something completely different.

A complete, drone-based home security system, including:

- Home surveillance.
- Property patrolling.
- Motion and sound detection.
- Options for issuing alerts to intruders.
- And much more.

The potential market for this kind of system is unlimited.

Almost everybody who is interested in home security is a potential customer.

And with the home security industry expected to grow to **\$7.9 billion** by 2021, that spells huge potential profits for investors in **Drone Guarder (OTC: DRNG)**.

5 Drone Guarder is designed to work with one of the world's most popular drones--which helps massively with adoption and marketing.

Drone Guarder (OTC: DRNG) currently works with DJI's Mavic system, the biggest selling personal drone system in the world.

(Mavic Pro is by far the #1 best-selling consumer drone system.)

There are thousands of users already using the Mavic Pro -- many of them the exact customers that Drone Guarder is targeting.

By designing the Drone Guarder app to work with the Mavic Pro, the company has made marketing and adoption dramatically easier.

Anybody with a smartphone can download the Drone Guarder app.

And anybody with a Mavic Pro can get the *entire system up and running in a matter of minutes.*

And it doesn't end there.

Drone Guarder is looking to partner with other major drone makers to get Drone Guarder working with other drones.

The sky is the limit.

6 Major potential for a buyout by a larger company at a premium valuation.

Another potential quick profit source for **Drone Guarder (OTC: DRNG)** investors is a buyout.

Drone Guarder is the only company with such a comprehensive drone surveillance system.

It's the only system that lets users control the entire security process -- surveillance, alerts, patrolling, notifications -- from a drone and app.

The big security companies are still years from developing technology like this.

That spells big potential interest in Drone Guarder's technology, which could lead to a buyout at a premium valuation.

Once the bigger security companies get wind of the billions in potential revenue in the drone-based security industry, the company could potentially be bought out for 10 times its current market valuation, or more.

CONCLUSION

THE BOTTOM LINE

**If You Want To Ignite Your
Trading Account With
Red Hot Returns, Consider
DRONE GUARDER
[Ticker Symbol: DRNG]
Now!**

In your decades of studying and trading the market, you've never seen an opportunity like **Drone Guarder (stock symbol "DRNG")**.

This company is perfectly positioned to carve out a niche in one of the world's fastest growing industries, and **generate massive returns for early investors.**

Projections are for the drone *industry as a whole* to grow to \$127 billion by 2021, while the commercial segment will grow to \$12 billion.

This presents a *massive, explosive market* for **DRNG.**

Each year, *thousands of new customers are exposed to drones for the first time.*

Over 7 million drones could be shipped in the U.S. by 2020, compared to 2.5 million in 2016.

Venture capitalists are pouring money into drone startups, with some estimates saying \$1.9 billion in funding was invested in 2016 alone.

Unfortunately, you probably can't invest in private startups until they go public.

And with top drone companies like DJI still not publicly listed, *direct* drone plays are hard to find.

This makes DRNG the ***perfect, direct opportunity for investors looking to profit from drones specifically.***

The company is currently trading for just a tiny valuation.

This provides an *excellent opportunity* to pick up stock at an early stage, while the company still has nearly unlimited room to grow.

CONSIDER DRNG WHILE IT'S STILL CHEAP, IT COULD BE
THE SINGLE BEST INVESTMENT YOU MAKE THIS YEAR!
