

The Election of Donald Trump As President Could Mean The Return of Millions of U.S. Manufacturing Jobs – And With Shipping and Transport About To Surge, EPTI Could Be Perfectly Positioned To Put Up To 1,118% In Your Pocket!

# THE TRUMP EFFECT

**American Industry Is About To Change...**

Recently Discovered EPTI  
and Their Groundbreaking  
**Flexitank Technology** →  
Could Soon Return You  
**HUGE Gains**  
As America Enters Into A  
NEW Manufacturing BOOM!

The "Trump Effect" is already creating a buzz on Wall Street! His dedication to American business could soon push shares of EPTI through the roof! Act now and you could grab quadruple-digit gains!

The Trump Effect...

Since it was announced that Donald Trump won the election for the President of the United States – American business, across the board, has been humming.

Some say it started when with the official result... Others say it started when he preserved over 1,000 American jobs before he was even sworn in...

Regardless, there's no denying the impact President Trump has already had on commerce both here at home and around the globe.

The Trump Effect is real – and for those that know what they're looking for – it could soon be the reason you experience FAST, quadruple-digit profits...

And recently discovered **EPTI** could be the one stock that gives it to you!

## **A Revolution In Transportation!**

### **Why EPTI's Groundbreaking Shipping Technology Could Soon Have You Rolling In Profits!**

**EPTI's** newest innovation, The LIQUIRIDE™ Flexitank makes shipping liquids affordable and easy by allowing them to be transported in standard trailers! This is a game changer and may change shipping forever!

If products and goods are the heartbeat of both American and global commerce – than the transportation of said products are the life's blood of the economy.

Men like Cornelius Vanderbilt and Henry Flagler knew this – and used that knowledge to build massive fortunes from railroads that have kept their families living in comfort throughout the past century and a half.

While many think that profit window on goods transportation shrunk a long time ago – you're about to discover that there is still a LOT of money left on the table for those that know where to look.

The problem with the shipping industry isn't the fact that people are shipping less or not manufacturing a lot of product...

It's the fact that there haven't been too many advancements made to transport and ship these goods, especially liquid products, that has kept this industry stale...

If you wanted to ship bulk liquids, your choices weren't that appealing: either put your products in barrels and drums that take both a lot of man power to fill and load... or you could splurge on a tanker truck that is often way too big (and expensive) for the amount of liquid being shipped.

All of that is about to change...

**EPTI** patented bulk liquid shipping technology – the LIQUIRIDE™ flexitank – practically makes all other flexitanks obsolete.

The LIQUIRIDE is the most advanced liquid shipping method of its kind...

These single-use encased bladders can transport 7500 liters of liquid each which allows for multiple loads in each trailer, with a maximum load amount of about 22,500 liters. **This is Multiple Times MORE than the standard shipping methods now.**

This is BIG news for manufacturers.

Being able to ship more of their products for less money and more conveniently would put them at the very top of their industry in almost anybody's opinion...

Because by doing so, it could also put them in the driver's seat of their niche for the new boom in American manufacturing!

That's why ***Profit Play Stocks*** has forecast a **big potential** for shares of EPTI because we fully believe they can match the profit potential that the ***Kirby Corporation (KEX)*** did a few years ago when they became HUGE in the domestic tank barges and bulk liquid transport.

**EPTI's** revolution in bulk liquid transportation could make them the only game in town as American manufacturing explodes once again – or at least they may be the most appealing choice when it comes to shipping liquids in the years to come.

***The potential for this company is BIG and profit potential even BIGGER – meaning this one stock could change the life of those that have the foresight to act fast!***

Please, start your due diligence on **EPTI** now... before it's too late.

## What Makes EPTI The Right Stock At The Right Time

The Trump Effect...

While the man may be polarizing – the effect that his presidency is already having on both global and domestic business is already easily measurable.

Many believe that Trump's promise to bring more manufacturing jobs BACK to the US is already being kept – as evidenced by his ability to save jobs that were headed overseas and by his continued effort to lure more companies to return their manufacturing back to the US.

More American manufacturing jobs is great for the economy, the more being produced, means the more goods being shipped...

Which is NOTHING but good news for EPTI.

Their LIQUIRIDE flexitank technology is one of the most effective and economical ways to ship and transport bulk liquids and could soon become manufacturing's go-to choice for their shipping needs.

When it comes to success in the markets – having a quality product will take you far – but there's something even MORE important than quality...

And that's timing.

Right now, with America on the cusp of a new manufacturing boom, it's the perfect climate for EPTI to make a big push in their industry.

And by taking advantage of this advanced notification, you could be securing your chance to profit BIG!

Don't wait!

***Consider grabbing shares of EPTI today!***

# EPTI – The New Standard In Shipping!

**B**y now, there are probably a few questions floating around your head about EPTI's Flexitank products. One of which is most likely...

*"What is a flexitank?"*

A flexitank stands for "flexible tank" – it's a kind of storage receptacle for large amounts of liquids, such as water, juices or oil...

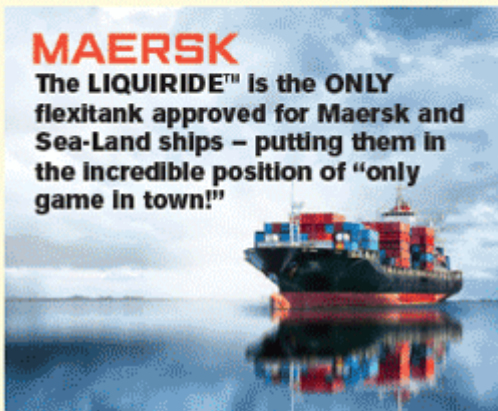

These flexitanks are lighter, easier to move, more malleable, as well as quicker and easier to set up.

Not only that, they have the same capacity as a steel tank – but at 1/10th the weight – making flexitanks a viable alternative to the traditional methods because they cost so much less to produce and ship...

And EPTI may make the "Rolls Royce" of flexitanks.

EPTI has designed a "total flexitank system to ensure the safe transport of bulk liquid cargo."

**MAERSK**  
The LIQUIRIDE™ is the **ONLY** flexitank approved for Maersk and Sea-Land ships – putting them in the incredible position of "only game in town!"

What makes the LIQUIRIDE™ even more unique is the fact that they're single use, meaning there's no need to return empty containers, no need to wash them out and risk contamination and...

LIQUIRIDE™ is the **ONLY** flexitank that can be used with refrigerated containers! Even more...

**The LIQUIRIDE™ is the ONLY flexitank approved for Maersk and Sea-Land ships – putting them in the incredible position of "only game in town!"**

Can you see why people are getting excited over EPTI?

By becoming THE name in flexitanks – they could soon make their competition obsolete!

Do yourself a favor – start your due diligence on EPTI today before mainstream Wall Street catches on!

***It could be your only shot to grab QUADRUPLE-DIGIT 1,118% this year!***

EPTI products are designed, tested, and certified to meet the rigors of transport by rail, ship, and over the road transport.

Their BIG Red Flexitanks are manufactured to the highest quality standards and manufacturing processes and are 100% tested with proprietary testing equipment for quality control purposes.

EPTI's patent-pending LIQUIRIDE™ flexitank gives manufacturers the unique ability to transform a 40' or 53' trailer into a non-hazardous liquid hauler... which cost considerably less than tanker trucks.

## Why EPT May Have ALWAYS Had The Potential For HUGE Returns– No Matter Who Became President!

How **EPTI's** multi-billion dollar customers could have early investors sitting on a veritable gold mine of profits!

Whether it was Trump or any other candidates in the White House – EPTI was primed for success on Wall Street regardless of who won – as their customer base could soon have their revenues more than DOUBLING!

The Trump Effect is real – and it doesn't take a Harvard business professor to see the financial impact that this man has had upon our constantly shifting economy.

However...

**EPTI** had already paved a pathway to financial success before the election even started.

You see, it doesn't matter if that next manufacturing boom happens now or doesn't – what matter is **EPTI** has already secured contracts with one of the biggest shipping and transport companies around...

The \$68 Billion Maersk, a true pillar of their industry.

It's often been said that the true profit potential and revenue growth of a company can be measured by looking at those interested in entering into business agreements.

Like any new company, when **EPTI** first came onto the cargo shipping scene, they sought out customers and business agreements with as many companies in as many different regions as they could in order to help get their line of flexitanks out there.

And they were able to secure some contracts with a few manufacturers – and steadily built their business to become one of the top flexitank producers in their industry.

They've done well over their short time in business and building a name by **collecting revenues of over 19 Million in 2016, they are projected to increase to over \$34 Million in 2017** – **EPTI** has been on a steady climb towards success.

Had nothing changed from there – 2017 would most likely see another modest increase in revenue...

But that all changed when they entered into an agreement with the world's largest shipping company.

Since signing this shipping titan, **EPTI** has projected their 2017 revenues to come in **around \$34 Million!**

This is big...

And one of the biggest reasons why it's easy to see this company could have succeeded even without the benefit of the Trump Effect.

However, now **EPTI** could reap the rewards of that coming manufacturing boom!

Are you starting to see why we could see 1,118% gains for those with the foresight to get in early on this company?

Not only do they have a quality product that is sought after by some of the biggest names in shipping...

But they've got a product that nobody else in their market can compete with!

Their LIQUIRIDE™ flexitanks are a true game changer and puts them at the head of the line in what could be another big surge in American manufacturing.

I said earlier that I believe they can match one of their peers, *Kirby Corp* – with a 1,118% gain...

That projection may be an UNDER estimation when the history of 2017 has been written.

This one stock could be your ticket to boundless wealth!

## **Destined for Greatness: How Becoming A Global Brand Puts Money In Your Pocket**

Right now, shares of **EPTI** are moderately priced – but that might not be the case for long...

EPTI's newest (and **BIGGEST**) customer, Maersk has been making a lot of waves in their industry lately by actively going after some of the smaller fish in their pond.

Recently acquiring Hamburg Sud for a whopping \$4 Billion – Maersk is eyeing other rivals such as HMM and others to add to their already 700 strong shipping fleet.

**How EPTI Investors Profit As Their Billion Dollar Partner Becomes EVEN BIGGER**

This trend could soon put even MORE money in EPTI shareholders' pockets...

Why?

By acquiring more and more of the smaller shipping companies – not only could they soon be THE biggest name in shipping and transport...

**But they could also soon find themselves in desperate need of ALOT more EPTI flexitanks.**

The Trump Effect may soon bring this undiscovered company a lot of attention, as well as many new customers.

This is great news for early investors, as I'm sure we'd be seeing all that attention and potential new business translate to a nice price jump in the coming months...

But for those who decide to wait...

Or maybe even pass on the opportunity to get into this company before it explodes, might find themselves on the outside looking in.

The reviews are in...

**EPTI's** flexitank technology is an undeniable success.

With Billion dollar customers like Maersk signing on – it might not be a matter of “if” this company will build a new generation of Millionaires – but when!

## Taking Advantage Of The Trump Effect: What Jumping On To EPTI Could Mean For You!

President Trump's dedication to American business is already impacting our economy. People are making money hand over fist – and you should be one of them. **EPTI could be your ticket to titan-sized profits!**

As any financial expert will tell you, the secret to successful investing isn't that big of a secret at all.

Your path to investment success lies in finding that one winner out of thousands of potentials before anybody else even hears about it or how this company is changing the financial landscape.

Of course, this isn't anything you haven't heard before, but...

What many of those experts forget to tell you, or won't tell you, is that every company – even the big boys like *Apple*, *Google* and a host of others – begins at ground zero.

**EPTI Has Built an \$19 Million a Year Business Because of Clients and Partners Like These...**

Every Blue Chip big boy you've ever heard about, was at one time, a tiny unknown, just looking for a glimmer of success.

Sure, these companies had the potential to become the giants they are today...

But almost every company that becomes public has "potential" – or else they wouldn't have gone public in the first place.

The hardest part of investing is picking those companies that can turn that potential into profits...

And out of the thousands upon thousands of companies that have tried – only a select few have ever reached the echelon of true a Wall Street powerhouse.

**EPTI** has already taken the necessary steps that could turn their company's profit potential into our next quadruple digit winner.

**Their partnership with the world's largest shipper, could literally double their revenue over the next coming year – and being on board now could have you sitting on the types of gains most investors only dream of.**

But it all comes down to timing...

By taking advantage of this information now, before the rest of the world knows about **EPTI** – you'd be getting in at the perfect time.

And that's the goal of any investor...

Getting in before the stock explodes. It's truly the equivalent of a winning lottery ticket.

The numbers have already been chosen...

But it'll be up to you to cash it in.

## **Why We're Predicting EPTI To Clean House And Return Investors 10 Times Their Money Back!**

Revenue is the key to any successful business...

And that success often translates to higher stock prices.

That may sound obvious...

But many new businesses often fail within the first 5 years often because revenues are not enough to keep the business going. Business owners have to make sure that they can make more money than they're spending.

This rings true whether you're talking business or personal finances...

Yet so many fail at this task.

But how do you guarantee success?

The answer is easy...

By making sure you have a solid business plan, a crack management team and a solid revenue stream – you’ve just taken the most important step to ensure you not only survive – but thrive.

But again, this isn’t anything new...

However, if you could figure out how to make money multiple ways with your one product, you could just ensure that your new business is well on its way to many, many years of big profits.

And that’s exactly what **EPTI’s** management has done, they’ve come up with a three-pronged business attack, which could very well allow them to eventually become a Billion dollar business.

We’ve already touched on one of **EPTI’s** strategies, building agreements with steamship lines – as evidenced by their working relationship with one of the biggest shipping companies in the world – *Maersk*.

One of their other strategies is to also target large commodity shippers who provide their own logistics – meaning they’re gathering a quiver full of businesses who ship their own products on their own transportation.

These are the people who have traditionally made up **EPTI’s** customer base – their current list of customers includes: ***Georgia Pacific, Arizona Chemical, Ingredion, Archer Daniels Midland and Phillips 66.***

These and other companies like these are what’s allowed **EPTI** to build themselves into an \$19 Million a year business. The third prong to their business attack is to partner with large global logistics companies like: *BDP Logistics, Agility Logistics, Panalpina Logistics and DHL.*

These partners work with **EPTI** to bundle the price of logistics and Flexitanks into a single source solution for the customer...

Giving **EPTI** yet another way to sell their top-of-the-line flexitanks to the transportation world.

It's not hard to see why **EPTI** could be a future global powerhouse and on the verge taking Wall Street by storm.

And now is your opportunity to ensure your place among the first investors in this veritable cash register of an investment...

*Consider buying shares in **EPTI** now and watch as their three pronged business plan takes hold, potentially catapulting your shares through the stratosphere.*

## **Discovered: How EPTI Could Soon Dominate This Virtually Untapped \$60 Billion Market...**

Still one of the most economical and efficient ways to transport goods – the railways are yet another shipping market that **EPTI's** flexitanks could soon dominate! There really is no end to how **EPTI** can help you profit!

Up until now we've talked extensively about how **EPTI's** flexitanks can change the way the world transports bulk liquids...

We've talked about how the containers can be hauled with trucks and shipped overseas...

But what we haven't discussed is one of the world's most economically viable transport systems – the railroad.

The first steam engines appeared in the early 1800s – and quickly became

### **From The Editor's Desk:**

## **Why I Believe EPTI Will Be My Next "10 Bagger"!**

Hi, I'm Miles Cohen, Editor of Profit Play Stocks, and I've devoted my life to making my readers money in some of the worst economic atmospheres the modern world has ever experienced.

I've been able to consistently help them make money by learning how the market ticks – and I've noticed a trend in business since Trump won the election that could spell big profits for those that are able to grab shares in the right company...

I believe that right company is EPTI.

By taking advantage of a coming manufacturing boom – I'm 100% certain that they've got the right product at the right time for this new and explosive economy.

I think they've hit a bull's eye with their brand of flexitanks – in particular their patent-pending LIQUIRIDE™ product that could change bulk liquid shipping as the industry knows it!

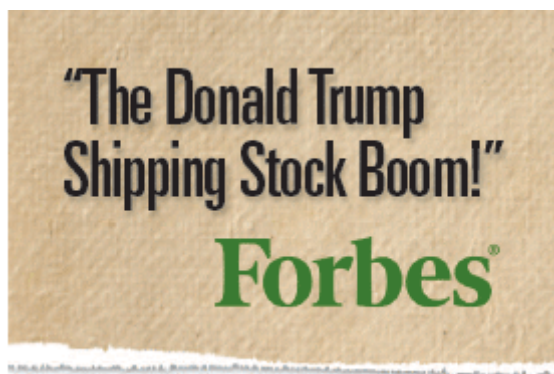

With EPTI's three tiered business plan in play – early investors could be eyeing an incredible returns – which would allow them to sell half their position for an incredible profit and hold on to the rest for a chance at an even BIGGER potential profit!

EPTI has all the right pieces in play to help investors do exactly that..

If you're ready to possibly make more money with one stock than you could make all year – you should consider grabbing shares of EPTI now while they may be the cheapest we ever see them again!

That's why I'm urging any and all who have their hands on this advanced profit

the

have their hands on this advanced profit notification to profit to consider calling their broker today and give them EPTI's ticker symbol...

It could be the only stock you need to buy all year.

world's favorite mode of transportation and shipping for more than a century to come.

Even now, in the 21st Century, the railways account for about 40% of freight transported in the US – bringing in almost half a billion in revenue monthly.

With this big of a share of the freight business in their control...

It would make sense for EPTI to build a few solid relationships in the railway industry.

Well... they're definitely in the process of doing exactly that.

Having passed the *Association of American Railroad's* (AAR) most stringent impact and vibration tests – **EPTI's** flexitanks (both their BIG Red and LIQUIRIDE™) could soon show up on the railcars of each and ever company in operation...

And the AAR certification gives **EPTI** access to the biggest names on the rails – companies like: *CSX, Union Pacific, BNSF, CN, and Norfolk Southern.*

That's all 5 of the biggest American railroad companies in all of North America!

This is HUGE!

Because remember, **EPTI** is the **ONLY** company with the exclusive LIQUIRIDE™ flexitanks – the smaller versions of their BIG Red brand...

No other company can offer to these giants what **EPTI** can!

**Environmental Packaging Technologies**

**Lock In Your Profits NOW!**

**Important Key Facts!**

Company.....Environmental Packaging Technologies

Ticker Symbol .....EPTI

Potential .....Industry Leader

**Next Step.....Act NOW!**

This puts them in the unique position of being a one-stop-shop for all a transportation company's bulk liquid needs.

Can you imagine if **EPTI** could capture just 1% of the railways total shipping business?

Think about that for a second...

**Being the ONLY company in their industry with the patent-pending technology of the LIQUIRIDE™ system – capturing just 1% of the total US railway business isn't a stretch by any means.**

In fact, one could argue that it'd be rather easy for **EPTI** to do...

Even more, they're already putting plans in motion to partner some of the bigger names in railways – so grabbing that 1% may happen sooner rather than later.

And if it all goes how it could – 1% may be a gross underestimation.

But...

Do you realize what 1% of a \$60 Billion industry would mean?

Getting just 1% of the industry would represent a \$600 Million increase in valuation.

\$600 Million.

If that happens – those potential quadruple-digit profits that we've already mentioned would look like peanuts!

Early investors could find themselves SWIMMING in profits...

But only if they act now – because once this news breaks – the potential profit window begins to close.

Especially when the next chapter of this story unfolds!

**First North America – Then The World!**

We've talked extensively about how **EPTI** could soon dominate US and even Canadian railways...

But what we haven't talked about is how North America is just a part of EPTI's global railway equation.

Just as **EPTI's** flexitank products have passed the stringent testing of the AAR – they've also passed many of the rest of the world's top testing protocols to become certified by many of the top railroad companies on the planet!

Passing such testing as the: Goerlitz Flexitank Rail Impact Test, Brunel Railmotive, Goerlitz, Germany Marine Container Test, and the English Vertical Impact Test.

By running through testing with flying colors, **EPTI** has now been certified or approved by a host of railway companies...

**Let's go through the full list:**

- **North American Rail Authorizations: CSX, UP, BNSF, CN, and NS**
- **Bureas Veritas, Rail Certification, Argentina**
- **Russian Railroad (RZD)**
- **China Railroad**
- **Austrian Railroad (ÖBB)**

That represents 4 of the 7 continents!

Oh, and by the way, EPTI flexitanks are also both Kosher and HALAL certified – allowing companies that supply these goods much easier.

This means that with the exception of Australia and Africa (we don't need to count Antarctica) – **EPTI** could soon be used throughout most of the world!

Are you starting to get an idea of just how big **EPTI** could become.

By dominating trucking routes, overseas shipping routes and the railways – **EPTI** could soon be the biggest company that 99% of the population has never heard of!

And you're getting this information first – before anybody.

I can urge you enough how important it is to get in on this company now – before the Wall Street Journal or Forbes runs a cover story on them.

With huge potential profits on the line (and perhaps a LOT more) – the time to decide is now.

*Please consider grabbing as many shares of EPTI as you can comfortably afford – it could be the most profitable move you'll ever make.*

## All Aboard: Why America's Second Rail Boom Has Plenty Of Room To Run *(as seen in Forbes)*

Rail is on a roll, and not just in North Platte. Thanks to leaps in technology, the rising price of diesel and improved delivery speeds, more and more freight traffic has moved from roads to rails, where trains can move one ton of goods about 500 miles on a single gallon of fuel. Since 2009 Union Pacific's weekly carloadings have increased from 133,000 to 180,000, helping the company achieve record earnings every quarter since the beginning of 2010. Since 2009 its stock price has surged 350% while competitors like Kansas City Southern and Canadian Pacific have seen shares more than double, all of which makes Warren Buffett's \$34 billion purchase of the rival Burlington Northern four years ago look like the great train robbery: FORBES estimates BNSF is worth about \$65 billion today.

The industry, so recently aging also-ran in the age of superhighways, is now a fountain of superlative figures: Industrywide, revenues have surged 19% from \$67.7 billion to \$80.6 billion since 2009, creating 10,000 new jobs at railroad companies and countless thousands in related industries— and paying out \$21 billion in wages last year alone, up nearly \$1 billion. As the U.S. population swells, the Federal Railroad Administration projects that the tonnage of freight shipped by the U.S. rail system will increase 22% by 2035.

*"This is the best they've been doing in half a century,"* says rail consultant Carl Martland, a retired MIT lecturer. *"It's hard to imagine a scenario where there is not growth. People are going to continue to eat, heat our homes, buy cars. If everything*

*else is outsourced, that means all the products are going to be coming into the United States at a port in containers. How are they going to get where they're going? They're going to Chicago, Memphis, everywhere else by rail."*

All of which is driving a multibillion-dollar revival in rail R&D and infrastructure, investment unseen in America since the transcontinental railroad.

**Buyout! Buyout! Buyout! EPTI Could Be  
The Most Interesting (And Attractive)  
Acquisition Target On Wall Street!**

With strong ties to so many major players in the transportation industry – EPTI could be the most lucrative buyout target to hit Wall Street in YEARS! Get in before that happens and you could make a mint!

Does **EPTI's** signed customer agreements with Maersk or their ties to the railways mean that a big money buyout is on **EPTI's** horizon?

It very well could...

And there really is only one INSTANTANEOUS way to economic success for a stock like **EPTI** – the high-priced buyout.

However, the question behind this statement is this...

“Is **EPTI** a major target for a high-priced buyout?”

Well, unfortunately, there's now crystal ball on Wall Street, so that's a hard question to answer with 100% certainty, but...

We do know that they're on the radar of some big name players in the transportation and shipping industries – and that kind of attention for a small, yet successful company like **EPTI** – can often start the sharks swirling.

You see, if there is one thing that can boost the profile of an emerging company, it's winning a contract with a company like the \$68 Billion, Maersk. What a contract with a major player says to most (and could put EPTI on the buyout radar), is that **EPTI** is for real – especially when a company the size of Maersk is ready to get behind them

And *Maersk* is in the business of acquiring companies in their industry...

Remember, they recently bought one of their competitors, Hamburg Sud to the tune of \$4 Billion – so forking out a couple hundred Million for **EPTI** would not be a problem.

**A spokesperson for Maersk, Mikkel Elbek, recently revealed, “We welcome consolidation. Our industry is fragmented and consolidation can help transform our business for the benefit of our customers.”**

With Maersk already spending MILLIONS with **EPTI** – is it out of the realm of possibility that they'd want **EPTI's** flexitank technology all to themselves? All signs point to “no”...

**EPTI** fits perfectly under the *Maersk* umbrella and could help keep them at the very top of their industry for decades to come!

Lucky for us, **EPTI** wasn't on their acquisition radar in 2016 – as we could have easily missed out on a unique, yet obvious lucrative opportunity...

But remember, the Trump Effect may make 2017 one of the biggest Wall Street has ever seen – so it's imperative to start your research on **EPTI** today!

Because the key to making FAST profits in the world of buyouts and acquisitions is getting in before the rumors of a buyout even begin being whispered.

So, by getting in on **EPTI** now – you're guaranteeing that those titan-sized returns that could happen with a buyout are locked in – so if Maersk does come knocking on **EPTI's** door, you'll be there to profit!

Especially if a bidding war begins over the rights to **EPTI**!

## **Maersk, CSX, DHL –Who Would Win An All Out Bidding War?**

Here's how this scenario would go down...

*Maersk* decides they want **EPTI** and their flexitank technology all to themselves and made them an offer for ownership.

Rumors of buyouts spread through Wall Street like wild fire...

It wouldn't be long till word got back to one of **EPTI's** other customers caught wind of this proposed buyout and decided they wanted **EPTI** for themselves.

They could want to make an offer as well...

If this happens – any of the companies in the industry could potentially throw their hat into the ring – perhaps starting a bidding war unlike any their industry has ever seen!

And why might companies like *Maersk*, *DHL* or *CSX* want this technology for themselves?

Maybe they want to cut their costs...

Or maybe they want to make money selling **EPTI's** flexitanks...

Regardless, whoever would win a potential bidding war over **EPTI** would be getting something no other flexitank company can offer.

Remember, **EPTI's LIQUIRIDE™** has a patent pending – meaning that whoever owns **EPTI** – could eventually own the patent on this industry-changing technology!

The company that owns this patent could find themselves as the leader in bulk liquid shipping – and having a new and healthy revenue stream to boot.

So if their reason to buy EPTI is the pending patent on the LIQUIRIDE™ – there's only two ways they'll get control of it: either buy it outright from EPTI (a process that can take years) or they can take the shorter route and just buy the company outright!

This may be the more profitable proposal...

And if you don't think that shipping companies are already eyeing EPTI, you'd be sorely mistaken.

In fact, these companies could already be circling EPTI as we speak!

**And remember, if a bidding war breaks out, the profits we were eyeing before, might be chump change when all is said and done.**

***It's happened before, and it could happen again!***

## Neverending Profits!

### How Patents Ensure Company's Continue To Rake In The Dough!

One of the biggest reasons a company would want to patent an idea (other than ensuring others can't profit from your innovation) is the fact that as the patent holder, they could license the production of their innovation to outside company's at a profit!

You're probably wondering why a company would want to license production of the LIQUIRIDE™...

Well, these companies would pay for the right to use or produce the innovation patented so they can grab a piece of the pie for themselves.

They know that if they can supply these goods to shipping and transport companies – they can make a healthy profit – even after paying licensing fees.

Which is GREAT for EPTI...

Because these signed licensing agreements are practically all profit!

And because it saves EPTI production costs – it may pay better to have another company make the LIQUIRIDE™ than to produce it themselves.

It's a perfect set up for EPTI...

They can license out their potentially patented flexitank technology to these production companies – without having to sell out to them – while continuing to create more business relationships.

It's really a win/win situation for all involved...

And it's just one more reason why grabbing shares of EPTI now is a smart move.

**With the ability to give investors the chance at up to 10X their money back – and maybe MORE – EPTI is giving us the very real chance to walk away from the table when we want and to cash out rich!**

## The Trump Effect And How Gigantic Gains Could Be Yours For The Taking!

The election of Donald Trump as President started a shift in American business that could soon lead to the biggest manufacturing boom since WWII! Act now and you could watch **just a \$2K EXPLODE!**

Proof...

Nothing weighs more in proving a point than cold hard facts.

And the fact is, **EPTI** could not only become the biggest bulk liquid shipping company in the world – but they could become the top performing stock of the year!

Why?

Well, by becoming the world's only manufacturer of the patent-pending LIQUIRIDE™ brand of stackable flexitanks – they've positioned themselves as a

one-stop-shop for any company's bulk liquid shipping needs.

That's just one of the reasons why it's easy to see HUGE gains from those who act now.

And the fact that EPTI has already signed on multi-billion dollar shipping titan, Maersk as one of their clients means that we may be only weeks or mere months away from double, triple or even quadruple-digit gains.

Don't sit on the sidelines and read about EPTI in the Wall Street Journal or on Bloomberg, because unfortunately, by then it'll be too late to capture the giant sized profits that could be on the table right now.

You've seen the facts and heard the story for yourself – now is the time to act.

**Do yourself a favor — secure your chance at some BIG gains today!**

Consider calling your broker or logging in to your online trading account and grabbing as many shares of **EPTI** as your comfortably can...

Because **EPTI** is here – and could soon have a firm foothold in one of the world's biggest industries.

## **Your Next Step To Profit From The Coming Manufacturing Boom**

How many times can you say you've had advanced knowledge of a potential winner?

There are people who have been trading stocks for decades that have yet to be able to get in on the proverbial ground floor of a booming industry, let alone a potential blockbuster...

But right now, you have the chance to do exactly that by grabbing shares of **EPTI!**

Not only are they laying the groundwork to become the #1 flexitank producer on the planet...

But they're also setting themselves up as one of the hottest buyout targets this industry has ever seen!

If you want to cash out a winner, the time is now! Acting today locks in your chance to win big with EPTI – because soon all of Wall Street could know all about this amazing company.

All I can do is give you the key to unlocking profits, it's up to you to walk through the door and make the first step...

That's why I can't urge you enough, put this down and consider calling your broker or logging in to your online trading account and giving them this ticker symbol: **EPTI**

You'll be glad you did!

To Your Future Wealth

Editor, Profit Play Stocks

P.S. By capturing just the smallest of fractions of the \$436 Billion of the global shipping market could put investors in **EPTI** on easy street. With revenues forecast to double in 2017 – it's easy to see how **EPTI** is well on its way to building fortunes for those who act now! Don't wait! **EPTI** is already making the moves to become the #1 flexitank producer in the world! Be there to profit when they reach that goal! ***Consider buying EPTI today!***

P.P.S. With mega-companies like Maersk, CSX, DHL and others in the shipping business potentially knocking on **EPTI's** door – early investors could very well find themselves in the middle of an aggressive, fast and high-priced bidding war! A bidding war that could make **even quadruple-digit** profits look like peanuts! If you are looking to cash out rich, **EPTI** could be giving you that chance more than any other stock this year. Don't wait on this one. ***Act today!***
